Social Construction Care Community:

The Social Construction of Community Care Anthea Symonds, Anne Kelly, 1998-11-11 This book represents a new development in the discussion of community care policies with its integrated approach addressed to both community nurses and social workers. It includes contributions from practitioners in both fields as well as lecturers and researchers in sociology and social policy. The overall theme of the book is the concept of community as a social and cultural construction. The authors begin with an account of the historical construction of community care followed by explorations of the actual practice of the delivery of care and of the needs of particular groups within the community.

The Social Construction of Community Nursing Anne Kelly, Anthea Symonds, 2017-03-14 At a time of great change the moves towards a primary healthcare led NHS are challenging nurses to rethink their roles, organisation and strategy. This book combines an analysis of policies which have shaped community nursing from the 19th century with an exploration of recent trends and developments. Illustrated throughout with examples of present responses to current policies, this book will be invaluable for all community nurses both practising and student as well as for policy makers and sociologists.

Pastoral Identity as Social Construction Samuel Park, 2017-09-15 How do chaplains and counselors form their identities as pastoral caregivers in challenging clinical contexts such as institutional interdisciplinary, postmodern, inter-cultural and multi-faith work environments? This book is a product of the fifteen year long journey towards answering a well known but hardly answered question about pastoral identity. Based on narratives of many pastoral practitioners who work in hospitals or counseling settings, the author puzzles through ways for helping professionals to form their identities in bewildering work environments. Previous studies on pastoral identity have focused on an individual interiority of pastoral practitioners and have emphasized mainly the caregivers' perceptions and practices from a developmental and training perspective. Grounded in an empirical study of active pastoral care providers, this book presents pastoral identity as a relational and interactional property socially constructed among pastoral care partners, culture and God. Findings of the empirical study support contemporary theological and social psychological discourses: identity is embedded in and embodied by relationships. This book will guide you through confusions, worries, insights and woes you have experienced while helping others in order to envision yourself more clearly as a spiritually embodied and pastorally tending caregiver. You will find yourself to be more who you are and engage more with others as they become who they are.

Reconceptualising Work with 'carers' Kirsten Stalker, 2003 Demonstrating the scope and diversity of caring, the contributors highlight the positive aspects of caring and the interdependence of many caring relationships but also broach the sensitive and complex subject of poor care and the importance of identifying and meeting the needs of hidden carers.

Social Construction Kenneth J Gergen, Mary Gergen, 2003-04-03 This reader introduces a number of important viewpoints central to social constructionism and charts the development of social constructionist thought.

Gender Inequalities, Households and the Production of Well-Being in Modern Europe Tindara Addabbo,Marie-Pierre

Arrizabalaga,Alastair Owens,2016-04-22 Feminist scholars have long pointed out the relevance of the unpaid work that goes on within European households in sustaining the well being of the continent s populations However care work and domestic labour continue to be largely unremunerated and unequally distributed by gender This unique volume of interdisciplinary essays casts new light on the roles that households play in securing the well being of individuals and families uncovering the

processes of bargaining and accommodation and conflict and compromise that underpin them Contributors put gender at the centre of their analyses demonstrating the uneven experiences of men and women as both providers and receivers of welfare in European households in both the past and the present As European states grapple with changing family forms a growing population of dependent people increased participation of women in labour markets and a profound shift in the nature and organisation of work this book makes a timely contribution to our understanding of the critical role played by households in mediating processes of economic and social change It offers new challenges to scholars researchers and policy makers eager to address gender inequalities and enhance well being This book is the second of four volumes being published as part of Ashgate s Gender and Well Being series that arise from a programme of international symposia funded by the European Science Foundation under the auspices of COST European Cooperation in the field of Scientific and Technical Research

