Dwyer, 2019-04-15 In *Homeschooling The History and Philosophy of a Controversial Practice* James G Dwyer and Shawn F Peters examine homeschooling s history its methods and the fundamental questions at the root of the heated debate over whether and how the state should oversee and regulate it The authors trace the evolution of homeschooling and the law relating to it from before America s founding to the present day In the process they analyze the many arguments made for and against it and set them in the context of larger questions about school and education They then tackle the question of regulation and they do so within a rigorous moral framework one that is constructed from a clear eyed assessment of what rights and duties children parents and the state each possess Viewing the question through that lens allows Dwyer and Peters to even handedly evaluate the competing arguments and

What Is Homeschooling, Why Children Should Always Be Homeschooled 100% Of The Time, And The Benefits Of Children Being Homeschooled Dr. Harrison Sachs,2024-05-18 This essay sheds light on what is homeschooling explicates why children should always be homeschooled 100% of the time and demystifies the benefits of children being homeschooled Succinctly stated homeschooling refers to providing an education to children in a home setting In the 21st century homeschooling is perceived as being an unconventional form of education The homeschool graduation requirements that children are expected to fulfill can vary from jurisdiction to jurisdiction As of May of 2024 certain jurisdiction for instance may mandate children to pass standardized tests to fulfill homeschool graduation requirements The homeschool curriculum requirements can also vary from jurisdiction to jurisdiction Homeschooling children does not need to always entail children following a structured curriculum but rather can involve children being at liberty to choose the niche topics that they want to learn about The homeschool lesson requirements can also vary from jurisdiction to jurisdiction Homeschooling children also does not need to always entail parents furnishing lessons to their children but rather can involve children engaging in learning activities on their own such as by watching educational videos watching factual documentaries reading informational articles listening to informative podcast episodes and reading insightful books Since children are capable of learning information on their own by engaging in learning activities they do not

need to necessarily need to be lectured to about niche topics by a teacher in order to learn information It is eminently beneficent for children to embrace being autodidacts from a tender age since it can expedite the process of them achieving learning outcomes If children become dependent on being lectured to about niche topics by a teacher in order to learn information then it can culminate in them taking longer to achieve learning outcomes Homeschooling children furnishes children with latitude for flexibility to achieve learning outcomes Homeschooling children is also able to provide children with the opportunity for them to avail themselves of personalized learning experiences in which they choose how to learn information By being able to choose optimum ways to learn information that are optimally tailored to their learning preferences children can more expeditiously achieve learning outcomes Homeschooling children can also provide children with the opportunity to learn information by engaging in pragmatic learning experiences By applying information amid their pragmatic learning experiences children render themselves more apt to learn information since doing so can help them to convert the applied information into knowledge Homeschooling children can render it possible for children to have a unique educational experience Homeschooling children can render people at a higher probability to become highly knowledgeable highly competent and highly adept industry experts in their niche fields at a tender age It stands to preponderantly reason that children should be homeschooled 100% of the time since doing so can cause them to circumvent succumbing to early life slavery which is the utmost deleterious form of modern slavery The practice of slavery in any form is inhumane immoral reprehensible and unvindicated Even though all forms of slavery should be abolished modern slavery is inapt to ever be abolished By homeschooling their children a parent circumvents having their children sentenced to a 13 year insalubrious K 12 compulsory concentration camp By homeschooling their children a parent also renders their children all the more poised to have successful careers By homeschooling their children a parent also renders their children all the more primed to expeditiously achieve desirable learning outcomes The mandate to attend the 13 year K 12 compulsory concentration camp that is imposed against people against their own volition is ineffably inhumane is the utmost pernicious form of modern slavery and should be abolished People should have purview over how their precious time is earmarked and their right to liberty should never be encroached on In a 13 year insalubrious K 12 compulsory concentration camp a person s inalienable right to liberty is severely encroached on in all facets

Why I Love Homeschooling Brynn Steimle, Kathy Oaks, 2020-07-04 Because of the COVID 19 pandemic millions of families worldwide have been thrust into schooling remotely at home Some

parents look forward to sending their kids back to school but others have found they prefer schooling at home They've noticed things like My child has learned more at home with me in the last 2 months than in the past 2 years at school Or I kind of like spending so much time with my kids and learning alongside them Many parents are considering continuing homeschooling beyond the pandemic and this book is here to help them make an informed decision about their children's education Homeschooling is not about trying to reproduce a school environment at home It's not hours and hours sitting at a desk with a parent or in front of an online class Homeschooling is about creating an environment outside of the school structure that fosters a love of learning creativity family closeness and flexibility There is no one size that fits all in homeschooling every family is different and approaches homeschooling and parenting in their own unique way In this book 24 seasoned homeschooling families share their experiences The authors include both religious and secular homeschooling parents from all walks of life They represent a variety of homeschooling styles from self-directed learning unschooling to more formal approaches abilities and disabilities marital statuses educational achievements job statuses races and socioeconomic levels The authors have children of all ages from babies preschoolers and kindergarteners to students in elementary school middle school or high school And some have children who are now adults They discuss what they love about homeschooling and also the challenges they've overcome We hope that this book will inspire and encourage those who are considering homeschooling as well as those who are already on their homeschooling journey And we hope it will expand your ideas about the concept of education and what's possible for yourselves and your children
