The First House Myth Paradigm And The Task Of Architecture:

The First House R. D. Dripps, 1997 In the first century BC Vitruvius Pollio narrated a myth of the origins of dwelling In a forest clearing previously isolated and savage people gathered about the embers of a dying fire from this gathering emerged political institutions human language and the construction of permanent shelters This volume finds in this story the foundation of an extensive theory of architecture still able to offer guideposts for architectural practice Against any tendency toward theoretical disengagement or self referentiality the author argues that architecture must continue to address important political cultural and ecological issues Ultimately the role of architecture is to provide the structures that enable us to interpret the world and make it habitable The Cultural Role of Architecture Paul Emmons, John Shannon

Hendrix, Jane Lomholt, 2012 Exploring the ambiguities of how we define the word culture in our global society this book identifies its imprint on architectural ideas Chapters written by international academics in history theory and philosophy of architecture examine how different modes of representation throughout history have drawn profound meanings from cultural practices and beliefs *The Courtyard House* Nasser O. Rabbat, 2017-07-05 The courtyard house is one of the most enduring architectural forms transcending regional historical and cultural boundaries Its balance of simple appropriate construction environmental control and social and familial structures continues to engage architects and architectural historians That the courtyard house is still relevant today is indicated through its ability to accommodate continual transformation without losing any of its formal integrity and cultural roots This book presents a series of viewpoints on courtyard houses from different periods and in different regions around the world from the Harem courtyards of the Topkapi Palace and the low cost housing settlements of Protectorate Casablanca to contemporary design strategies for courtyard houses in the arid Gulf region Together the essays illuminate issues of particular relevance in architectural art historical and conservation discourses today

Transcending Architecture Julio Bermudez, 2015 Please fill in marketing copy **Proceedings of the International Conference on Religious Architecture (ICRA 2024)** Sutrisno Murtiyoso, Alvin Hadiwono, Titin Fatimah, Nafiah Solikhah, Samsu Hendra Siwi, 2025-06-26 This is an open access book Religion produced noteworthy architectures from the beginning of humanity Religion gives meaning and direction to human life and in the process unites and empowers human beings to direct their aspirations and resources to build spectacular works of houses of worship and gathering Religious architecture fills a significant part of history of architecture Since ages for the religions of mankind human beings have evolved a plethora of forms in simple stone buildings to the ones in sophisticated modern materials and technologies From an architectural point of view every building built for religion is sacred meaning it is dedicated to the powers beyond However the manifestations are so much varied as they depend on the regulations sanctioned by different religious teachings combined with the society's culture and tradition and the builder's intentions and aspirations Added to that are the local environmental factors the availability of building materials existing building technology and the time span of its development

From what we know today the oldest religious architecture could be found in G bekli Tepe built around 10 000 years ago when humanity still lived as hunter gatherers Architecture developed further into megalithic period became increasingly monumental in the medieval age with colossal royal worship complexes Up to modern times we keep on building religious architectures with increasing elaboration The International Conference on Religious Architecture is organized with a hope to broaden our understanding and perspective in this often neglected field The study in religious architecture is more acutely felt in the regions outside of Europe and America while the demand is clearly pressing today The Conference should serve as a forum for scholars in the field hopefully being the first one in a series Big House Little City Benedict Zucchi,2023-09-08 Shortlisted for the Architectural Book Awards 2024 Combining architectural and urban thinking in an unusual and engaging way this book presents an integrated approach to architectural theory and design Leon Battista Alberti s assertion in his famous Renaissance treatise that the city is like a big house and the house is in turn like a little city forms the springboard for a series of reflections on architecture s relationship with urbanism and how their once intimate symbiosis unravelled by International Style Modernism can be recovered Explicit references to Alberti s house city phrase have been made by figures as diverse as the architects Louis Kahn Aldo Van Eyck Denys Lasdun and Niels Torp and novelist Italo Calvino But as the book shows thinking of buildings as little cities provides a new lens through which to reappraise the contributions of many other architects including Le Corbusier Frank Lloyd Wright Alvar Aalto Eliel Saarinen Bernard Rudofsky Hans Scharoun Leon Krier Fumihiko Maki Charles Correa and Team 10 In doing so the author identifies common themes that form an unexpected bridgehead between the urban and architectural approaches of Antiquity the Middle Ages Renaissance and 20th century The book explores buildings from across the globe including lesser known projects such as Wright s unbuilt house in Italy or Saarinen s master plan for Cranbrook Academy as well as more recent projects by Niels Torp Behnisch Architekten Sou Fujimoto Peter Barber and WOHA It concludes with practical case studies of residential health education and workplace projects from different countries fulsomely illustrated with many drawings and photographs These show how architectural design viewed through an urban lens provides a conceptual framework for breaking down the scale of large buildings and integrating them with their context And crucially these also show a very accessible way of explaining evolving designs to the intended users and eliciting their participation in the design process The book offers a compelling approach to the design of projects at all scales within an ecological perspective the sense that big and small cities and buildings must be approached holistically if we are to reverse the degradation and depletion of our habitat both natural and man made **Architecture History, Theory and Preservation** Arleen Pabón-Charneco,2020-11-29 Architecture History Theory and Preservation critically explores the historic development theoretical underpinnings and conservation practices of architecture Complete with 170 full color images this volume presents architectural and urban examples from Prehistory to the Middle Ages chronologically and thematically examining contextual issues that provide each period with distinctive expressions The

