The Family in Crisis Or in Transition Andrew M. Greeley, 1979 *Stress and the Family: Coping with normative transitions* Hamilton I. McCubbin, Charles R. Figley, 1983 **Family Transitions** Celia Jaes Falicov, 1991-07-01 Of all concepts used by family therapists the family development framework is among the least studied in spite of its relevance to understanding spontaneous family change and to facilitating therapeutic intervention The notion that a developmental difficulty underlies the appearance of clinical symptoms has become a time honored tradition in family therapy just as it has been in individual therapy Yet unlike the well established and well researched models of child and adult development those in family development are rudimentary Despite increasing interest in the family life cycle as a framework for family therapy relatively little has been done to elucidate the specific dimensions and processes of spontaneous and therapeutically induced change over the family life cycle This volume gathers original contributions of some of the most prominent family theorists researchers and clinicians of our time to improve our understanding of these important and hitherto neglected domains The book opens with a comprehensive overview by the editor that outlines contributions to the family life cycle framework from family sociology and crisis theory This is followed by a comparative analysis of developmental thinking explicit or implicit in the theory and interventions of the major family therapy approaches Then divided into four parts FAMILY TRANSITIONS introduces new conceptual models that integrate the temporality of the life cycle approach with systems theory By their very nature these models cut across therapeutic orientations and have important clinical applications In Part II family therapy s views of development are freed from the confines of the therapist s office and placed in the context of other disciplines Chapters provide analysis of changing or static sociocultural values that can affect conceptions of development potential misuse of the concept of cultural identity in health mental health and education how family identity operates as a vehicle for cultural transmission over generations and family therapists assumptions about women s development The role of expected and unexpected events in the family life cycle is the focus of Part III Chapters on clinical approaches geared to dislocations of life cycle occurrences due to unexpected crises chronic illnesses loss or drug abuse provide illustrations of interventions that utilize enhance or potentially detract from the family s developmental flow Part IV explores the articulation of the life cycle framework within four major family therapy orientations intergenerational structural systemic and symbolic experiential Each of these chapters endeavors to elucidate what is the place of family development in each orientation concepts of continuity and change use of the concept of stages transitions or developmental tasks the specific dimensions that change in most families over time and the links between family dysfunction and life cycle issues Finally each chapter illustrates through clinical example assessment strategies formulation of treatment goals and interventions as these emerge from a particular life cycle model FAMILY TRANSITIONS presents a significant advance in our understanding of functional and dysfunctional family development and offers a range of interventions to promote developmental change It is an invaluable resource for
