British Warships in the Age of Sail, 1603-1714 Rif Winfield, 2010-03-10 The 1st volume in this comprehensive reference series details the design and employment of British warships in the 17th and early 18th centuries During the seventeenth century Britain transformed from a minor state into a global economic power with the largest navy in the world The character of this navy was forged by a bloody civil war three fiercely disputed conflicts with the Dutch and the first of many wars with the French In the process British naval ships evolved from the galleons that had defeated the Spanish Armada to prestige vessels like HMS Sovereign of the Seas and the lightly built frigates of the Commonwealth era This detailed and authoritative reference volume outlines the history of every ship built purchased or captured that saw naval service during this era Like its companion volumes the book is organized by Rate classification and class The technical and building data of each ship is followed by a concise summary of its career With its unique depth of information this is a work of the utmost importance to every naval historian and general reader interested in the navy of the sailing era

British Warships in the Age of Sail, 1714-1792 Rif Winfield, 2007-12-12 The 2nd volume in this comprehensive naval history details the design and employment of British warships through the 18th century The Hanoverian dynasty that came to power with the accession of George I in 1714 inherited the largest navy in the world In the course of the century this force would see a vast amount of action against nearly every major navy reaching a pinnacle of success in the Seven Years War only to taste defeat in the American Revolution This superb reference book outlines the service history of every ship that fought for the Royal Navy in the great wars of the eighteenth century well over 2000 vessels The book is organized by Rate classification and class The technical and building data of each ship is followed by a concise summary of its career This includes commissioning dates refit periods changes of captain the stations where they served and details of any noteworthy actions in which they took part It will enable anyone to follow up a casual reference to any warship and will provide the researcher with a solid core of information on

which to base further study With its unique depth of information this is a work of the utmost importance to every naval historian and general reader interested in the navy of the sailing era *British Warships in the Age of Sail, 1817-1863* Rif Winfield, 2014-04-30 The publication of this book sees the completion of a monumental work listing the technical details and career histories of every significant British warship between 1603 and 1863 Following three earlier volumes this one carries forward the story from the post Napoleonic War reorganisation of the Royal Navy's rating system to the end of sail as the principal mode of propulsion Although apparently well documented this is a period of great complexity in the procurement and naval architecture of ships The introduction of steam radically altered the design of vessels under construction and was later retro fitted to others while many names lived a ghostly existence on the Navy List ships ordered but not started and in some cases having their intended draughts altered more than once before being cancelled entirely This book meticulously sorts out and clarifies these confusions a major contribution in itself but for the first time it also provides outline service histories for an era that is largely neglected Like its companion volumes the book is organised by Rate classification and class with significant technical and building data followed by a concise summary of the careers of each ship in every class With its unique depth of information this is a work of the utmost importance to every naval historian and general reader interested in the navy of the sailing era and the formative years of the steam navy that supplanted it **English/British Naval History to 1815**

British Battleships 1914-18 (2) Angus Konstam, 2013-12-20 In 1906 the Germans began building their own dreadnought fleet armed with larger guns word of which soon reached the British Admiralty This raised the spectre that the British dreadnought fleet would be outgunned and prompted the Admiralty to order the building of their own super dreadnoughts The first of these new dreadnoughts were laid down in 1909 and entered service three years later The British public supported this programme and the slogan we want eight and cannot wait became popular a reference to the building of eight of these super dreadnoughts Four more super dreadnoughts entered service in 1914 By then the Admiralty had developed a new programme of fast battleships armed with 15 inch guns These powerful warships entered service in time to play a part in the battle of Jutland in 1916 World War I broke out before the Royal Navy had fully evaluated these new warships and so

