The Heroic Age Of Science:

The Heroic Age of Science William Arthur Heidel, 1971

The ^AHeroic Age Robert D. Purrington, 2018-01-22

Presents a detailed look at the period between 1925 and leading up to WWII in which quantum theory was created and then quickly applied to nuclear atomic molecular and solid state physics The book includes a heavy emphasis on the scientific literature rather than a breezy overview of this period focusing on personalities or personal stories of the scientists involved

The Sociology of Science Robert K. Merton, 1973 The exploration of the social conditions that facilitate or retard the search for scientific knowledge has been the major theme of Robert K Merton s work for forty years This collection of papers is a fascinating overview of this sustained inquiry There are very few other books in sociology with such meticulous scholarship or so elegant a style This collection of papers is and is likely to remain for a long time one of the most important books in sociology Joseph Ben David New York Times Book Review The novelty of the approach the erudition and elegance and the unusual breadth of vision make this volume one of the most important contributions to sociology in general and to the sociology of science in particular Merton s Sociology of Science is a magisterial summary of the field Yehuda Elkana American Journal of Sociology Merton s work provides a rich feast for any scientist concerned for a genuine understanding of his own professional self And Merton s industry integrity and humility are permanent witnesses to that ethos which he has done so much to define and support J R Ravetz American Scientist The essays not only exhibit a diverse and penetrating analysis and a deal of historical and contemporary examples with concrete numerical data but also make genuinely good reading because of the wit the liveliness and the rich learning with which Merton writes Philip Morrison Scientific American Merton s impact on sociology as a whole has been large and his impact on the sociology of science has been so momentous that the title of the book is apt because Merton s writings represent modern sociology of science more than any other single writer Richard McClintock Contemporary Sociology

The Heroic Age of American Invention Lyon Sprague De Camp, 1961 The story of thirty two men who made the

modern American era *Constructing the Social System* Bernard Barber,1993-01-01 Barber constructs a provisional generalized substantive theory of the social system which he uses as the starting point and focus of his specialized researches In this collection of his major writings in social system theory Barber shows how he has used and developed such a framework over the last fifty years and demonstrates the application of social system theory and its contribution to these areas **Holonomy** Jeffrey Stamps,1980 "The" Major Achievements of Science Arthur Edward Ellard McKenzie,1960

An Empire of Ice Edward J. Larson,2011-05-31 A Pulitzer Prize winning author examines South Pole expeditions wrapping the science in plenty of dangerous drama to keep readers engaged Booklist An Empire of Ice presents a fascinating new take on Antarctic exploration placing the famed voyages of Norwegian explorer Roald Amundsen his British rivals Robert Scott and Ernest Shackleton and others in a larger scientific social and geopolitical context Recounting the Antarctic expeditions of the early twentieth century the author reveals the British efforts for what they actually were massive scientific enterprises in which reaching the South Pole was but a spectacular sideshow By focusing on the larger purpose of these legendary adventures Edward J Larson deepens our appreciation of the explorers achievements shares little known stories and shows what the Heroic Age of Antarctic discovery was really about Rather than recounting the story of the race to the pole chronologically Larson concentrates on various scientific disciplines like meteorology glaciology and paleontology and elucidates the advances made by the polar explorers Covers a lot of ground science politics history adventure The New York Times Book Review **Giambattista Vico: Keys to the "New Science"** Giambattista Vico,2011-03-15 Giambattista Vico Keys to the New Science brings together in one volume translations commentaries and essays that illuminate the background of Giambattista Vico s major work Thora llin Bayer and Donald Phillip Verene have collected a series of texts that help us to understand the progress of Vico s thinking culminating in the definitive version of the New Science which was published in 1744 Bayer and Verene provide useful introductions both to the collection as a whole and to the individual writings What emerges is a clear picture of the decades long process through which Vico elaborated his revolutionary theory of history and culture Of particular interest are the first sketch of the new science from his earlier work the Universal Law and Vico s response to the false book notice regarding the first version of his New Science The volume also includes additions to the 1744 edition that Vico had written out but that do not appear in the English translations including his brief chapter on the Reprehension of the Metaphysics of Descartes Spinoza and Locke and a bibliography of all of Vico s writings that have appeared in English Giambattista Vico Keys to the New Science is a unique and vital companion for anyone reading or rereading this landmark of Western intellectual history **The Sacred Science of Ancient Japan** Avery Morrow,2014-01-24 The first English translation and examination of secret Japanese writings dating from the paleolithic to classical eras Examines four suppressed and secret texts to discover the deeper truths beneath Japanese mythology Introduces evidence of ancient civilizations in Japan the sacred geometry of primitive times and claims of a non Earthly origin

