invent in the Strand between Lyons s and the office invent after dinner invent on Sundays See with what ardour they rush home of a night See how they seize a half holiday like hungry dogs a bone They don t want golf bridge limericks novels illustrated magazines clubs whisky starting prices hints about neckties political meetings yarns comic songs anturic salts nor the smiles that are situate between a gay corsage and a picture hat They never wonder at a loss what they will do next Their evenings never drag are always too short You may indeed catch them at twelve o clock at night on the flat of their backs but not in bed No in a shed under a machine holding a candle whose paths drop fatness up to the connecting rod that is strained or the wheel that is out of centre They are continually interested nay enthralled They have a machine and they are perfecting it They get one part right and then another goes wrong and they get that right and then another goes wrong and so on When they are quite sure they have reached perfection forth issues the machine out of the shed and in five minutes is smashed up together with a limb or so of the inventors just because they had been quite sure too soon Then the whole business starts again They do not give up that particular wreck was of course due to a mere oversight the whole business starts again For they have glimpsed perfection they have the gleam of perfection in their souls Thus their lives run away They will never fly you remark cynically Well if they don t Besides what about Wright With all your cynicism have you never envied them their machine and their passionate interest in it *The Human Machine* John Yerbury Dent,1937 *The Human Machine* ,1992

The Human Machine Arnold Bennett, 2010-08-20 Here is what Bennett himself said about this book "It has never struck you that you possess a machine That machine is yourself You are the most fascinating bit of machinery that ever was Considering that we have to spend the whole of our lives in this human machine considering that it is our sole means of contact and compromise with the rest of the world we really do devote to it very little attention When I say we I mean our inmost spirits the instinctive part the mystery within that exists And when I say the human machine I mean the brain and the body and chiefly the brain Two reviews from Amazon.com This small text has more common sense packed in it than most epics After reading this for the second time I was amazed at how simple the premises are I would recommend this to anyone who may be in search of enlightenment or just simply searching for a good read *The Human Machine* contains all that stuff which a person needs to know to have smooth relations with his peers and superiors That is to say it deals with your self The author teaches you in a persuasive manner how to get along with people in today's world and thereby avoid many of the tensions worries which you may have to face otherwise The book is certainly worth buying