*APAIS 1999: Australian public affairs information service , Handbook of Community-Based Clinical Practice Anita Lightburn,Phebe Sessions,2006 Bridges community practice and clinical practice by collecting 33 chapters from social workers psychologists and psychiatrists that outline and illustrate the state of the art Designed specifically for clinicians making the transition to community based work Provided by publisher *THE TRANSITION OF DANWEI-COMMUNITY AND URBAN COMMUNITY REBUILDING* Tian Yi-Peng,2021-11-18 In this work the author endeavors to treat Danwei system as a special and highly organized form of community and sets about his study from the perspectives of Danwei community s change and urban community reconstruction When it comes to the construction and development of urban communities in contemporary China academic circles at home often attempt to unravel its intimate and indissoluble connection with Danwei system and seek to lay emphasis upon the great complexity of their interactive relationship with each other However academic circles generally incorporate Danwei system taken as a national system as well as a universal institution into their fields of research whereas they rarely enter into a critical examination of the variations in its multiplicity of specific denotations by taking account of such variables as space region and culture nor do they show much concern about the existence of different types of Danwei In view of the foregoing difficulties in which the study of Danwei system gets entangled this study attempts to accomplish the following main purposes Firstly this study shall introduce such a variable as locality into the research on Danwei community by starting off from the research perspectives of Danwei community s origin formation and change Secondly several super large industrial communities in the old industrial bases shall be chosen as classic cases in illustration of long standing complications and entanglements enmeshed in this study And thirdly it seeks to reveal the mode and experience of urban community development against a background of Danwei system reform so that by gaining a full understanding of as well as making an in depth analysis of their rich implications we can enrich the theory of urban community construction in the Chinese context and hence grapple successfully with some theoretical problems confronting urban community reconstruction against a background of Danwei community change which shall eventually*

bring about a smooth transition of Danwei society This book will assuredly open an exceptional window to the transition of China from traditional to modern society the transition of Chinese society from planned economy to market economy and the change track of the interplay between the Chinese government and modern Chinese society after the founding of New China in 1949 at the present time and even in the foreseeable future *Managing the ageing experience* Denise

Tanner,2010-09-01 Current social policy recognises that older people should be treated as experts in their own lives and be actively involved in their care This book explores what can be learned from older people s experiences of managing ageing Direct connections are made between the everyday experiences and perspectives of older people related research and theoretical perspectives This yields an engaging and informative analysis of how older people manage the ageing experience and what this means for policy and practice directed at promoting older people s wellbeing The book will be of value to undergraduate and postgraduate students in health and social care and practitioners in these fields Welfare: Needs,

Rights and Risks Mary Langan,2005-10-27 Welfare Needs Rights and Risks addresses the question of how people get access to social welfare in the UK today It explores the public political and professional definitions constructions and conflicts about who should receive social welfare and under what conditions In a period during which the rationing targeting and selective provision of welfare have become more significant more visible and more disputed this book examines how individuals and groups come to be defined as in need at risk or deserving of welfare Handbook of Community Movements and Local

Organizations Ram A. Cnaan,Carl Milofsky,2007-12-18 Although the way associations and the organization of local social life are intertwined is one of the oldest approaches to community study the way citizens and residents come together informally to act and solve problems has rarely been a primary focus Associations are central to important and developing areas of social theory and social action This handbook takes voluntary associations as the starting point for making sense of communities It offers a new perspective on voluntary organizations and gives an integrated yet diverse theoretical understanding of this important aspect of community life *A Socio-cultural Perspective on Patient Safety* Dr Emma

Rowley,Dr Justin Waring,2012-10-01 This edited volume of original chapters brings together researchers from around the world who are exploring the facets of health care organization and delivery that are sometimes marginal to mainstream patient safety theories and methodologies but offer important insights into the socio cultural and organizational context of patient safety By examining these critical insights or perspectives and drawing upon theories and methodologies often neglected by mainstream safety researchers this collection shows we can learn more about not only the barriers and drivers to implementing patient safety programmes but also about the more fundamental issues that shape notions of safety alternate strategies for enhancing safety and the wider implications of the safety agenda on the future of health care delivery In so doing *A Socio cultural Perspective on Patient Safety* challenges the taken for granted assumptions around fundamental philosophical and political issues upon which mainstream orthodoxy relies The book draws upon a range of theoretical and

empirical approaches from across the social sciences to investigate and question the patient safety movement Each chapter takes as its focus and question a particular aspect of the patient safety reforms from its policy context and theoretical foundations to its practical application and manifestation in clinical practice whilst also considering the wider implications for the organization and delivery of health care services Accordingly the chapters each draw upon a distinct theoretical or methodological approach to critically explore specific dimensions of the patient safety agenda Taken as a whole the collection advances a strong coherent argument that is much needed to counter some of the uncritical assumptions that need to be described and analyzed if patient safety is indeed to be achieved

The Handbook of Mental Health and Space Laura McGrath, Paula Reavey, 2018-09-19 The Handbook of Mental Health and Space brings together the psychosocial work on experiences of space and mental distress making explicit the links between theoretical work and clinical and community practice The change from an institutional to community care model of mental health services can be seen as a fundamental spatial change in the lives of service users and the book aims to stimulate discussion about mental healthcare spaces and their design With contributions from those involved in theorizing space those drawing on their own experiences of distress and space as well as practitioners working on the ground the book will be of interest to mental health practitioners and academics
