scholarly debate for much of the past century and a half religion is being recognized once again as an area of concern for scholars politicians and public policy makers and thus the role of religious and spiritual education has taken on a new importance Apart from its socio political ramifications the place of religiousness and spirituality in the make up of individuals has been given renewed prominence through updated brain science and neuroscientists regularly refer to elements of this brain science in terms such as spiritual intelligence and even mystical consciousness This book explores many of the new directions being taken in the field of religious and spiritual education as new developments challenge the priorities of formal education and open up new avenues for incorporating religion and spirituality into the modern curriculum It asks whether the educational aims of teachers should be focused on specifically personal development or whether religious education should be used to develop understanding of more global and social issues such as citizenship conflict and ethics The book also addresses neuroscientific insights which suggest a need to engage with cognition and emotion in order to create a rich learning environment something to which a particularly contested subject area like religion and spirituality is well placed to contribute This book was originally published as a special issue of the Journal of Beliefs Values *Proceedings of the 3rd International Conference on Christian and Inter-Religious Studies (ICC-IRS 2024)* Desi Natalia, Maria Veronica, Deri Susanto, 2025-07-16 This is an open access book Third International Conference on Christian and Inter Religious Studies ICC IRS 2024 will be held in Palangka Raya from June 20 22 2024 This prestigious event is organized by the Institut Agama Kristen Negeri IAKN Palangka Raya as part of an ongoing effort to facilitate academic discussions on critical issues in the digital era With the theme Religion Education and Culture in the Digital Age this conference will serve as a forum for scholars researchers and practitioners from various backgrounds to discuss and share insights in the fields of religion and education The topics to be covered include a wide range of disciplines including Education Theology Psychology and Counseling Sociology and Philosophy of Religion Religious Moderation as well as Music and Arts To enrich the discussions the conference will feature distinguished academics from both domestic and international institutions as keynote speakers With great enthusiasm the committee has received over 200 participants from various institutions and of these approximately 125 manuscripts have been approved for presentation From these presentations around 75 full papers will be selected for publication It is hoped that this conference will not only contribute significantly to the advancement of knowledge in the field of religion but also strengthen academic networks among the participants fostering further collaboration in the future

Philip Barnes, 2019-12-05 Crisis Controversy and the Future of Religious Education sets out to provide a much needed critical examination of recent writings that consider and respond to the crisis in religious education and more widely to a crisis in

non confessional forms of religious education wherever practised The book is critical wide ranging and provocative giving attention to a range of responses some limited to the particular situation of religious education in England and some of wider application for example that of the role and significance of human rights and that of the relevance of religious studies and theology to religious education It engages with a variety of positions and with recent influential reports that make recommendations on the future direction of religious education Constructively it defends both confessional and non confessional religious education and endorses the existing right of parental withdrawal Controversially it concludes that the case for including non religious worldviews in religious education and for the introduction of a statutory objective national religious education curriculum for all schools are both unconvincing on educational philosophical and evidential grounds Timely and captivating this book is a must read for religious and theological educators RE advisers classroom teachers student teachers and those interested in the field of religious education
