Situated Language and Learning James Paul Gee,2012-10-02 Why do poor and minority students under perform in school Do computer games help or hinder learning What can new research in psychology teach our educational policy makers In this major new book Gee tackles the big ideas about language literacy and learning putting forward an integrated theory that crosses disciplinary boundaries and applying it to some of the very real problems that face educationalists today *Situated Language and Learning* looks at the specialist academic varieties of language that are used in disciplines such as mathematics and the sciences It argues that the language acquisition process needed to learn these forms of language is not

given enough attention by schools and that this places unfair demands on poor and minority students The book compares this with learning as a process outside the classroom applying this idea to computer and video games and exploring the particular processes of learning which take place as a child interacts with others and technology to learn and play In doing so Gee examines what video games can teach us about how to improve learning in schools and engages with current debates on subjects such as communities of practice and digital literacies Bringing together the latest research from a number of disciplines *Situated Language and Learning* is a bold and controversial book by a leading figure in the field and is essential reading for anyone interested in education and language The Practical Critical Educator Karyn Cooper, Robert E.

White, 2006-06-10 I am delighted to have the opportunity to write this foreword for Karyn Cooper's and Robert White's splendid and compelling edited text on *The Practical Critical Educator* Critical practice in education is grounded in two bodies of thought and action critical theory and critical pedagogy Drawing on classical Marxism and its articulation of how oppression and injustice arose through capitalism's economic exploitation of labour critical theories of society took a cultural turn in the writings of Adorno and Horkheimer European Jewish refugees who fled to America where they articulated how the power relations and oppressive forces of capitalism expressed themselves in the alienating symbolic forces of culture music and art When booming demographics and an economic surplus fuelled the student movement of the late 60s and in to the 70s in many Western nations new forms of cultural Marxism were added to this body of critical theory extending beside but also far beyond the classical Marxist preoccupations with economic equalities of social class British writers such as the articulate and elegant cultural Marxist Raymond Williams revived and refined the lost work of Italian Marxist Antonio Gramsci from the 1920s and his concern with the influence of what he called hegemony the force through which ruling classes could maintain existing structures of domination by defining through language media and culture what was normal natural true beautiful and defensible and what was eccentric unreasonable or unworthy of serious consideration
