

The image features a horizontal string with seven autumn leaves hanging from it. The leaves are arranged in a row, each slightly overlapping the next. They show a clear color progression from left to right: the first is green, followed by yellow-green, yellow, orange-yellow, orange, red-orange, and finally a deep red on the far right. The background is a plain, light-colored wall.

The Changing And Unchanging Harvest:

The Changing & Unchanging Harvest W. E. R. La Farge, 1980 *Nim Chimpsky* Elizabeth Hess, 2008-02-26 NEW YORK TIMES BESTSELLER Now Elizabeth Hess's unforgettable biography is the inspiration for Project Nim a riveting new documentary directed by James Marsh and produced by Simon Chinn the Oscar winning team known for Man on Wire Hess a consultant on the film says Getting a call from James Marsh and Simon Chinn is an author's dream Project Nim is nothing short of amazing Could an adorable chimpanzee raised from infancy by a human family bridge the gap between species and change the way we think about the boundaries between the animal and human worlds Here is the strange and moving account of an experiment intended to answer just those questions and the astonishing biography of the chimp who was chosen to see it through Dubbed Project Nim the experiment was the brainchild of Herbert S Terrace a psychologist at Columbia University His goal was to teach a chimpanzee American Sign Language in order to refute Noam Chomsky's assertion that language is an exclusively human trait Nim Chimpsky the baby chimp at the center of this ambitious potentially groundbreaking study was adopted by one of Dr Terrace's graduate students and brought home to live with her and her large family in their elegant brownstone on the Upper West Side of Manhattan At first Nim's progress in learning ASL and adapting to his new environment exceeded all expectations His charm mischievous sense of humor and keen sometimes shrewdly manipulative understanding of human nature endeared him to everyone he met and even led to guest appearances on Sesame Street where he was meant to model good behavior for toddlers But no one had thought through the long term consequences of raising a chimp in the human world and when funding for the study ran out Nim's problems began Over the next two decades exiled from the people he loved Nim was rotated in and out of various facilities It would be a long time before this chimp who had been brought up to identify with his human caretakers had another opportunity to blow out the candles on a cake celebrating his birthday No matter where he was sent however Nim's hard earned ability to converse with humans would prove to be his salvation protecting him from the fate of many of his peers Drawing on interviews with the people who lived with Nim diapered him dressed him taught him and loved him Elizabeth Hess weaves an unforgettable tale of an extraordinary and charismatic creature His story will move and entertain at the same time that it challenges us to ask what it means to be human and what we owe to the animals who so enrich our lives Forest Economics Daowei Zhang, Peter H. Pearse, 2011-09-15 Forestry cannot be isolated from the forces that drive all economic activity It involves using land labour and capital to produce goods and services from forests while economics helps in understanding how this can be done in ways that will best meet the needs of people Therefore a firm grounding in economics is integral to sound forestry policies and practices This book a major revision and expansion of Peter H Pearse's 1990 classic provides this grounding Updated and enhanced with advanced empirical presentation of materials it covers the basic economic principles and concepts and their application to modern forest management and policy issues Forest Economics draws on the strengths

of two of the field's leading practitioners who have more than fifty years of combined experience in teaching forest economics in the United States and Canada. Its comprehensive and systematic analysis of forest issues makes it an indispensable resource for students and practitioners of forest management, natural resource conservation and environmental studies.

Coastal Resources Economics and Ecosystem Valuation J. Walter Milon, Sergio Alvarez, 2019-12-12. The practical importance of economic valuation information can hardly be overstated. Coastal and marine resource policy planning and management benefit from complete information on the impact of policy decisions. In addition, proper accounting of the impacts of these policy decisions is necessary for benefit cost analyses and measurements of economic growth over time. This special issue focuses on economic valuation of coastal and marine ecosystem services. Economic valuation provides methods and techniques to determine how changes in coastal and marine ecosystem services can be translated into benefits and costs to society. Economic values play an important role in everyday life and provide useful information about human welfare and happiness. Valuation provides a consistent framework to understand human nature interactions across a broad range of coastal and marine resources and to evaluate the costs and benefits of these interactions. The focus on ecosystem services provides new research on this perspective of human nature interactions that has profoundly changed the academic dialogue on natural systems but has had limited impact on public dialogue and the policy process.
