The Challenge Of Periodization Old Paradigms And New Perspectives:

The Challenge of Periodization Lawrence L. Besserman, 1996 First Published in 1996 Routledge is an imprint of Taylor Francis an informa company *The Challenge of World Theatre History* Steve Tillis, 2020-09-19 The future of theatre history studies requires consideration of theatre as a global phenomenon The Challenge of World Theatre History offers the first full scale argument for abandoning an obsolete and parochial Eurocentric approach to theatre history in favor of a more global perspective This book exposes the fallacies that reinforce the conventional approach and defends the global perspective against possible objections It moves beyond the conventional nation based geography of theatre in favor of a regional geography and develops a new way to demarcate the periods of theatre history Finally the book outlines a history that recognizes the often connected developments in theatre across Eurasia and around the world It makes the case that world theatre history is necessary not only for itself but for the powerful comparative and contextual insights it offers to all theatre scholars and students whatever their special areas of interest

Thomas Hardy and Paradoxes of Love Hillel Matthew Daleski, 1997 Emphasizing the vast changes in literary criticism that have occurred during the last thirty years H M Daleski reexamines Thomas Hardy's novels in the novelist's own terms presenting a revisionary account of his treatment of gender He also shows that Hardy was not as sexist as is asserted in much feminist criticism and that his female characters are sympathetically portrayed as the centers of his fictional worlds By

carefully analyzing the novels Daleski refutes the generally accepted reason for Hardy's abandonment of fiction at the height of his powers claiming that he drove himself to a dead end in *Jude the Obscure*. The typical Hardy plot places a female protagonist in a love triangle with two male protagonists who are portrayed as polar opposites. The woman, contradicting a general view of her as victim, is always granted the freedom of choice of a marriage partner. She invariably makes the wrong choice which leads to a bad marriage and disastrous sexual relationships. As this scenario is played out in most of Hardy's novels, the men are presented as distinct types, the types being depicted with rich diversity and with steadily greater psychological depth. Hardy's rendering of sexuality in both his male and his female characters is marked by its originality and profundity. In his intuitions about sexual relations, Daleski maintains Hardy was not outdone by writers such as Lawrence and Joyce. Daleski studies Hardy within his Victorian context but he also shows that Hardy, both in his depiction of sexuality and in his technical innovations, was in advance of his time. In these respects, Hardy deserves to be regarded as a forerunner of the great modernists. In *Thomas Hardy and Paradoxes of Love*, Daleski offers acute and thoughtful analyses of Hardy's major novels. Avoiding critical jargon, the author has made his book accessible to all readers with an interest in Hardy and his novels as well as in the study of gender in English literature.

A History of Romantic Literature Frederick Burwick, 2019-08-19

Historical Narrative Offers Introduction to Romanticism by Placing Key Figures in Overall Social Context. Going beyond the general literary survey, *A History of Romantic Literature* examines the literatures of sensibility and intensity as well as the aesthetic dimensions of horror and terror, sublimity and ecstasy by providing a richly integrated account of shared themes, interests, innovations, rivalries and disputes among the writers of the late eighteenth and early nineteenth centuries. Drawing from the assemblage theory, Prof. Burwick maintains that the literature of the period is inseparable from prevailing economic conditions and ongoing political and religious turmoil as well as developments in physics, astronomy, music and art. Thus, rather than deal with authors as if they worked in isolation from society, he identifies and describes their interactions with their communities and with one another as well as their responses to current events. By connecting seemingly scattered and random events such as the bank crisis of 1825, he weaves the coincidental into a coherent narrative of the networking that informed the rise and progress of Romanticism. Notable features of the book include a strong narrative structure divided into four major chronological periods: Revolution 1789-1798, Napoleonic Wars 1799-1815, Riots 1815-1820, Reform 1821-1832. Thorough coverage of major and minor figures and institutions of the Romantic movement, including Mary Wollstonecraft, Elizabeth Montague and the Bluestockings, Lord Byron, John Keats, Letitia Elizabeth Landon, etc. Emphasis on the influence of social networks among authors such as informal dinners and teas, clubs, salons and more formal institutions. With its extensive coverage and insightful analysis set within a lively historical narrative, *History of Romantic Literature* is highly recommended for courses on British Romanticism at both undergraduate and postgraduate levels. It will also prove a highly useful reference for advanced scholars pursuing their own research.

The Critical Attitude and the History of International

Law Jean D'Aspremont, 2019-08-26 This book questions the critical attitude that is informing the critical histories that have been flourishing since the historical turn in international law. It makes the argument that the historical turn falls short of being radically critical as the abounding critical histories which have come to populate the international literature over the last decades continue to be orchestrated along the very lines set by the linear historical narratives which they seek to question and disrupt thereby repressing the imagination of international lawyers. It makes the point that the critical histories that have accompanied the historical turn have contributed to the repression of disciplinary imagination just like other linear disciplinary histories. This book argues that the critical histories must move beyond a mere historiographical attitude and promotes radical historical critique in order to unbridle disciplinary imagination. **Modernist Empathy** Eve

Sorum, 2019-06-27 Shows how reading modernist literature gives us fresh insights into tensions within the empathetic imagination and empathy itself. **Epic** Frederick Turner, 2017-07-28 Epic does many things. Among others it defines the nature of the human storyteller, recalls the creation of the world and of the human race, describes the paradoxical role of the hero as both the Everyman and the radical exception and establishes the complex quest underlying all human action. Epic illustrates that these ingredients of epic storytelling are universal cultural elements in existence across multiple remote geographical locations, historical eras, ethnic and linguistic groups and levels of technological and economic development. Frederick Turner argues that epic, despite being scoffed at and neglected for over sixty years, is the most fundamental and important of all literary forms and thereby deserves serious critical attention. It is the source and origin of all other literature, the frame within which any story is possible. The mission of this book is to repair gaps in the literary understanding of epic studies and offer permission to future epic writers and composers. The cultural genres of Marvel Comics, gothic anime, manga, multi-user dungeon gaming and superhero movies reprise all the epic themes and motifs. Consider The Wizard of Oz, Star Wars, The Lord of the Rings, Lost The Matrix, Superman, Harry Potter and Narnia. Here can be found the epic beast man, the miraculous birth of the hero, the creation myth, the founding of the city, the quest journey, the descent into the land of the dead, the monsters and the trickster. This book will be of interest to all readers fascinated by folklore, oral tradition, religious studies, anthropology, mythology and enthusiastic about literature in general. **Handbook of Medieval Studies** Albrecht