special features structural systems materials and construction technologies are analyzed as well as how the international community deals with the task of interpreting and preserving certain historic properties This publication provides professors and students of architecture art history historic preservation and related fields with an integrated view of architecture using historical theoretical and conservation perspectives As an architect architectural historian and preservationist herself Dr Pab n Charneco weaves a field of relationships regarding each building creating a silent yet empowering bridge between past and present

Phenomenology, Architecture and the Built World James Dodd, 2017-01-05 Phenomenology Architecture and the Built World is an introduction to the methods and basic concepts of phenomenological philosophy through an analysis of the phenomenon of the built world The conception of the built world that emerges is of space and time fashioned in accordance with a living understanding of what it is for human beings to exist in the world Human building and making is thus no mere supplementary instrument in the pursuit of the ends of life but a fundamental embodiment of the self understanding of human beings Phenomenological description is uniquely capable of bringing into view the physiognomy of this understanding its texture and complexity thereby providing an important basis for a critique of what constitutes its essence and its conditions of possibility

The American Porch Michael Dolan, 2024-02-13 The former American History editor explores the creation and restoration of an essential part of a twentieth century home s identity the American porch In this delightful look at an American icon journalist and documentary scriptwriter Dolan traces the history of the porch using this history to explore subjects such as architecture history slavery colonialism trade anthropology sociology consumer behavior and publishing Library Journal In 1981 Michael Dolan and his wife Eileen O Toole bought a 1926 suburban bungalow in the Palisades area of Washington DC It was a fixer upper and DIY project that consumed their lives for twelve years As rooms were transformed with updated electrical wiring and plumbing the house s porch became a storage area rotating appliances furniture and construction materials as they were used and discarded After the interior renovation was completed Michael finally turned his attention to the porch working with contractors to resurrect it a reconstruction that inspired him to uncover the history of porches and their significance as a symbolic piece of Americana In praise of the porch Come up and sit a spell USA Today A wry well researched look at the place and the people who rocked talked and courted on the American porch for three centuries Parade The porch is making a comeback gradually replacing its humbler rival the deck which the traditionalist Dolan refers to as the platform shoe or leisure suit of American architecture Time Dolan amply demonstrates that the porch is primarily a means of escaping the heat and almost as important a locus for casual social interaction Publishers Weekly

Understanding Sustainable Architecture Terry J. Williamson, Antony Radford, Helen Bennetts, 2003 This book is a concise review of the assumptions beliefs goals and bodies of knowledge that underlie the endeavour to design environmentally sustainable buildings and other built developments

Brunelleschi, Lacan, Le Corbusier Lorens Holm, 2020-11-25 This well argued analytic text provides a greater understanding of spatial issues in the field of architecture

