The First European Revolution:

The First European Revolution R. I. Moore, 2000-10-19 This book provides a radical reassessment of Europe from the late tenth to the early thirteenth centuries The First European Revolution, 1776-1815 Norman Hampson, 1969 **The Furies** Arno J. Mayer, 2002-01-15 This is a deliberately comparative study of violence and terror in the French and Russian revolutions It points up a web of significant similarities which are explored and refined by analogic analysis *The first European revolution, 1776-1875* Norman Hampson, 1969 **1848 — A European Revolution?** A. Körner, 2000-02-17 This book is among the rare contributions to the 150th anniversary of 1848 which takes a completely new theoretically informed approach Instead of a traditional social or political history the authors analyse the dichotomy between the international dimension in the ideas of the revolution and the nationalisation of memories in its commemorations over the past 150 years The book offers original research on the history of European ideas and takes part in the current debate about the relationship between history and memory *The First European* Pierre Briant, 2017-01-02 Enlightenment thinkers searching for ancient models to understand contemporary affairs were the first to critically interpret Alexander the Great's achievements As Pierre Briant shows in their minds Alexander was the first European an empire builder who welcomed trade with the Orient and brought Western civilization to its oppressed peoples *Past Sense — Studies in Medieval and Early Modern European History* Constantin Fasolt, 2014-04-03 The twenty studies collected in this volume focus on the transition from the Middle Ages to the modern world The method leads from technical investigations on William Durant the Younger ca 1266 1330 and Hermann Conring 1606 1681 through reflection on the nature of historical knowledge to a break with historicism an affirmation of anachronism and a broad perspective on the history of Europe The introduction explains when and why these studies were written and places them in the context of contemporary historical thinking by drawing on Wittgenstein's Philosophical Investigations This book will appeal to historians with an interest in historical theory historians of late medieval and early modern Europe and students looking for the meaning of history *Also a History of Philosophy, Volume 2* Jürgen Habermas, 2024-09-26 In this second volume of his groundbreaking new work on the history of philosophy Jürgen Habermas traces the development of Western thought from the reception of Platonism by early Christian thought through the revolution in medieval philosophy and theology triggered by the rediscovery of Aristotle's works up to the decoupling of philosophical and theological thought in nominalism and the Reformation that ushered in the postmetaphysical thinking of the modern age In contrast to conventional histories that focus on movements and schools Habermas takes the dialectic of faith and knowledge as a guiding thread for analysing key developments in the thought of major figures such as Augustine Aquinas Scotus Ockham and Luther that constitute milestones in the genealogy of postmetaphysical thinking A distinctive feature of Habermas' approach is the prominence he accords practical philosophy and in particular legal and political ideas and the corresponding attention he pays to social institutional and political history especially as these bear on the relationship

between church and state As a result the central preoccupations of Christian thought are shown to be original responses to questions raised by the Christian worldview that exploded the framework of Greek metaphysical thinking and remain crucial for the self understanding of contemporary philosophy Far from raising claims to exclusivity completeness or closure Habermas's history of philosophy published in English in three volumes opens up new lines of research and reflection that will influence the humanities and social sciences for decades to come

Critical Theory of Legal Revolutions Hauke Brunkhorst, 2014-06-19 This unique work analyzes the crisis in modern society building on the ideas of the Frankfurt School thinkers Emphasizing social evolution and learning processes it argues that crisis is mediated by social class conflicts and collective learning the results of which are embodied in constitutional and public law First the work outlines a new categorical framework of critical theory in which it is conceived as a theory of crisis It shows that the Marxist focus on economy and on class struggle is too narrow to deal with the range of social conflicts within modern society and posits that a crisis of legitimization is at the core of all crises It then discusses the dialectic of revolutionary and evolutionary developmental processes of modern society and its legal system This volume in the Critical Theory and Contemporary Society by a leading scholar in the field provides a new approach to critical theory that will appeal to anyone studying political sociology political theory and law

Strange Parallels: Volume 2, Mainland Mirrors: Europe, Japan, China, South Asia, and the Islands Victor Lieberman, 2009-10-30 Blending fine grained case studies with overarching theory this book seeks both to integrate Southeast Asia into world history and to rethink much of Eurasia's premodern past It argues that Southeast Asia Europe Japan China and South Asia all embodied idiosyncratic versions of a Eurasian wide pattern whereby local isolates cohered to form ever larger more stable more complex political and cultural systems With accelerating force climatic commercial and military stimuli joined to produce patterns of linear cum cyclic construction that became remarkably synchronized even between regions that had no contact with one another Yet this study also distinguishes between two zones of integration one where indigenous groups remained in control and a second where agency gravitated to external conquest elites Here then is a fundamentally original view of Eurasia during a 1 000 year period that speaks to both historians of individual regions and those interested in global trends