of the Emperors Explores how these texts convey the sacred spiritual science of Japan's Golden Age with parallels in ancient India Europe and Egypt In Japan there are roughly two dozen secret manuscripts originally dating back to the paleolithic era the age of heroes and gods that have been handed down by the ruling families for centuries Rejected by orthodox Japanese scholars and never before translated into English these documents speak of primeval alphabets lost languages forgotten technologies and the sacred spiritual science Some even refer to UFOs Atlantis and Jesus coming to Japan Translating directly from the original Japanese Avery Morrow explores four of these manuscripts in full as well as reviewing the key stories of the other Golden Age chronicles In the Kujiki manuscript Morrow uncovers the secret symbolism of a Buddhist saint and the origin of a modern prophecy of apocalypse In the Hotsuma Tsutaye manuscript he reveals the exploits of a noble tribe who defeated a million strong army without violence In the Takenouchi Documents he shows us how the first Japanese emperor came from another world and ruled at a time when Atlantis and Mu still existed And in the Katakamuna Documents the author unveils the sacred geometries of the universe from the symbolic songs of the 10 000 year old Ashiya tribe He also discusses the lost scripts known as the Kamiyo Moji and the magic spiritual science that underlies all of these texts which enabled initiates to ascend to higher emotional states and increase their life force Taking a spiritual approach la Julius Evola to these parahistorical chronicles Morrow shows how they access a higher order of knowledge and demonstrate direct parallels to many ancient texts of India Europe and Egypt Early Medical and Biological Science Robert Theodore

Gunther,1926 **Early Science in Oxford ...** Robert Theodore Gunther,1925 **Forging the Future of Space Science** National Research Council,Division on Engineering and Physical Sciences,Aeronautics and Space Engineering Board,Space Studies Board,2010-03-08 From September 2007 to June 2008 the Space Studies Board conducted an international public seminar series with each monthly talk highlighting a different topic in space and Earth science The principal lectures from the series are compiled in Forging the Future of Space Science The topics of these events covered the full spectrum of space and Earth science research from global climate change to the cosmic origins of life to the exploration of the Moon and Mars to the scientific research required to support human spaceflight The prevailing messages throughout the seminar series as demonstrated by the lectures in this book are how much we have accomplished over the past 50 years how profound are our discoveries how much contributions from the space program affect our daily lives and yet how much remains to be done The age of discovery in space and Earth science is just beginning Opportunities abound that will forever alter our destiny

Science and Technology in World History, Volume 4 David Deming,2016-04-13 The history of science is a story of human discovery intertwined with religion philosophy economics and technology The fourth in a series this book covers the beginnings of the modern world when 16th century Europeans began to realize that their scientific achievements surpassed those of the Greeks and Romans Western Civilization organized itself around the idea that human technological and moral progress was achievable and desirable Science emerged in 17th century Europe as scholars subordinated reason to

empiricism Inspired by the example of physics men like Robert Boyle began the process of changing alchemy into the exact science of chemistry During the 18th century European society became more secular and tolerant Philosophers and economists developed many of the ideas underpinning modern social theories and economic policies As the Industrial Revolution fundamentally transformed the world by increasing productivity people became more affluent better educated and urbanized and the world entered an era of unprecedented prosperity and progress

