China's Rise in Historical Perspective Brantly Womack, 2010-07-16 China with its geographical historical cultural and political distance from the West long has been a black box upon which we readily paste labels communist non Western developing country but whose internal logic remains a mystery to us Arguing that it would be a major step forward in our genuine knowledge of China if we understood its internal dynamic this innovative book considers China from a historical perspective to chart its current dynamic and future direction Renowned historians economists and political scientists explore the internal dynamic of China's rise since traditional times through the key themes of China's identity security economy environment energy and politics Each themed section pairs a historian with a social scientist to give an overall view of where China is coming from and where it is heading One of the PRC's best known experts on international relations provides a concluding reflection on the political psychology of China's view of itself in the world Although a China centered perspective does not yield clear absolute truths about China's rise focusing on change in the PRC from pre modern times to the present allows us to distinguish between China's own dynamic and its relative change of position vis vis other actors including ourselves Written in clear and accessible style this nuanced book will be essential reading for all readers interested in China past and present and its growing global role

Bulletin of the School of Oriental and African Studies, University of London University of London. School of Oriental and African Studies,2005 *The Chinese Revolution on the Tibetan Frontier* Benno Weiner,2020-06-15 In *The Chinese Revolution on the Tibetan Frontier* Benno Weiner provides the first in depth study of an ethnic minority region during the first decade of the People s Republic of China the Amdo region in the Sino Tibetan borderland Employing previously inaccessible local archives as well as other rare primary sources he demonstrates that the Communist Party s goal in 1950s Amdo was not just state building but also nation building Such an objective required the construction of narratives and policies capable of convincing Tibetans of their membership in a wider political community As Weiner shows however early efforts to gradually and organically transform a vast multiethnic empire into a singular nation state lost out to a revolutionary impatience demanding more immediate paths to national integration and socialist transformation This led in 1958 to communization then to large scale rebellion and its brutal pacification Rather than joining voluntarily Amdo was integrated through the widespread often indiscriminate use of violence a violence that lingers in the living memory of Amdo Tibetans and others
