*Educational Leadership for Organisational Learning and Improved Student Outcomes* William Mulford, Halia

Silins, Kenneth A. Leithwood, 2006-04-11 The change in paradigm in our field is away from the great man or woman theory of leadership and the teacher in his or her own classroom to the development of learning communities which value differences and support critical reflection and encourage members to question challenge and debate teaching and learning issues How to achieve such learning communities is far from clear but we believe the areas of problem based learning PBL and organizational learning OL offer valuable clues The indications are that the successful educational restructuring agenda depends on teams of leaders whole staffs and school personnel working together i e OL linking evidence and practice in genuine collaboration i e PBL The book is unique in that it is both about and uses these two concepts      Organization Development in Schools

*Local Drivers for Improvement Capacity* Ulf Blossing, Torgeir Nyen, Åsa Söderström, Anna Hagen Tønder, 2014-11-10 This book presents systematically six types of schools with different improvement capacities Different schools have different capacities for school improvement depending on the school infrastructure norms and routines for the improvement process improvement roles and improvement history The organisation of the improvement capacity is understood on the basis of sensemaking processes among teachers and school leaders The book focuses on the challenges for each type of school in their improvement work and which situations and circumstances they need to take into account The school types are illustrated with detailed descriptions of six schools coming from an evaluation of a Norwegian school development program The book fills a need in school organisations to have concrete illustrations from similar schools of how teacher teams are organised how leadership is exercised and processes are organised in their efforts of improving the organisation and building a complex and effective capacity Schools improvement capacity has become an important feature in school management and leadership as well as in research as western states have decentralised governance to the local level The expectations on school leaders as well as on teachers are high when it comes to improve their schools to raise student outcome Accounts of professional school cultures and professional learning communities often describe in an overall perspective the ideal school where such an improvement capacity is in work However accounts of the many ways of organising the capacity which perhaps are not all in all ideal or effective also contribute to the knowledge of the local school process      *Research in*
