The Guinea Pigs Britains First Paratroop Raid:

The Guinea-pigs Raymond Foxall, 1983 Englands f rste operation med luftb rne tropper fandt sted i Italien i 1941 De barske erfaringer fra denne operation dannede basis for opstillingen af de senere faldsk rmsbrigader **Night Raid** Taylor Downing, 2013-05-09 The loss of British bombers over Occupied Europe began to reach alarming levels in 1941 Could it be that the Germans were using a sophisticated form of radar to direct their night fighters and anti aircraft guns at the British bombers British aerial reconnaissance discovered what seemed to be a rotating radar tower on a clifftop at Bruneval near Le Havre The truth must be revealed The decision was taken to launch a daring raid on the Bruneval site to try and capture the technology for further examination The planned airborne assault would be extremely risky The parachute regiment had only been formed a year before on Churchill s insistence This night raid would test the men to the extreme limits of their abilities Night Raid tells the gripping tale of this mission from the planning stages to the failed rehearsals when the odds seemed stacked against them to the night of the raid itself and the scientific secrets that were discovered thanks to the paras precious cargo the German radar Its capture was of immense importance in the next stages of the war and the mission itself marked the birth of the legend of the Red Devils **Churchill's Shadow Raiders** Damien Lewis, 2020-04-28 From bestselling and award winning war reporter Damien Lewis and for fans of Erik Larsen s The Splendid and Vile and Alex Kershaw s The Forgotten 500 comes a thrilling account of one of the most daring raids of WWII the true story of the race to stop Hitler from developing a top secret weapon that would change the course of history One of the most readable World War 2 history books I have read in years We Are the Mighty In the winter of 1941 as Britain faced defeat on all fronts an RAF reconnaissance pilot photographed an alien looking object on the French coast near Le Havre The mysterious device a Wurzburg Dish appeared to be a new form of radar technology ultra compact highly precise and pointed directly across the English Channel Britain s experts found it hard to believe the Germans had mastered such groundbreaking technology But one young technician thought it not only possible he convinced Winston Churchill that the dish posed a unique and deadly threat to Allied forces one that required desperate measures and drastic action Capturing the radar on film had been an amazing coup Stealing it away from under the noses of the Nazis would be remarkable So was launched Operation Biting a mission like no other An extraordinary snatch and grab raid on Germany s secret radar installation it offered Churchill s elite airborne force the Special Air Service a rare opportunity to redeem themselves after a previous failed mission and to shift the tides of war forever Led by the legendary Major John Frost these brave paratroopers would risk all in a daring airborne assault with only a small stretch of beach menaced by enemy guns as their exit point With the help of a volunteer radar technician who knew how to dismantle the dish as well as the courageous men and women of the French Resistance they succeeded against all odds in their act of brazen robbery Some would die Others would be captured All fought with resolute bravery This is the story of that fateful night of February 27 1942 A brilliantly told thrillingly tense account of Churchill s