A History of Medieval Europe R.H.C. Davis, 2013-08-16 R C Davis provided the classic account of the European medieval world equipping generations of undergraduate and A level students with sufficient grasp of the period to debate diverse historical perspectives and reputations His book has been important grounding for both modernists required to take a course in medieval history and those who seek to specialise in the medieval period In updating this classic work to a third edition the additional author now enables students to see history in action the diverse viewpoints and important research that has been undertaken since Davis second edition and progressed historical understanding Each of Davis original chapters now concludes with a new directions and developments section by Professor R I Moore Emeritus of Newcastle University A key work updated in a method that both enhances subject

understanding and sets important research in its wider context A vital resource now up to date for generations of historians to come

Motherhood, Religion, and Society in Medieval Europe, 400-1400 Lesley Smith, Conrad Leyser, 2016-04-22 Who can concentrate on thoughts of Scripture or philosophy and be able to endure babies crying Will he put up with the constant muddle and squalor which small children bring into the home The wealthy can do so but philosophers lead a very different life So according to Peter Abelard did his wife Heloise state in characteristically stark terms the antithetical demands of family and scholarship Heloise was not alone in making this assumption Sources from Jerome onward never cease to remind us that the life of the mind stands at odds with life in the family For all that we have moved in the past two generations beyond kings and battles fiefs and barons motherhood has remained a blind spot for medieval historians Whatever the reasons the result is that the historiography of the medieval period is largely motherless The aim of this book is to insist that this picture is intolerably one dimensional and to begin to change it The volume is focussed on the paradox of motherhood in the European Middle Ages to be a mother is at once to hold great power and by the same token to be acutely vulnerable The essays look to analyse the powers and the dangers of motherhood within the warp and weft of social history beginning with the premise that religious discourse or practice served as a medium in which mothers and others could assess their situation defend claims and make accusations Within this frame three main themes emerge survival agency and institutionalization The volume spans the length and breadth of the Middle Ages from late Roman North Africa through ninth century Byzantium to late medieval Somerset drawing in a range of types of historian including textual scholars literary critics students of religion and economic historians The unity of the volume arises from the very diversity of approaches within it all addressed to the central topic

Reform and the papacy in the eleventh century Kathleen G. Cushing, 2020-01-03 This book explores the relationship between the papacy and reform against the backdrop of social and religious change in later tenth and eleventh century Europe Placing this relationship in the context of the debate about transformation it reverses the recent trend among historians to emphasise the reform developments in the localities at the expense of those being undertaken in Rome It focuses on how the papacy took an increasingly active part in shaping the direction of both its own reform and that of society whose reform became an essential part of realising its objective of a free and independent Church It also addresses the role of the Latin Church in western Europe around the year 1000 the historiography of reform the significance of the Peace of God as a reformist movement the development of the papacy in the eleventh century the changing attitudes towards simony clerical marriage and lay investiture reformist rhetoric aimed at the clergy and how reformist writings sought to change the behaviour and expectations of the aristocracy Summarising current literature while presenting a cogent and nuanced argument about the complex nature and development of reform this book will be invaluable for an undergraduate and specialist audience alike

Friendship, Love, and Brotherhood in Medieval Northern Europe, c. 1000-1200 Lars Hermanson, 2019-05-15 In this book Lars Hermanson discusses how religious beliefs

and norms steered attitudes to friendship and love and how these ways of thinking affected social identity and political behaviour With examples taken from eleventh and twelfth century northern Europe the author investigates why friendship was praised both by brotherhoods of aristocratic warriors and by brethren within monastery walls Social and political functions rested on personal connections rather than a strong central state in the High Middle Ages This meant that friendship was an important pragmatic instrument for establishing social order and achieving success in the game of politics

