The Cely Letters 1472 1488:

The Cely letters Alison Hanham,1975 *The Cely Letters, 1472-1488* Cely (Family of.),Cely family,1975 The Cely Letters 1472-1488. Ed by Alison Hanham Alison Hanham,1975 **Cely Letters,1472-1488, Ed. Alison Hanham. (E.E.T.S.,O.S,273).** ,1975 **The Language of Daily Life in England (1400–1800)** Arja Nurmi,Minna Nevala,Minna Palander-Collin,2009-04-15 The Language of Daily Life in England 1400 1800 is an important state of the art account of historical sociolinguistic and socio pragmatic research The volume contains nine studies and an introductory essay which discuss linguistic and social variation and change over four centuries Each study tackles a linguistic or social phenomenon and approaches it with a combination of quantitative and qualitative methods always embedded in the socio historical context The volume presents new information on linguistic variation and change while evaluating and developing the relevant theoretical and methodological tools The writers form one of the leading research teams in the field and as compilers of the Corpus of Early English Correspondence have an informed understanding of the data in all its depth This volume will be of interest to scholars in historical linguistics sociolinguistics and socio pragmatics but also e g social history The approachable style of writing makes it also inviting for advanced students **Syntactic Effects of Morphological Change** David Lightfoot,2002 David Lightfoot s collection explores a central aspect of language change the nature and degree to which changes in morphology inflectional word endings for example cause changes in syntax for example in word order The 22 contributors consider such phenomena within the context of Chomsky s minimalist revision of his principles of universal grammar and parameters of individual languages theory They also address some of the main unanswered problems associated with Professor Lightfoot s hypothesis that all grammatical change is driven by the way in which children acquire language These questions are discussed in the context of a wide range of languages by distinguished scholars from around the world There are 21 chapters divided into 4 parts Morphologically Driven Changes Indirect Links Between Morphology and Syntax Independent Changes in Movement Operations and Computer Simulations **Sociolinguistics and Language History** Terttu Nevalainen,Helena Raumolin-Brunberg,2023-11-27 What role has social status played in shaping the English language across the centuries Have women also been the agents of language standardization in the past Can apparent time patterns be used to predict the course of long term language change These questions and many others will be addressed in this volume which combines sociolinguistic methodology and social history to account for diachronic language change in Renaissance English The approach has been made possible by the new machine readable Corpus of Early English Correspondence CEEC specifically compiled for this purpose The 2 4 million word corpus covers the period from 1420 to 1680 and contains over 700 writers The volume introduces the premises of the study discussing both modern sociolinguistics and English society in the late medieval and early modern periods A detailed description is given of the Corpus of Early English Correspondence its encoding and the separate database which records the letter writers social backgrounds The

pilot studies based on the CEEC suggest that social rank and gender should both be considered in diachronic language change but that apparent time patterns may not always be a reliable cue to what will happen in the long run The volume also argues that historical sociolinguistics offers fascinating perspectives on the study of such new areas as pragmatization and changing politeness cultures across time This extension of sociolinguistic methodology to the past is a breakthrough in the field of corpus linguistics It will be of major interest not only to historical linguists but to modern sociolinguists and social historians

The Loss of Negative Concord in Standard English Amel Kallel, 2011-01-18 The loss of Negative Concord NC has long been attributed to external factors This study readdresses this issue and provides evidence of the failure of certain external factors to account for the observed decline and ultimate disappearance of NC in Standard English A detailed study of negation in Late Middle and Early Modern English reveals that the process of the decline of NC was a case of a natural change preceded by a period of variation manifested in the obtained S curves for all the contexts studied Variation existed not only on the level of the speech community as a whole but also within individual speakers contra Lightfoot 1991 A close study of n indefinites in negative contexts and their ultimate replacement with Negative Polarity Items NPIs in a number of grammatical environments shows that the decline of NC follows the same pattern across contexts in a form of parallel curvature which indicates that the loss of NC is a natural process However this study reveals that the decline is not constant across time and thus the Constant Rate Hypothesis Kroch 1989 does not in that respect fully account for this change Context behaviour suggests an alternative principle of linguistic change the Context Constancy Principle A Context Constancy Effect is obtained across all contexts indicating that the loss of NC is triggered by a change in a single underlying parameter setting Accordingly a theory internal explanation is suggested N words underwent a lexical reanalysis whereby they acquired a new grammatical feature Neg and were thus reinterpreted as negative quantifiers rather than NPIs This lexical reanalysis was triggered by the ambiguous status of n words between Neg and thus between single and double negative meanings This change is treated as a case of parameter resetting as this lexical reanalysis affected a whole set of lexical items and can thus economically account for the different observed surface changes

Paston Letters and Papers of the Fifteenth Century Norman Davis, Richard Beadle, Colin Richmond, 2004 The Paston family papers provide an incomparable picture of life in fifteenth century England and richly illustrate the resources of the language at an important period They have long been consulted by historians and other students of the fifteenth century for their information about social history and politics both within East Anglia and also nationally This authoritative edition by Professor Norman Davis formerly Director of the Early English Text Society was published by the Clarendon Press in 1971 volume I and 1976 volume II but has long been out of print In addition to the letters and papers themselves Volume I contains excellent biographical sketches of the writers a full comparative chronological table and an informative introduction to the separate documents Volume II contains correspondence addressed to the Pastons by others than members of the family This is arranged in

chronological order under the names of the recipients and in addition some sixty miscellaneous documents are also included. A third volume which Professor Davis was unable to complete before his death is in preparation, edited by Dr Richard Beadle and Professor Colin Richmond. This will include the remaining text and the indexes and will complete the series. **English in Transition** Matti Rissanen, Merja Kytö, Kirsi Heikkonen, 2011-08-25. The future of English linguistics as envisaged by the editors of *Topics in English Linguistics* lies in empirical studies which integrate work in English linguistics into general and theoretical linguistics on the one hand and comparative linguistics on the other. The TiEL series features volumes that present interesting new data and analyses and above all fresh approaches that contribute to the overall aim of the series which is to further outstanding research in English linguistics.
