Time in Powers of Ten Gerard 't Hooft, Stefan Vandoren, 2014 In this richly illustrated book Nobel Laureate Gerard 't Hooft and Theoretical Physicist Stefan Vandoren describe the enormous diversity of natural phenomena that take place at different time scales In the tradition of the bestseller Powers of Ten the authors zoom in and out in time each step with a factor of ten Starting from one second time scales are enlarged until processes are reached that take much longer than the age of the universe After the largest possible eternities the reader is treated to the shortest and fastest phenomena known Then the authors increase with powers of ten until again the second is reached at the end of the book At each time scale interesting natural phenomena occur spread over all scientific disciplines orbital and rotation periods of planets and stars decay times of elementary particles and atoms biological rhythms and evolution processes but also the different geological time scales Readership Science enthusiasts and students [America's Film Legacy](#) Daniel Eagan, 2010-01-01 Collection of the five hundred films that have been selected to date for preservation by the National Film Preservation Board and are thereby listed in the National Film Registry **Doug Pratt's DVD** Douglas Pratt, 2004-10 The ultimate guide to DVD by the world's leading authority on the medium [Charles and Ray Eames](#) Naomi Stungo, 2000 Charles and Ray Eames were a highly influential couple whose work included classic pieces of furniture and architecture during the 1940s and 1950s An essay and an illustrated appreciation of their life and work are included in this text [Metapatterns](#) Tyler Volk, 1996-06-29 In the interdisciplinary tradition of Buckminster Fuller's work Gregory Bateson's Mind and Nature and Fritjof Capra's Tao of Physics Metapatterns embraces both nature and culture seeking out the grand scale patterns that help explain the functioning of our universe *The Video Source Book* David J. Consulting Mastery Keith Merron, 2005-06-12 Most consultants are content to solve problems Extraordinary consultants alter the culture of the client organization itself changing the way the organization operates Keith Merron shows that the most powerful tool for making a real difference is the consultant's inner stance the attitudes assumptions beliefs goals and strategies that underlie the consulting practice In other words it is the inner qualities of the consultant that differentiate a great consultant from the rest of the pack Consulting Mastery explores the deep inner shift required to become an extraordinary consultant Through vivid examples Merron contrasts the goals strategies and tactics used by most consultants with those used by masterful consultants to reveal the qualities and characteristics that will help you make the

biggest difference with your clients If you yearn to have a bigger impact on your client organizations or even on the world as a whole Consulting Mastery shows how to transform yourself from a problem solver to an empowering partner Following a natural flow of learning it details the conceptual foundation of consulting mastery provides a vision of mastery in action and outlines a clear path to attaining mastery in oneself Grounded in Love Nancy L. Roth, Nancy Roth, 2008 Roth issues a passionate and hopeful challenge to people of faith and seekers for truth to become aligned with truth altruism and action which is good not only for the soul but for the well being of the planet **The Films of Charles and Ray Eames** Eric Schuldenfrei, 2014-12-05 The Films of Charles and Ray Eames traces the history of the Eameses work examining their evolution away from the design of mass produced goods and toward projects created as educational experiences Closely examining how the Eameses described their work reveals how the films and exhibitions they generated were completely at odds with the earlier objectives exemplified in their furniture designs Shifting away from promoting the consumer culture they turned their attention to the presentation of complex sets of scientific artistic and philosophical ideas During a critical period from the late 1950s to the early 1960s there was a moment of introspective self reflection in the West stemming from the events of the Cold War This moment of uncertainty was crucial for it provided the incentive to question the values and concerns of society as a whole In turn designers began to question their own sense of purpose temporarily expanding the purview of design to a broader field of inquiry In the case of the Eameses they identified an overriding problem related to consumerism and excess in America and sought to resolve the issue by creating a network of communication between universities governments institutions and corporations The solution of promoting greater education experiences as an alternative to consumerism in America required that different sectors of society functioned in unison to address political social economic and educational concerns The Films of Charles and Ray Eames reconsiders how design intersects with humanity culture and the sciences **Bowker's Complete Video Directory**, 2000 Bigger Than Life Mary Ann Doane, 2021-10-18 In Bigger Than Life Mary Ann Doane examines how the scalar operations of cinema especially those of the close up disturb and reconfigure the spectator's sense of place space and orientation Doane traces the history of scalar transformations from early cinema to the contemporary use of digital technology In the early years of cinema audiences regarded the monumental close up particularly of the face as grotesque and often horrifying even as it sought to expose a character's interiority through its magnification of detail and expression Today large scale technologies such as IMAX and surround sound strive to dissolve the cinematic frame and invade the spectator's space immersing them in image and sound The notion of immersion Doane contends is symptomatic of a crisis of location in technologically mediated space and a reconceptualization of position scale and distance In this way cinematic scale and its modes of spatialization and despatialization have shaped the modern subject interpolating them into the incessant expansion of commodification *CD-ROMs in Print*, 2003 *Ethical Materialities in Art and Moving Images* Silke Panse, 2024-12-26 Starting from the

premise that after modernism and postmodernism in the Anthropocene an artwork cannot rest upon its separation from the planet this volume develops new ethical practice and thought with respect to art philosophy and moving images Practitioners and theorists examine how the relations between the ethical and the material figure in a context in which a dearth of ethical practice and thought has caused the materialities of the Anthropocene and the climate catastrophe Ethics are generally regarded as constituted through immaterial relations guided by moral imperatives By contrast this volume argues that the singular ethicalities that are manifested in a work cannot be captured by abstract ethics The explorations of the ethical here are not prescriptive but creative Through artistic and philosophical thought and practice the contributions move beyond the division between an active practice of ethics and a contemplative theory of aesthetics They ask what ethicalities and materialities are at play in the relations between the artist the art their worlds and the planet after new materialism and posthumanism Rather than transcending the ethical through the material or the material through the ethical the contributions articulate the singular relations between them and consider the inter and intra active ethical and material relations of art and images in biodiverse environments They suggest that to bring out the ethical dimensions of the material and the material dimension of the ethical without identifying one with the other is a responsibility of art and images
