## **The Feud Of Language A History Of Structuralist Thought:**

*The Feud of Language* Thomas G. Pavel, 1992-01      **The Feud of Language** Thomas G. Pavel, 1989-01-01      **The Seduction of Unreason** Richard Wolin, 2019-04-30 Ever since the shocking revelations of the fascist ties of Martin Heidegger and Paul de Man postmodernism has been haunted by the specter of a compromised past In this intellectual genealogy of the postmodern spirit Richard Wolin shows that postmodernism's infatuation with fascism has been extensive and widespread He questions postmodernism's claim to have inherited the mantle of the Left suggesting instead that it has long been enamored with the opposite end of the political spectrum Wolin reveals how during in the 1930s C G Jung Hans Georg Gadamer Georges Bataille and Maurice Blanchot were seduced by fascism's promise of political regeneration and how this misapprehension affected the intellectual core of their work The result is a compelling and unsettling reinterpretation of the history of modern thought In a new preface Wolin revisits this illiberal intellectual lineage in light of the contemporary resurgence of political authoritarianism      **Universal Grammar and Narrative Form** David Herman, 1995 In a major rethinking of the functions methods and aims of narrative poetics David Herman exposes important links between modernist and postmodernist literary experimentation and contemporary language theory Ultimately a search for new tools for narrative theory his work clarifies complex connections between science and art theory and culture and philosophical analysis and narrative discourse Following an extensive historical overview of theories about universal grammar Herman examines Joyce's *Ulysses* Kafka's *The Trial* and Woolf's *Between the Acts* as case studies of modernist literary narratives that encode grammatical principles which were re-fashioned in logic linguistics and philosophy during the same period Herman then uses the interpretation of universal grammar developed via these modernist texts to explore later twentieth century cultural phenomena The problem of citation in the discourses of postmodernism for example is discussed with reference to syntactic theory An analysis of Peter Greenaway's *The Cook The Thief His Wife and Her Lover* raises the question of cinematic meaning and draws on semantic theory In each case Herman shows how postmodern narratives encode ideas at work in current theories about the nature and function of language Outlining new directions for the study of language in literature *Universal Grammar and Narrative Form* provides a wealth of information about key literary linguistic and philosophical trends in the twentieth century      **Shakespeare's Tragedies and Modern Critical Theory** James Cunningham, 1997 Individual chapters deal with cultural materialism new historicism poststructuralism and feminist criticism The theoretical basis of each critical mode is examined and some representative critiques analyzed Most importantly in each chapter the various interpretations are tested against Shakespeare's texts and the strengths and weaknesses of the different readings are assessed      **Mimesis and the Human Animal** Robert Storey, 1996-12-16 In *Mimesis and the Human Animal* Robert Storey argues that human culture derives from human biology and that literary representation therefore must have a biological basis As he ponders the question What does it mean to say that art imitates life he must consider both What is life

and What is art A unique approach to the subject of mimesis Storey s book goes beyond the politicizing of literature grounded in literary theory to develop a scientific basis for the creation of literature and art      **The Bloomsbury**

**Handbook of Saussure** John E. Joseph,2025-07-10 For linguistics Ferdinand de Saussure is the defining figure of its modern period For semiotics too he is the founding figure within Europe alongside Peirce in America Yet Saussure s influence reaches far beyond linguistics and semiotics through the structuralism which his teaching inspired in the decades following his death and even the post structuralism which followed it With chapters written by leading scholars from across the world this detailed and comprehensive volume charts the significance of Saussure s work across the wide range of fields in which it had an impact providing a thorough understanding and the definitive guide to his ideas and legacy Divided into four parts the book first explores Saussure s life and career including his published and unpublished work Part Two is devoted to the Course in General Linguistics which is dissected across five chapters to offer a highly detailed account of the most important book within modern linguistics Part Three traces the Course and its leading ideas across the ensuing decades as Saussure became the acknowledged founding figure not just of modern linguistics and semiotics but of a structuralism which was not limited by academic field Lastly Part Four highlights key themes and topics for close attention offering an even greater depth of insight into the life work and reception of Saussure      **Critical and Cultural Theory** Dani Cavallaro,2001-01-01 This

