Hokusai 36 Views of Mount Fuji Cristina Berna, Eric Thomsen, 2023-12-20 The beauty of art is necessary for happiness In everyday life the arts give that extra dimension to life that makes it a great adventure The art and design in buildings city planning gardens and parks roads bridges everything that we use daily contributes to a happy and fulfilling life Ugly buildings sloppy design poor quality workmanship littering and defacing contributes to a miserable life Why would you want a miserable life Why would you want to impose a miserable life on others Hokusai was not only a truly great artist He also sent a message to common people who could afford to buy his low cost prints He conveyed the beauty of majesty the mount Fujijama in life He conveyed the beauty of scenery he said to people look around you and see and enjoy the beauty of the scenery He conveyed the beauty of a good human life the craftsmanship in making the timber building the boat fishing growing tea enjoying tea with the scenery The 36 Views of Mt Fuji are religious prints But different from the typical Christian religious motif the humans are not shown focused on the deity all the time even if Mt Fuji is shown to have a pervading influence on their lives The admiration and worship of Mt Fuji is often shown as incidental a single traveler of the group casting a glance at the majestic mountain while the others are busy with the many other things to do In other words a very realistic rendition on how the divine is taking part in everyday life

Color Woodcut International Chazen Museum of Art, 2006 Color woodcut printmaking was not new to Britain America or Japan in the late eighteenth century Yet after Japan was opened to the West in 1854 and deeper cultural exchange began Japanese prints captured the European and American imagination The fresh colors simplicity of materials and departure from traditional compositions entranced western artists and the public alike Likewise Japanese audiences and artists were intrigued by the styles and techniques of western art which was broadly available in Japan by the end of the nineteenth century Artists there created images of the strange foreigners and imagined what American cities looked like By the beginning of the twentieth century artists were not content to merely imagine what the other side of the world looked like As prints traveled around the globe for study so did artists and with them spread the tricks and techniques of color woodblock printmaking as well as appreciation for the prints Woodblock printmakers in the West started to investigate Japanese processes and Japanese publishers began to seriously seek out the print market outside of Japan Important themes began to emerge scenes of nature and old fashioned architecture outnumbered modern city views and images of animals were nearly as popular as those of human figures Imagery was often idyllic and beautiful attractive to an international audience Twentieth century art however moves at a furious pace and the ferment of the international woodcut style quickly ran its course Artists appropriated what they needed from the color woodcut then developed techniques subjects and styles in their own ways An ever expanding range of prints became indebted to the artists of the previous generation who had reinvigorated woodblock printmaking styles and practices around the world This full color catalogue includes many prints from this colorful exhibition and shows how the progression of styles became more similar as international artists learned from and competed with each other then stylistically diverged as artists of each country took what they learned in new directions The three essays each focus on the influences and contributions made to the international style by three countries Japan Britain and America

Picturing the Floating World Julie Nelson Davis, 2021-08-31 Today we think of ukiyo e the pictures of the floating world as masterpieces of Japanese art highly prized throughout the world Yet it is often said that ukiyo e were little appreciated in their own time and were even used as packing material for ceramics In Picturing the Floating World Julie Nelson Davis debunks this myth and demonstrates that ukiyo e was thoroughly appreciated as a field of artistic production worthy of connoisseurship and canonization by its contemporaries Putting these images back into their dynamic context she shows how consumers critics and makers produced and sold appraised and collected and described and recorded ukiyo e She recovers this multilayered world of pictures in which some were made for a commercial market backed by savvy entrepreneurs looking for new ways to make a profit while others were produced for private coteries and high ranking connoisseurs seeking to enrich their cultural capital The book opens with an analysis of period documents to establish the terms of appraisal brought to ukiyo e in late eighteenth century Japan mapping the evolution of the genre from a century earlier and the development of its typologies and the creation of a canon of makers both of which have defined the field ever

since Organized around divisions of major technological and aesthetic developments the book reveals how artistic practice and commercial enterprise were intertwined throughout ukiyo e s history from its earliest imagery through the twentieth century The depiction of particular subjects in and for the floating world of urban Edo and the process of negotiating this within the larger field of publishing are examined to further ground ukiyo e as material culture as commodities in a mercantile economy Picturing the Floating World offers a new approach a critical yet accessible analysis of the genre as it was developed in its social cultural and political milieu The book introduces students collectors and enthusiasts to ukiyo e as a genre under construction in its own time while contributing to our understanding of early modern visual production
