The History Of Ideas A Biographical Introduction:

Aldous Huxley Between East and West C. C. Barfoot, 2001 Although the title of this volume is Aldous Huxley between East and West the order of the articles found within goes from West to East which naturally imitates Huxley's own progress especially since he went to the trouble of stepping out as far West as possible before starting for the East Indeed one could argue that he was already on his way there before he left for California a continuous journey perhaps since from the Californian shores of the Pacific the East is the further West After the Introduction which places Huxley between East and West the book starts with a consideration of Huxley's family connections then goes onto his earliest fictions his interest in science and the issue of modernity and his experiments with drama and their inherent philosophical concerns The poetry with which he began his writing career is then viewed as a link between his earlier Western self and his later Oriental interests suggesting that the latter was always inherent in the former A number of considerations of the Utopian themes in Huxley's middle and later fiction leads the volume to a climax with four articles surveying the foibles and the wisdom of Huxley's encounter with Eastern religious thought and philosophy his misunderstandings as well as ours of what actually he Writing Biography Lloyd E. Ambrosius, 2004-01-01 The had learned and wished to pass on to the Western world historian as biographer must resolve questions that reflect the dual challenge of telling history and telling lives How does the biographer sort out the individual s role within the larger historical context How do biographical studies relate to other forms of history Should historians use different approaches to biography depending on the cultures of their subjects What are the appropriate primary sources and techniques that scholars should use in writing biographies in their respective fields In Writing Biography six prominent historians address these issues and reflect on their varied experiences and divergent perspectives as biographers Shirley A Leckie examines the psychological and personal connections between biographer and subject R Keith Schoppa considers the pervasive effect of culture on the recognition of individuality and the presentation of a life Retha M Warnicke explores past context and modern cultural biases in writing the biographies of Tudor women John Milton Cooper Jr discusses the challenges of writing modern biographies and the interplay of the biographer s own experiences Nell Irvin Painter looks at the process of reconstructing a life when written documents are scant and Robert I Richards investigates the intimate relationship between life experiences and new ideas Despite their broad range of perspectives all six scholars agree on two central points biography and historical analysis are inextricably linked and biographical studies offer an important tool for analyzing historical questions P. Papinius Statius, 2018-07-17 The five books of the Silvae bring together the occasional verses which Statius wrote in addition to his two epics In these short descriptive poems Statius elaborates features taken from various genres into an original whole in which description and eulogy play important roles. The main themes of the poems of his second book are consolation after bereavement and the contrast between nature and culture The present work contains a general introduction a text of Silvae II a bibliography and an index together with a verse by verse commentary on the poems of this second book This is the first commentary on a book of the Silvae since Vollmer's commentary on the whole of the Silvae of 1898 Emphasis is here placed on interpretation and moreover chiefly on the literary and stylistic aspects of the poems which compared with the epic poetry of Statius and his contemporaries have hitherto received relatively little attention **Maurice Dobb** T. A New Edition, Revised Washington Irving, 1855 Liminality and the Philosophy of Presence Franziska Hoppen, 2021-03-16 This book departs from the attempt by political theory to

confront the challenges of political life with new concepts offering instead a mode of thought so far excluded from the canon of political theory the philosophy of presence Making the experience of liminality the very centre of thought it shows how embracing in betweenness allows us to discern the limits of both the political order and contemporary political theory Through an examination of the works of Gustav Landauer Eric Voegelin Simone Weil and V clay Havel the author demonstrates the manner in which in betweenness may be cultivated by way of the philosophy of presence as a method of self enquiry into existence as it is experienced subjectively Arguing that since externalisation is the essence of politics and that the way to a more just society lies inwards through a confrontation with liminality this study of how to read philosophers of presence renders their work intelligible to the contemporary discourse of crisis and will appeal to scholars of social political and anthropological theory and philosophy Introduction To Library Research In German Studies Larry L. Richardson, 2019-03-01 This book introduces Germanists to the mechanics and methodology of modern library research It explains the use of various bibliographic access systems providing step by step search strategies to the most modern computerized data bases for the whole field of German studies The Problem of Tolerance and Social Existence in the Writings of Félicité Lamennais 1809-1831 John J.
