The Flight Of The Horse:

The Flight of the Horse Larry Niven, 1973 Mind bending stories of Svetz the Time Retrieval expert *The Flight of the Horse* Laurence Van Cott Niven, ***The Mind of the Horse*** Michel-Antoine Leblanc, 2013-11-04 Horses were first domesticated about 6 000 years ago on the vast Eurasian steppe yet only in the last two decades have scientists begun to explore the mental capacities of these animals In *The Mind of the Horse* Michel Antoine Leblanc presents an encyclopedic synthesis of scientific knowledge about equine behavior and cognition providing experts and enthusiasts alike with an up to date understanding of how horses perceive think about and adapt to their physical and social worlds Much of what we think we know about the intelligence of the horse derives from fragmentary reports and anecdotal evidence Putting this accumulated wisdom to the test Leblanc introduces readers to rigorous experimental investigations into how horses make sense of their world under varying conditions He describes the anatomical and neurophysiological characteristics of the horse s brain and compares these features with those of other species to gain an evolutionary perspective A horseman himself Leblanc also considers the opinions of renowned riding masters as well as controversies surrounding the horse s extraordinary mental powers that have stirred in equestrian and scientific circles *The Mind of the Horse* brings together in one volume the current state of equine research and will likely stimulate surprising new discoveries *How Change Happens in Equine-Assisted Interventions* Noreen W. Esposito, Angela K. Fournier, 2023-02-24 *How Change Happens in Equine Assisted Interventions* gives clinicians and researchers an intervention theory on the mechanisms of change during psychotherapy and other interventions that incorporate horses Chapters introduce the concept of intervention theory present a theory of the problem what the client comes with theories explaining the intervention what is done during a session and theories of change what happens in the mind of a client with each theory s function described Using an autoethnographic approach the authors describe deconstruct and analyze personal experiences as clients during an equine assisted intervention Then the authors present and apply a unique intervention theory by linking it to the thoughts and experiences of clients in and after a session Practitioners will come away from this book with a unique perspective on the field and with an increased understanding of what their clients are thinking both in and out of session Researchers will have an explanatory theory from which to draw testable hypotheses when studying interventions incorporating horses *Riding for the Rest of Us* Jessica Jahiel, 2008-04-21 *A Practical Guide for Adult Riders* The Howell Equestrian Library is a distinguished collection of books on all aspects of horsemanship and horsemastership The nearly fifty books in print offer readers in all disciplines and at all levels of competition sound instruction and guidance by some of the most celebrated riders trainers judges and veterinarians in the horse world today Whether your interest is dressage show jumping or Western riding or whether it is breeding grooming or health care Howell has a book to answer your needs Get to know all the books in the Howell Equestrian Library many are modern day classics and have achieved the status of authoritative references in the estimation