lessons had to be learned through experience often the hard way Although none of these super dreadnoughts were lost in battle their performance at the battle of Jutland led to a re evaluation of the way they were operated Still for four years they denied control of the sea to the enemy and so played a major part in the final collapse of Imperial Germany **Routledge Library Editions: America: Revolution and Civil War** Various Authors,2021-08-26 The volumes in this set originally published between 1967 and 2011 available as ebooks for the first time include succinct accessible books on two of the most important periods of American history which offer concise treatment of these major historical topics as well as some lengthier finest single volume studies of the American Civil and Revolutionary Wars ever written and an outstanding reference tool in a 2 volume Encyclopedia Among other things they Bring central themes and problems into sharper focus Discuss the pivotal roles played by Benjamin Franklin and Abraham Lincoln Examine the role of medical doctors in the northern campaigns during the revolutionary war Elucidate the character of the underlying moral and political problem of slavery Discuss the social and political experience of the civil war whilst examining the centrality of what happened on the battlefield Evaluate the legacy of the Civil War for America and for the world and emphasize its relationship to many of the dominating themes of modern history democracy freedom equality and nationalism **The Seaforth Bibliography** Eugene Rasor,2009-04-17 This remarkable work is a comprehensive historiographical and bibliographical survey of the most important scholarly and printed materials about the naval and maritime history of England and Great Britain from the earliest times to 1815 More than 4 000 popular standard and official histories important articles in journals and periodicals anthologies conference symposium and seminar papers guides documents and doctoral theses are covered so that the emphasis is the broadest possible But the work is far far more than a listing The works are all evaluated assessed and analysed and then integrated into an historical narrative that makes the book a hugely useful reference work for student scholar and enthusiast alike It is divided into twenty one chapters which cover resource centres significant naval writers pre eminent and general histories the chronological periods from Julius Caesar through the Vikings Tudors and Stuarts to Nelson and Bligh major naval personalities warships piracy strategy and tactics exploration discovery and navigation archaeology and even naval fiction Quite simply no one with an interest and enthusiasm for naval history can afford to be without this book at their side **Bibliography of Nautical Books** Alan Obin,2000-02 This is the 15th annual edition of the Bibliography of Nautical Books a reference guide to over 14 000 nautical publications It deals specifically with the year 2000

The Tudor Navy Arthur Nelson,2001 A detailed synthesis of information relating to the English navy during the Tudor period an era that actually began in 1483 and continued through to the start of the 17th century This study examines not only the technical aspects of naval history but also the manner in which the navy worked Papers and Proceedings United States Naval Institute,1985-07 **Anti-Submarine Warfare** David Owen,2007-11-15 A deep dive into the tactics and technology used to defend against submarines from the opening of the First World War through World War II and beyond

The submarine was undoubtedly the most potent purely naval weapon of the twentieth century In two world wars enemy underwater campaigns were very nearly successful in thwarting Allied hopes of victory indeed annihilation of Japanese shipping by US Navy submarines is an indicator of what might have been That the submarine was usually defeated is a hugely important story in naval history yet this is the first book to treat the subject as a whole in a readable and accessible manner It concerns individual heroism and devotion to duty but also ingenuity technical advances and originality of tactical thought What developed was an endless battle between forces above and below the surface where a successful innovation by one side eventually produces a countermeasure by the other in a lethal struggle for supremacy Development was not a straight line wrong ideas and assumptions led to defeat and disaster Iconography with dozens of photographs and often large format diagrams a vast bibliography and a complete and documented general approach make this volume a work of great quality and of great interest for all enthusiasts and scholars of this very interesting subject *Storia Militare* The modeller will not only find the text engaging but there is a superb collection of photographs and illustrations which of course include submarines corvettes and destroyers Subjects which the modeller increasingly appreciates Highly recommended *Model Boats* [xxxxxxxxxxxxxxxxxxxx](#) [xxxx](#),2009-06-01 **Historic Warships** J. Michael Jones,1993 Over 140 warships from 125 countries preserved as museums or memorials are detailed here Arranged by country each entry provides type and class when appropriate tonnage armament propulsion speed fuel capacity crew date launched and other relevant statistics based on the ship's era The current location telephone number the method of display and the access to the ship are also given