raiders in their finest hour this is World War II history at its heart stopping best This highly informative book almost reads like a genuine techno thriller New York Journal of Books A little known behind the lines spectacular led by two heroic British officers Kirkus Reviews Anyone who wants to learn more about the origins of the British Special Forces should read this book It intertwines historical research and eyewitness testimony to tell the untold story of heroism courage and ingenuity Military Press Lewis presents a richly detailed and nail biting tale Library Journal Allied Fighting Effectiveness in North Africa and Italy, 1942-1945, 2014-05-15 Allied Fighting Effectiveness in North Africa and Italy 1942 1945 offers a collection of scholarly papers focusing on heretofore understudied aspects of the Second World War Encompassing the major campaigns of North Africa Sicily and Italy from operation TORCH to the end of the war in Europe this volume explores the intriguing dichotomy of the nature of battle in the Mediterranean theatre whilst helping to emphasise its significance to the study of Second World War military history The chapters written by a number of international scholars offer a discussion of a range of subjects including logistics the air land battle coalition operations doctrine and training command control and communications and airborne and special forces Contributors are Matthew C Ford Simon Godfrey John Greenacre Andrew L Hargreaves James Hudson Alan Jeffreys Kevin Jones Paul Lemaire Ross Mahoney Christopher Mann Cesar Campiani Maximiano Patrick J Rose and Grant T Weller **Behind the Lines** Michael F. Dilley, 2013-09-30 The array of new technologies that came on the scene in the early 20th century resulted in widely varied new forms of military special operations once civilization embarked on its greatest war Suddenly fighting men could be delivered by parachute submarine glider jeeps and fast amphibious craft deep into enemy territory to perform special tasks yet others would continue to perform missions the same as their ancestors in previous wars on foot using stealth endurance and patience This work contains discussions of the employment of various special purpose special mission organizations during World War II These units operated in Allied and Axis countries and in various theaters of war including Europe North Africa the Pacific Asia and the continental United States Representing every major combatant the operations include various kinds of raids intelligence gathering missions support to partisan guerrilla groups prisoner rescues direct action missions and at least two where the object was simply to steal something Some missions would have been officially denied if the operations had been caught in the act The book is divided into two sections Behind Enemy Lines and Behind Friendly Lines to demonstrate that special purpose organizations can be employed wherever needed even in areas controlled by military units of their own or allied countries Many of the units described run the gamut of special mission types from commando to parachute units reconnaissance to sabotage units and partisan training units as well as those with combined missions Many of the operations described in this book continue to serve as templates for modern Special Operations missions while still others the first attempts of their kind continue to serve as examples of what not to try under the circumstances Michael F Dilley served for 20 years in the U S Army s Military Intelligence branch After retiring from the Army the author served for about ten years as

an employee of the Department of Defense then as a contractor for various U S Government agencies in several fields for 15 years Author of several books and many articles a number of these chapters are based on his previous writings for the legendary Behind the Lines magazine *Operation Colossus* Lawrence Paterson,2020-06-24 Provides an excellent overview of the development of parachute troops as well as an exciting battle narrative and gripping human interest story Argunners Magazine Formed by a collection of free thinking army and air force officers the fledgling British paratrooper unit known as the SAS deployed trial and error in terms of tactics and equipment before an elite few were selected to make the first British parachute raid of the war which took place in Basilicata Italy on 10 February 1941 Collectively known as X Troop these men were parachuted by specially selected bomber crews into the heart of enemy territory where they successfully destroyed their target the Tragino Aqueduct before becoming the object of an exhaustive manhunt by Italian troops and civilians Captured they were variously interrogated imprisoned and the Italian SOE agent placed on trial for treason and executed Given the distances that had to be covered the logistical complications and the lack of any precedent the raid was a remarkable feat Its success or failure depended on a group of men using methods and equipment thus far untried by the British Army They were truly guinea pigs for those that would follow in their footsteps Often overlooked in British military history Paterson brings this extraordinary episode to light drawing on verbatim testimony and interrogating the truth of previous accounts From the formation of the unit and the build up to its first deployment through Operation Colossus and its aftermath to its ongoing legacy today this is the fascinating story of the modern day British Parachute Regiment Well written with all the flash and dash of typical commando warfare Historical Miniatures Gaming Society *Churchill's Spearhead* John Greenacre,2010-06-19 This book covers the inception growth and employment of Britains airborne forces parachute and glider borne formations between June 1940 and March 1945 It takes a comparative approach and follows tailored lines of development Each of these lines politics and policy equipment and technology personnel and training command and control and concepts and doctrine influence each other The contents include Politics and Policy The political environment within which the major decisions were made concerning the concept of development of Britains airborne forces Churchills personal contribution the effect of inter service rivalry and the influence of other government departments Equipment and Technology The methods and obstacles of procuring and supplying the bespoke equipment required by airborne forces The supply of combat equipment the provision of support aircraft and the procurement of gliders Personnel and Training The effort incurred to man the new force and the effect of different approaches to recruitment and training The selection and recruitment of airborne personnel the individual training of paratroops and glider pilots and the role of collective training prior to operations Command and Control The ability of individuals in key appointments to influence the path of development and the operational and tactical employment of the force The reaction and approach of higher commanders to the new capability the selection and impact of commanders within the airborne force and the influence of the airborne staff Concept
