Communication Michael Friendly,Howard Wainer,2021-06-08 A comprehensive history of data visualization its origins rise and effects on the ways we think about and solve problems With complex information everywhere graphics have become indispensable to our daily lives Navigation apps show real time interactive traffic data A color coded map of exit polls details election balloting down to the county level Charts communicate stock market trends government spending and the dangers of epidemics A History of Data Visualization and Graphic Communication tells the story of how graphics left the exclusive confines of scientific research and became ubiquitous As data visualization spread it changed the way we think Michael Friendly and Howard Wainer take us back to the beginnings of graphic communication in the mid seventeenth century when the Dutch cartographer Michael Florent van Langren created the first chart of statistical data which showed estimates of the
