The First And The Last The German Fighter In World War II:

The First and the Last Adolf Galland,1953 The Me 262 Stormbird Colin Heaton,Anne-Marie Lewis,2012-05-15 The Me 262 was the first of its kind the first jet powered aircraft Although conceived before the war with the initial plans being drawn in April 1939 the Stormbird was beset with technological particularly the revolutionary engines and political difficulties resulting in it not entering combat until August 1944 with claims of nineteen downed Allied aircraft The performance of the Me 262 so far exceeded that of Allied aircraft that on 1 September 1944 USAAF General Carl Spaatz remarked that if greater numbers of German jets appeared they could inflict losses heavy enough to force cancellation of the Allied daylight bombing offensive The story of how the Stormbird came to be is fascinating history and it comes to life in the hands of noted historian Colin Heaton Told largely in the words of the German aces who flew it The Me 262 Stormbird provides the complete history of this remarkable airplane from the drawing boards to combat in the skies over the Third Reich Features two forewords one by Jorg Czypionka Me 262 night fighter pilot and another by historian and author Barrett Tillman *Advance and Destroy* John Nelson Rickard,2011-10-28 In the winter of 1944 1945 Hitler sought to divide Allied forces in the heavily forested Ardennes region of Luxembourg and Belgium He deployed more than 400 000 troops in one of the last major German offensives of the war which became known as the Battle of the Bulge in a desperate attempt to regain the strategic initiative in the West Hitler s effort failed for a variety of reasons but many historians assert that Lieutenant General George S Patton Jr s Third Army was ultimately responsible for securing Allied victory Although Patton has assumed a larger than life reputation for his leadership in the years since World War II scholars have paid little attention to his generalship in the Ardennes following the relief of Bastogne In *Advance and Destroy* Captain John Nelson Rickard explores the commander s operational performance during the entire Ardennes campaign through his estimate of the situation the U S Army s doctrinal approach to problem solving Patton s day by day situational understanding of the Battle of the Bulge as revealed through ULTRA intelligence and the influence of the other Allied generals on his decision making gives readers an in depth critical analysis of Patton s overall effectiveness measured in terms of mission accomplishment his ability to gain and hold ground and a cost benefit analysis of his operations relative to the lives of his soldiers The work not only debunks myths about one of America s most controversial generals but provides new insights into his renowned military skill and colorful personality **Strategic Bombing by the United States in World War II** Stewart Halsey Ross,2015-10-03 The United States relied heavily on bombing to defeat the Germans and the Japanese in World War II and air raids were touted as precision bombing in American propaganda But was precision possible over cloud covered Europe or a darkened Japanese countryside Could the vaunted Norden optical bombsight in fact drop bombs into pickle barrels as advertised Were the American aircrews well trained and well protected How good were their airplanes What were the results of the costly raids This work sets suppositions against facts surrounding the United States use of strategic bombing in World War II Chapters

cover the events leading up to World War II the start of the war the seers and the planners the airplanes bombs bombsights and aircrews the planes Germany used to defend itself against American planes the five cities Hamburg Dresden Tokyo Hiroshima and Nagasaki that experienced the most destruction and the U S Strategic Bombing Survey of the damage done by aerial bombing The book also probes the government s myth building statements that supported America s view of itself as a uniquely humanitarian nation and analyzes the role played by interservice rivalry battleship admirals against bomber generals *Operation Chowhound* Stephen Dando-Collins,2015-02-24 The true story of a little known yet remarkable World War II operation which had all the hallmarks of a suicide mission Beginning with a crazy plan hatched by a suspect prince and an even crazier reliance on the word of the Nazis Operation Chowhound was devised Between May 1 and May 8 1945 2 268 military units flown by the USAAF dropped food to 3 5 million starving Dutch civilians in German occupied Holland It took raw courage to fly on Operation Chowhound as American aircrews never knew when the German AAA might open fire on them or if Luftwaffe fighters might jump them Flying at 400 feet barely above the tree tops with guns pointed directly at them they would have no chance to bail out if their B 17s were hit and yet over eight days 120 000 German troops kept their word and never fired on the American bombers As they flew grateful Dutch civilians spelled out Thanks Boys in the tulip fields below Many Americans who flew in Operation Chowhound would claim it was the best thing they did in the war In this gripping narrative author Stephen Dando Collins takes the reader into the rooms where Operation Chowhound was born into the aircraft flying the mission and onto the ground in the Netherlands with the civilians who so desperately needed help James Bond creator Ian Fleming Hollywood actress Audrey Hepburn as well as Roosevelt Eisenhower and Churchill all play a part in this story creating a compelling narrative read *Air & Space Power Journal* win 03 , **Air University Periodical Index** ,1958 *German Fighters of World War II* Franco Ragni,1979 Det tyske Luftwaffe s jagerfly under 2 verdenskrig