radical new book brings together the key concepts issues and debates in critical and cultural theory today Each chapter presents a self contained analysis of each concept as well providing a range of discussion questions and further reading Throughout text links connect related material across chapters enabling the reader to pursue their own line of disciplinary or cross disciplinary inquiry      **Literary Culture in a World Transformed** William Paulson,2018-08-06 Literary studies are

in danger of being left behind in the twenty first century Print culture risks becoming a thing of the past in the multimedia age meanwhile human life and society are undergoing rapid changes as a result of new technologies the intensification of global capitalism and the effects of human actions on the environment In this transformed world William Paulson argues for a radical renewal of literary studies Modern literary culture has defined itself in opposition to science politics and commerce as a protected sphere of democratic and free inquiry but today that autonomy may lead to isolation from the real dynamics of cultural and global change Paulson clearly and convincingly demonstrates the need for literary studies to embrace both the unfashionable literary past and the technologically saturated future and to train not a countersociety of cultural critics but citizens of the world who can communicate the irreducible strangeness and multiplicity of literature to a society on hyperdrive His series of concrete proposals ranging from a closer connection between literature and everyday language to the restructuring of undergraduate and graduate education will immeasurably enrich current discussions of the humanities role in the life of the world      Jacques Derrida (Routledge Revivals) William Schultz,Lewis L.B. Fried,2016-06-17 First

published in 1992 this book represents the first major attempt to compile a bibliography of Derrida s work and scholarship

about his work It attempts to be comprehensive rather than selective listing primary and secondary works from the year of Derrida s Master s thesis in 1954 up until 1991 and is extensively annotated It arranges under article type a huge number of works from scholars across numerous fields reflecting the interdisciplinary and controversial nature of Deconstruction The substantial introduction and annotations also make this bibliography in part a critical guide and as such will make a highly useful reference tool for those studying his philosophy

**Toward A Psychology of Persons** William E. Smythe,2013-05-13 This closely integrated collection of essays constitutes a wide ranging and comprehensive attempt to understand persons within psychology a long lost enterprise The volume was inspired by the observation that contemporary psychology has become increasingly depersonalized in its conceptions and its methodology and has thereby lost touch with its traditional subject matter of human individuality and the nature of persons This development now threatens the integrity of psychology as a discipline Using both a critical and constructive approach the various contributors share two common objectives to explore the roots of depersonalization in modern psychology through systematic criticism of contemporary functionalist and neo functionalist approaches to articulate some alternative holistic interpretive and historical approaches to the psychology of persons Despite these common objectives the chapters reflect a wide variety of theoretical perspectives and approaches including cognitive science and neuroscience discursive psychology hermeneutics social constructionism semiotics rhetorical analysis and psychological aesthetics These essays do not converge on a unified psychology of persons but they do serve to reopen a form of discourse that has long been absent from mainstream psychology This volume emerged from the deliberations of the Western Canadian Theoretical Psychologists WCTP a group of scholars primarily from Western Canadian universities with shared interests in the history and theory of psychology From its founding in 1989 to the present the WCTP has been actively engaged in promoting and contributing to the development of theoretical psychology Over the past half dozen years scholars have greatly benefitted from the close collaboration and collegial support that participation in the WCTP makes possible The annual meetings provide an opportunity for them to catch up on each other s work and also to pool their expertise to work on topics of shared interest

**Story Logic** David Herman,2004-01-01 Featuring a major synthesis and critique of interdisciplinary narrative theory Story Logic marks a watershed moment in the study of narrative David Herman argues that narrative is simultaneously a cognitive style a discourse genre and a resource for writing Because stories are strategies that help humans make sense of their world narratives not only have a logic but also are a logic in their own right providing an irreplaceable resource for structuring and comprehending experience Story Logic brings together and pointedly examines key concepts of narrative in literary criticism linguistics and cognitive science supplementing them with a battery of additional concepts that enable many different kinds of narratives to be analyzed and understood By thoroughly tracing and synthesizing the development of different strands of narrative theory and provocatively critiquing what narratives are and how they work Story Logic provides a powerful interpretive tool kit that broadens the applicability of

