Connecting Learning Across the Institution Pamela L. Eddy, 2014-03-25 Most research on learning tends to occur in silos based on stakeholder perspective This volume seeks to break down these silos and draw together scholars who research learning from different perspectives to highlight commonalities in learning for students faculty and institutions When we understand how learning is experienced across the institution we can develop strategies that help support enhance and reinforce learning for all Exploring what it means to bridge learning across the institution this volume provides a roadmap to improve learning for all Both scholarly and practical it advances the knowledge about the ways we investigate and study learning across and for various groups of learners It also Collects thinking about learning in its various formats in one location Provides a platform for synthesis Outlines key questions for thinking more deeply about learning on campus Instead of thinking of learning as discrete depending on the stakeholder group this volume highlights the commonalities across all types of learners The Challenge of Connecting Learning Association of American Colleges.

National Advisory Committee, 1990 Video-based Research in Education Lihua Xu, George Aranda, Wanty Widjaja, David Clarke, 2018-11-09 The rapid development of video technology in the last decade has changed the ways in which people communicate how they learn and how research is done Video technology offers rich potential in capturing complex social interactions over a prolonged period of time and in supporting teacher professional learning and development This book explores the ontological epistemological methodological and ethical challenges associated with the different uses of video in research ranging from video as a tool for investigating social interactions and for stimulating participants reflection to the use of video for engaging varied communities and social groups in the process of teaching learning and research Each

chapter presents the authors critical reflection on the ways in which video was employed the research decisions made the methodological challenges faced and the consequences for how educational practices were understood As such it illustrates a wide range of philosophical and theoretical standpoints with respect to video based research approaches This book will stimulate broad and rich discussion among education researchers who are interested in video research and contributes to advancing knowledge of the field developing approaches to dealing with emergent ethical theoretical and methodological issues and generating new protocols and guidelines for conducting video based research across a variety of disciplinary areas in education

Higher Education: Handbook of Theory and Research J.C. Smart,2012-12-06 **Universitas** Thomas E. Boudreau,1998-05-12 Believing that current educational policies and practices in American institutions of higher learning contribute to an incoherent disjunctive and wasteful four year experience for many undergraduates the author provides a sense of new direction to aid in the restructuring and reform of undergraduate education in America The primary question of the work is How can the years of undergraduate education empower the student with the knowledge and integrated set of skills needed for a lifetime of learning and productive work Boudreau focuses on the primary responsibility of all institutions of higher learning to provide a superior undergraduate education All other functions of a university should be secondary to this commitment Unfortunately this basic premise seems lost today This work argues that universities must undergo significant reform and renewal especially at the undergraduate level if they are to prepare students successfully for the future