Re interpreting the fifteenth century demonstration of perspective Lorenz Holm puts it in relation to today's theories of subjectivity and elaborates for the first time the theoretical link between architecture and psychoanalysis Divided into three sections Brunelleschi Lacan Le Corbusier argues that perspective remains the primary and most satisfying way of representing form because it is the paradigmatic form of spatial consciousness Well illustrated with over 100 images this compelling book is a valuable study of this key aspect of architectural study and practice making it an essential read for architects in their first year or their fiftieth *Situate, Manipulate, Fabricate* Chad Schwartz, 2020-08-25 This anthology of selected works outlines three critical instigators of architecture all tied directly to the tectonic makeup of our built environment place material and assembly These catalysts provide the organizational framework for a collection of essays discussing their significant influence on the processes of architectural design and construction With content from a diverse collection of notable architects historians and scholars this book serves as a theoretical structure for understanding the tectonic potential of architecture Each chapter is thematically driven consisting of a pair of essays preceded by an introduction highlighting the fundamental issues at hand and comparing and contrasting the points of view presented Situate Manipulate Fabricate offers an opportunity to explore the essential topics that affect the design and construction as well as the experiential qualities of our built environment *The Domestic Space Reader* Kathy Mezei, Chiara Briganti, 2012-01-01 Tune in to HGTV visit your local bookstore's magazine section or flip to the Homes section of your weekend newspaper and it becomes clear domestic spaces play an immense role in our cultural consciousness The Domestic Space Reader addresses our collective fascination with houses and homes by providing the first comprehensive survey of the concept across time cultures and disciplines This pioneering anthology which is ideal for students and general readers features writing by key scholars thinkers and writers including Gaston Bachelard Mary Douglas Le Corbusier Homi Bhabha Henri Lefebvre Mrs Beeton Ma Thanegi Diana Fuss Beatriz Colomina and Edith Wharton Among the many engaging topics explored are the impact of domestic technologies on family life the relationship between religion and the home nomadic peoples and housing domestic spaces in art and literature and the history of the bedroom the kitchen and the bathroom The Domestic Space Reader demonstrates how discussions of domestic spaces can help us better understand our inner lives and challenge our perceptions of life in particular times and places **Architecture and Sacrament** David Wang, 2020-03-25 David Wang's *Architecture and Sacrament* considers architectural theory from a Christian theological perspective specifically the analogy of being analogia entis The book tracks social and cultural reasons why the theological literature tends to be separate from contemporary architecture theory Wang argues that retrieval of the sacramental outlook embedded within the analogy of being which informed centuries of art and architecture in the West can shed light on current architectural issues such as big box stores the environmental crisis and the loss of sense of community The book critiques the materialist basis of current architectural discourse subsumed largely under the banner of critical theory This volume on how European ideas inform

architectural theory complements Wang's previous book *A Philosophy of Chinese Architecture Past Present Future* and will appeal to architecture students and academics as well as those grappling with the philosophical moorings of all built environments

Cheap and Tasteful Dwellings Jan Jennings, 2005 In 1879 *Carpentry and Building* magazine launched its first house design competition for a cheap house Forty two competitions eighty six winning designs and a slew of near winners and losers resulted in a body of work that offers an entire history of an architectural culture The competitions represented a vital period of transition in delineating roles and responsibilities of architectural services and building trades The contests helped to define the training education and values of practical architects and to solidify house planning ideals The lives and work of ordinary architects who competed in *Carpentry and Building* contests offer a reinterpretation of architectural professionalization in this time period *Cheap and Tasteful Dwellings* thoroughly explores the results of these competitions conducted over a thirty year period from 1879 to 1909 The book outlines the philosophy behind and procedures developed for running the competitions looks at characteristics of the eighty six winners of the competitions examines the nature of architectural practices during the period analyzes the winning competition designs and provides biographical details of competition winners and losers A landmark book in architectural history *Cheap and Tasteful Dwellings* makes a compelling case for the theory of convenient arrangement its history its role its principles its relationship to contemporary interior design education and its meaning to American architecture More importantly the book explains the impact of *Carpentry and Building*'s contests in furthering the tenets of convenient arrangement for house design By using extensive material from the magazine Jennings leaves little doubt as to how important this overlooked story is to the history of American architecture as a whole
