Taylor,2013-06-29 This Second Edition of Family Medicine Principles and Practice presents a scientific approach to health and illness in the context of mankind's most enduring societal unit the family This is a new book building on the strengths of the First Edition The emphasis of this book like that of the specialty itself is on the clinical delivery of health care that is how the practitioner manages common problems and recognizes uncommon entities encountered in office hospital home and nursing home In the First Edition we were faced with the problem of how to organize a family medicine textbook that dealt with clinical topics yet represented more than a series of essays on the specialties for the generalist reader We began by identifying specific objectives outlined in the preface to the First Edition From this evolved an approach which has been called the biopsychosocial perspective inclusion of behavioral family social and cultural aspects of health care integrated with the traditional manifestations and management textbook model The First Edition also introduced a comprehensive classification of clinical problems in family medicine now used in curriculum planning in many family practice residency programs      *Methodology for the Observation of Hidden Behaviours in Addiction* Casimiro Balsa,Cláudia Urbano,Clara Vital,2023-09-28 This book tackles the paradox that is the observation of hidden behaviours Concerning the use of substances such as alcohol and other drugs which are prohibited condemned or censored by various instruments of control legal medical moral these behaviours tend to be kept secret from significant others Under what conditions could they be revealed to an unknown inquirer The book discusses these conditions and the ways and their limits to ensure the validity and the reliability of the data collected and to analyse and interpret them It serves as an instrument of reflection for researchers and a source of support for decision makers faced with researching and intervening in harmful drug use      **A Bibliography of Drug Abuse, Including Alcohol and Tobacco** Theodora Andrews,1977 725 English language books pamphlets periodicals bibliographies indexes and abstracts published mostly
