## **The Fifth Corner:**

*The Fifth Corner of Four* Graham Priest, 2018-10-25 Graham Priest presents an exploration of Buddhist metaphysics drawing on texts which include those of Nagarjuna and Dogen. The development of Buddhist metaphysics is viewed through the lens of the catuṣkoṭi. At its simplest and as it appears in the earliest texts this is a logical metaphysical principle which says that every claim is true, false, both or neither, but the principle itself evolves assuming new forms as the metaphysics develops. An important step in the evolution incorporates ineffability. Such things make no sense from the perspective of a logic which endorses the principles of excluded middle and non contradiction which are standard fare in Western logic. However the book shows how one can make sense of them by applying the techniques of contemporary non classical logic such as those of First Degree Entailment and Plurivalent Logic. An important issue that emerges as the book develops is the notion of non duality and its transcendence. This allows many of the threads of the book to be drawn together at its end. All matters are explained in as far as possible in a way that is accessible to those with no knowledge of Buddhist philosophy or contemporary non classical logic.

family and religion were seen as under threat. It is this environment, the halls of San Leone Magno in the late 1960s and the 1970s that Edoardo Albinati takes as his subject. His experience at the school, reflections on his adolescence and thoughts on the forces that produced contemporary Italy are painstakingly and thoughtfully rendered, producing a remarkable blend of memoir, coming of age novel and true crime story. Along with indelible portraits of his teachers and fellow classmates, the charming Arbus, the literature teacher Cosmos and his only Fascist friend Max Albinati also gives us his nuanced reflections on the legacy of abuse, the Italian bourgeoisie and the relationship between sex, violence and masculinity.