A Frozen Field of Dreams, Science, Strategy, and the Antarctic in Norway, Sweden, and the British Empire, 1912-1952 Peder William Chellew

Roberts,2010 The dissertation examines how actors in Norway Sweden and the British Empire conceived the Antarctic as a space for science during the years 1912 to 1952 Instead of tracing a narrative of enlightenment how science became the dominant form of activity in the Antarctic I examine a series of episodes with particular attention to why particular kinds of science held sway within specific political cultural and economic contexts Concerned more with how Antarctic science was planned and justified than how it was executed in the field the project draws upon recent scholarship in geography and geopolitics as well as the history of exploration The six case studies involve an aborted Anglo Swedish Antarctic expedition in 1912 Britain s interwar Antarctic whaling research program debates among whaling magnates and their associates over the relationship between Antarctic science and whaling in interwar Norway the culture of polar exploration that emerged at Cambridge and to some extent Oxford between the world wars the approach to polar exploration and quantitative glaciology pioneered by the Swedish geographer Hans Ahlmann and the complicated history of the Norwegian British Swedish Antarctic Expedition 1949 52 I conclude with an epilogue arguing that the rise of international science in the Antarctic during the 1950s reflected the geopolitical dynamics of the Cold War rather than the triumph of science over politics

Popular Science Monthly ,1913 *The Popular Science Monthly* ,1889 *Antarctica Ancient Mysteries* Learn

Alchemical,2025-10-03 At the edge of the world lies a continent of silence vast frozen and shrouded in secrecy Antarctica and the Ancient Mysteries takes you on a journey into the heart of Earth s last blank spot where science myth and speculation collide From the earliest visions of Terra Australis Incognita to the haunting accuracy of maps like Piri Reis and Oronteus Finaeus Antarctica has long existed in the human imagination before explorers ever set eyes on its icy coasts Beneath its two mile thick glaciers lie hidden mountains canyons deeper than the Grand Canyon and lakes sealed away for millions of years landscapes we have only glimpsed through radar and seismic echoes Could these icy depths also conceal the ruins of civilizations long forgotten Or even the lost realms of legend Atlantis Hyperborea or the domains of the Watchers spoken of in ancient texts Blending cutting edge discoveries with age old enigmas this book explores the myths of southern giants the strange anomalies of forbidden maps the mysteries of Operation Highjump and Antarctica s role in conspiracy science fiction and esoteric lore Along the way it examines how every age has projected its fears and hopes onto the frozen south from Renaissance cartographers sketching utopias to Lovecraft s alien horrors to modern whispers of UFOs and hidden bases

More than history more than speculation Antarctica and the Ancient Mysteries is an exploration of humanity's deepest question what remains unknown in a world we think we have mapped The answers frozen beneath the ice may yet change our understanding of the past and our vision of the future The Nay Science Vishwa Adluri, Joydeep Bagchee, 2014-06-03

The Nay Science offers a new perspective on the problem of scientific method in the human sciences Taking German Indological scholarship on the Mahabharata and the Bhagavadgita as their example Adluri and Bagchee develop a critique of the modern valorization of method over truth in the humanities The authors show how from its origins in eighteenth century Neo Protestantism onwards the critical method was used as a way of making theological claims against rival philosophical and or religious traditions Via discussions of German Romanticism the pantheism controversy scientific positivism and empiricism they show how theological concerns dominated German scholarship on the Indian texts Indology functions as a test case for wider concerns the rise of historicism the displacement of philosophical concerns from thinking and the belief in the ability of a technical method to produce truth Based on the historical evidence of the first part of the book Adluri and Bagchee make a case in the second part for going beyond both the critical pretensions of modern academic scholarship and the objections of its post structuralist or post Orientalist critics By contrasting German Indology with Plato's concern for virtue and Gandhi's focus on praxis the authors argue for a conception of the humanities as a dialogue between the ancients and moderns and between eastern and western cultures
