Literature in the Making Nancy Glazener, 2016 In the eighteenth century literature meant learned writings by the twentieth century literature had come to be identified with imaginative aesthetically significant works and academic literary studies had developed special protocols for interpreting and valuing literary texts Literature in the Making examines what happened in between how literature came to be more precisely specified and valued how it was organized into genres canons and national traditions and how it became the basis for departments of modern languages and literatures in research universities Modern literature the version of literature familiar today was an international invention but it was forged when literary cultures traditions and publishing industries were mainly organized nationally Literature in the Making examines

modern literature's coalescence and institutionalization in the United States considered as an instructive instance of a phenomenon that was going global. Since modern literature initially offered a way to formulate the value of legacy texts by authors such as Homer, Cervantes and Shakespeare, however, the development of literature and literary culture in the U.S. was fundamentally transnational. *Literature in the Making* argues that Shakespeare studies, one of the richest tracts of nineteenth-century U.S. literary culture, was a key domain in which literature came to be valued both for fuelling modern projects and for safeguarding values and practices that modernity put at risk. A foundational paradox that continues to shape literary studies and literary culture, bringing together the histories of literature's competing conceptualizations, its print infrastructure, its changing status in higher education and its life in public culture during the long nineteenth century. *Literature in the Making* offers a robust account of how and why literature mattered then and matters now. By highlighting the lively collaboration between academics and non-academics that prevailed before the ascendancy of the research university, starkly divided experts from amateurs. *Literature in the Making* also opens new possibilities for envisioning how academics might partner with the reading public.

**Books As Weapons** John B. Hench, 2016-10-15. Only weeks after the D-Day invasion of June 6, 1944, a surprising cargo of crates of books joined the flood of troop reinforcements, weapons and ammunition, food and medicine onto Normandy beaches. The books were destined for French bookshops, to be followed by millions more American books in translation but also in English, ultimately distributed throughout Europe and the rest of the world. The British were doing similar work, which was uneasily coordinated with that of the Americans within the Psychological Warfare Division of General Eisenhower's Supreme Headquarters Allied Expeditionary Force under General Eisenhower's command. *Books As Weapons* tells the little-known story of the vital partnership between American book publishers and the U.S. government to put carefully selected recent books highlighting American history and values into the hands of civilians liberated from Axis forces. The government desired to use books to help disintoxicate the minds of these people from the Nazi and Japanese propaganda and censorship machines and to win their friendship. This objective dovetailed perfectly with U.S. publishers' ambitions to find new profits in international markets, which had been dominated by Britain, France and Germany before their book trades were devastated by the war. Key figures on both the trade and government sides of the program considered books the most enduring propaganda of all and thus effective weapons in the war of ideas, both during the war and afterward when the Soviet Union flexed its military might and demonstrated its propaganda savvy. Seldom have books been charged with greater responsibility or imbued with more significance. John B. Hench leavens this fully international account of the programs with fascinating vignettes set in the war rooms of Washington and London, publishers' offices throughout the world and the jeeps in which information officers drove over bomb-rutted roads to bring the books to people who were hungry for them. *Books as Weapons* provides context for continuing debates about the relationship between government and private enterprise and the image of the United States abroad.
