The Chemical Warfare Service From Laboratory To Field The Technical Services:

The Chemical Warfare Service: from Laboratory to Field Leo P. Brophy, 1959 The Chemical Warfare Service: From Laboratory to Field, 2010, *, 2011 **The Chemical Warfare Service** Leo P. Brophy, 1959 **The Chemical Warfare Service: The chemical warfare service; from laboratory to field**, 1959 The Chemical Warfare Service Leo P. Brophy, Wyndham D. Miles, Rexmond Canning Cochrane, 1959 This volume the second in a series of three devoted to the Chemical Warfare Service CWS in World War II now the Chemical Corps covers research development procurement and distribution of chemical warfare materiel It traces the history of these activities from the World War I period when the CWS was activated to supervise the offensive and defensive aspects of gas warfare throughout the Army until the end of World War II The first volume in the series Organizing for War discusses the development of the CWS organization and mission as well as personnel management and military training The third volume entitled Chemicals in Combat will deal with the chemical warfare activities in the theaters of operations In treating research and development the present volume concentrates on CWS projects that proved of greatest significance to the armed forces during World War II It attempts to point up the problems that arose in course of research and development and to indicate the solutions which the scientists hit upon Since research and development in the zone of the interior was closely related to research and development in the theaters of operations the volume covers activities in both areas In contrast to research and development procurement and distribution differed considerably as between the zone of the interior and the theaters of operations in the theaters these activities were closely associated with the commanders combat responsibilities The volume therefore confines itself to a review of procurement and distribution in the zone of the interior leaving narration of theater activities to the volume Chemicals in combat *The Chemical Warfare Service: from Laboratory to Field*, Leo P. Brophy, 1959 *The Chemical Warfare Service* Brooks E. Kleber, Dale Birdsell, 1966 **The Chemical Warfare Service: The chemical warfare service: chemicals in combat**, 1959 **Chemical Warfare** Edward M. Spiers, 2016-04-30 Ever since its employment in the First World War chemical warfare has always aroused controversy Governments have responded by pursuing the policies of disarmament and deterrence in the hope of avoiding its recurrence However despite the signing of the Geneva Protocol in 1925 which banned the use of poison gas chemical weapons have been used in subsequent conflicts and most recently in the Gulf War between Iraq and Iran In this work the policies of disarmament and deterrence will be reassessed within a broad historical and strategic context It will be argued that poison gas could still be used in a modern European conflict that the Soviet forces are the best equipped to operate in a contaminated environment and that weaknesses persist in NATO's anti chemical defences and in her deterrent It will be emphasised too that the Geneva disarmament talks which have made some progress in recent years still face formidable difficulties over the issues of verification and compliance Above all it will be claimed that the onset of nuclear parity between the superpowers has eroded the credibility of a deterrent to chemical attack

based upon the threat of nuclear release Accordingly this book will contend that the United States should modernize her stockpile of chemical weapons to bolster the Western deterrent and to provide more leverage for the negotiations in Geneva

Veterans at Risk Institute of Medicine, Committee on the Survey of the Health Effects of Mustard Gas and Lewisite, 1993-02-01 Recently World War II veterans have come forward to claim compensation for health effects they say were caused by their participation in chemical warfare experiments In response the Veterans Administration asked the Institute of Medicine to study the issue Based on a literature review and personal testimony from more than 250 affected veterans this new volume discusses in detail the development and chemistry of mustard agents and Lewisite followed by interesting and informative discussions about these substances and their possible connection to a range of health problems from cancer to reproductive disorders The volume also offers an often chilling historical examination of the use of volunteers in chemical warfare experiments by the U S military what the then young soldiers were told prior to the experiments how they were encouraged to remain in the program and how they were treated afterward This comprehensive and controversial book will be of importance to policymakers and legislators military and civilian planners officials at the Department of Veterans Affairs military historians and researchers
