Basile,2014-09-01 It's a contraption that makes the lists of Greatest Inventions Ever at the same time it's accused of causing global disaster It has changed everything from architecture to people's food habits to their voting patterns to even the way big business washes its windows It has saved countless lives while causing countless deaths Most of us are glad it's there But we don't know how or when it got there It's air conditioning For thousands of years humankind attempted to do something about the slow torture of hot weather Everything was tried water power slave power electric power ice made from steam engines and cold air made from deadly chemicals zephyrifiers refrigerated beds ventilation amateurs and professional air sniffers It wasn't until 1902 when an engineer barely out of college developed the Apparatus for Treating Air a machine that could actually cool the indoors and everyone assumed it would instantly change the world That wasn't the case There was a time when people ignored hot weather while reading each day's list of heat related deaths women wore furs in the summertime heatstroke victims were treated with bloodletting and the notion of a machine to cool the air was considered preposterous even sinful The story of air conditioning is actually two stories the struggle to perfect a cooling device and the effort to convince people that they actually needed such a thing With a cast of characters ranging from Leonardo da Vinci and Richard Nixon to Felix the Cat Cool showcases the myriad reactions to air conditioning some of them dramatic many others comical and wonderfully inconsistent as it was developed and presented to the world Here is a unique perspective on air conditioning's fascinating history how we rely so completely on it today and how it might change radically tomorrow

Keesser, Annette Ripper, Silke Vetter-Schultheiß, 2018-07-12 Im Topologischen Manifest sind die Ergebnisse des Forschungsprojekts Topologie der Technik auf prägnante Weise dargelegt. Der spatial turn analysierte die Produktion des Raumes durch soziale Praktiken, jedoch ohne die Einbettung jener Praktiken in technische Systeme zu berücksichtigen. Angesichts der Bedeutung technisierter Räume für das heutige Leben ist dieser Mangel akut. In diesem Band sind neben dem Manifest Beiträge aus verschiedenen Disziplinen versammelt, um Möglichkeiten und Grenzen einer Topologie der Technik auszuloten. Ausgehend von einem modalen Machtbegriff wird nach technogener Formation und Transformation von Räumen gefragt, nach der Konzeptionalisierung relationaler Räume als Struktur oder Netzphänomenen und der Rolle von Imagination für raumbildende Prozesse. Der Inhalt: Die interdisziplinären Beiträge gruppieren und positionieren sich um und auf unterschiedliche Weise zum Topologischen Manifest sowie den darin niedergelegten Raumthesen und -typen. Sie reichen von raumtheoretischen Überlegungen und den Besonderheiten relationaler Räume über historische und praxeologische Abhandlungen zur Performanz von Orten bis hin zur Analyse spezifischer Räume wie virtuellen und textuellen Räumen, Sicherheits- und Möglichkeitsräumen oder der Kryosphäre. Die Autorinnen und Autoren erforschen Praktiken, Dynamiken und Zustandsbedingungen im Beziehungsgefüge zwischen Technik, Macht und Raum. Die Zielgruppen: Forschende auf den Gebieten der Raum- und Technikphilosophie, Soziologie, Geschichte sowie alle interessierten Wissenschaftlerinnen und Wissenschaftler. Die Herausgeber: Die Herausgeberinnen und Herausgeber sind Doktorandinnen und Doktoranden im Forschungsprojekt Topologie der Technik in Darmstadt.

Florida Made George S. LeMieux, Laura E. Mize, 2018-04-09 Once considered just an insect-ridden swampland, Florida is now a top destination for tourism, business, agriculture, and innovation thanks to these 25 individuals. Florida is in many ways both the oldest and newest of the megastates. The ideas and actions of a colorful cast of characters, from beloved cultural icons to political heroes and even a socialist dictator, transformed the peninsula. A Barbados native rescued Florida's orange industry after the catastrophic 1835 freeze. Known as the Grande Dame of the Everglades, Marjory Stoneman Douglas worked tirelessly to save the state's vast incomparable wetlands from annihilation in the early twentieth century. In the mid-1800s, a Florida doctor developed a precursor to modern air conditioning.