narrative theory to more complex forms of stories however and wherever they appear Story Logic offers a fresh and incisive way to appreciate more fully the power and significance of narratives      *From Revolution to Ethics, Second Edition* Julian Bourg, 2017-11-28 Winner CHOICE Outstanding Academic Book Award CHOICE Magazine 2008 Winner Morris D Forkosch Prize for the best book in intellectual history Journal of the History of Ideas 2008 The French revolts of May 1968 the largest general strike in twentieth century Europe were among the most famous and colourful episodes of the twentieth century Julian Bourg argues that during the subsequent decade the revolts led to a remarkable paradigm shift in French thought the concern for revolution in the 1960s was transformed into a fascination with ethics Challenging the prevalent view that the 1960s did not have any lasting effect *From Revolution to Ethics* shows how intellectuals and activists turned to ethics as the touchstone for understanding interpersonal institutional and political dilemmas In absorbing and scrupulously researched detail Bourg explores the developing ethical fascination as it emerged among student Maoists courting terrorism anti psychiatric celebrations of madness feminists mobilizing against rape and pundits and philosophers championing humanitarianism *From Revolution to Ethics* provides a compelling picture of how May 1968 helped make ethics a compass for navigating contemporary global concerns In a new preface for the second edition published to mark the fiftieth anniversary of the events Bourg assesses the worldwide influence of the ethical turn from human rights to the return of religion and the new populism      *Cultural Semiosis* Hugh J. Silverman, 2014-04-23 *Cultural Semiosis* traces the theoretical itinerary of the signifier in the continental tradition Cultural semiosis provides links for cultural studies to the philosophical the literary the historical and the social Understood semiotically cultural signs and signifiers are inscribed in the fabric of cultural practices Cultural semiosis enters the spaces of everyday language visibility sexuality and symbolization These original essays interpret and provide tools for the understanding of cultural studies within a philosophical framework Contributors M Alison Arnett Debra Bergoffen Peter Carravetta Alessandro Carrera Julia Kristeva John Llewelyn Michael Naas Kelly Oliver Adi Ophir Francois Raffoul Mark Roberts Stephanie Sage Hugh J Silverman      *Transnationalism and Translation in Modern Chinese, English, French and Japanese Literatures* Ryan Johnson, 2020-12-15 The theory of literary worlds has become increasingly important in comparative and world literatures But how are the often contradictory elements of Eastern and Western literatures to cohere in the new worlds such contact creates Drawing on the latest work in philosophical logic and analytic Asian philosophy this monograph proposes a new model of literary worlds that is best suited to comparative literature dealing with Western and East Asian traditions Unlike much discussion of world literature anchored in North American traditions featured here is the transnational work of artists philosophers and poets writing in English French Japanese and Mandarin in the twentieth century Rather than imposing sharp borders this book suggests that vague boundaries link Eastern and Western literary works and traditions and that degrees of distance can better help us to see the multiple dimensions that both distinguish and join together literary worlds East and West As such it enables us to grasp not

only how East Asian and Western writers translate one another's works into their own languages and traditions but also how modern writers East and West modify their own traditions in order to make them fit in the new constellation of literary worlds brought about by the complex flow of literary information across twentieth century Eurasia     A New Science Of Representation Harry Redner, 2019-04-03 This book deals with representation in science politics and art both in its historical dimensions and in its contemporary expression It aims to reveal the current trends of culture and guide these towards the goal of a future culture for the coming global technological civilization     *We Have Never Been Modern* Bruno Latour, 2012-10-01 With the rise of science we moderns believe the world changed irrevocably separating us forever from our primitive premodern ancestors But if we were to let go of this fond conviction Bruno Latour asks what would the world look like His book an anthropology of science shows us how much of modernity is actually a matter of faith     **What Is Narratology?** Tom Kindt, Hans-Harald Müller, 2008-08-22 What Is Narratology sees itself as contributing to the intensive international discussion and controversy on the structure and function of narrative theory The 14 papers in the volume advance proposals for determining the object of narratology modelling its concepts and characterising its status within cultural studies     **French Discourse Analysis** Glyn Williams, 2014-04-04 For the first time in English Glyn Williams draws together current debates in linguistics and social theory and provides the first study in English of the principles and theories of French discourse analysis     **New Idols of the Cave** Christopher Norris, 1997 This book offers a broad based critical survey of recent anti realist arguments in the philosophy of science cultural theory hermeneutics the sociology of knowledge and the interpretation of quantum mechanics