Europe's Long Twelfth Century John D. Cotts, 2012-11-09 Between 1095 and 1229 Western Europe confronted a series of alternative cultural possibilities that would fundamentally transform its social structures its intellectual life and its very identity It was a period of difficult decisions and anxiety rather than a triumphant renaissance In this fresh reassessment of the twelfth century John D Cotts Shows how new social economic and religious options challenged Europeans to re imagine their place in the world Provides an overview of political life and detailed examples of the original thought and religious enthusiasm of the time Presents the Crusades as the century's defining movement Ideal for students and scholars alike this is an essential overview of a pivotal era in medieval history that arguably paved the way for a united Europe

European Modernity Bo Stråth, Peter Wagner, 2017-07-27 It is often taken for granted that modernity emerged in Europe and diffused from there across the world This book questions that assumption and re examines the question of European modernity in the light of world history Bo Stråth and Peter Wagner re position Europe in the global context of the 19th and 20th centuries They show that Europe is less modern than has been assumed and modernity less European and thus decentre Europe in a way that makes room for a wider historical perspective Adopting a thematic structure the authors reconceive the idea of European modernity in relation to key topics such as democracy capitalism and market society individual autonomy religion and politics European Modernity is an important addition to the literature that will be of interest to all students and scholars of modern European history

The New Atheism, Myth, and History Nathan Johnstone, 2018-06-11 This book examines the misuse of history in New Atheism and militant anti religion It looks at how episodes such as the Witch hunt the Inquisition and the Holocaust are mythologized to present religion as inescapably prone to violence and discrimination whilst the darker side of atheist history such as its involvement in Stalinism is denied At the same time another constructed history that of a perpetual and one sided conflict between religion and science rationalism is commonly used by militant atheists to suggest the innate superiority of the non religious mind In a number of detailed case studies the book traces how these myths have long been overturned by historians and argues that the New Atheism's cavalier use of history is indicative of a troubling approach to the humanities in general Nathan Johnstone engages directly with the God debate at an academic level and contributes to the emerging study of non religion as a culture and an identity

Frankish History Paul Fouracre, 2024-10-28 The volume consists of sixteen papers on the history of Francia between the seventh and eleventh centuries Originally published between 1979 and 2009 the papers are arranged around three interlinking themes the

relationship between History and Hagiography the history of Francia under the respective regimes of the Merovingian and Carolingian kings and the problem of how states with weak governing institutions were able to exercise power over large areas The history of Francia has been one of the most productive areas of early medieval history over the past two generations Models of European development have been based on its rich materials and the fact that the polity lasted for half a millennium makes it a prime area for the study of the dialectic between continuity and change The papers collected here all have this big history as their background It is to be hoped that keying into such questions makes them both accessible and useful for students and teachers alike

Eurasian Transformations, Tenth to Thirteenth Centuries Johann P. Arnason, Björn Wittrock, 2005-01-01 This volume which also appeared as a special issue of *Medieval Encounters* deals with transformations of the major Eurasian civilizations in the early second millennium CE and with the question of contrasts parallels and connections between the different trajectories that took shape during this period An introductory section discusses the theoretical problems of comparative analysis with particular reference to formative phases of cultural crystallization The first main thematic section focuses on European developments The emergence of Western Christendom as a distinctive civilization is analyzed in a broader Eurasian context Other contributions examine the Europeanization of northern and eastern peripheries as well as the different course of events in the Byzantine world The last section covers socio cultural changes in non European regions the Islamic world India China and Japan and concludes with a discussion of the Eurasian empire created by the Mongols With contributions by Thomas Lindkvist Sverre Bagge Paul Jakov Smith Paul Stephenson Mikael Adolphson Dr Michal Biran Said A Arjomand G bor Klaniczay R I Moore Sheldon Pollock

Popular Opinion in the Middle Ages Charles W. Connell, 2016-10-24 This book provides a needed overview of the scholarship on medieval public culture and popular movements such as the Peace of God heresy and the crusades and illustrates how a changing sense of the populus the importance of publics and public opinion and public spheres was influential in the evolution of medieval cultures Public opinion did play an important role even in the Middle Ages it did not wait until the era of modern history to do so Using modern research on such aspects of culture as textual communities large and small publics cults crowds rumor malediction gossip dispute resolution and the European popular revolution the author focuses on the Peace of God movement the era of Church reform in the tenth and eleventh centuries the rise and combat of heresy the crusades and the works of fourteenth century political thinkers such as Marsiglio of Padua regarding the role of the populus as the basis for the analysis The pattern of changes reflected in this study argues that just as in the modern world the simplistic idea of the public was a phantom Instead there were publics large and small that were influential in shaping the cultures of the era under review
