G. Kirby, 1980-01-18 Examines Finland s search for a national identity      **American Conception Of Neutrality After 1941** Jurg M Gabriel, 1988-10-28      **Deterrence, Reputation and Cold-War Cycles** John D. Orme, 1992-06-18 A historical reexamination of the Cold War s cyclical pattern It aims to show how Soviet aggressiveness was most likely to occur when the credibility of US efforts at deterrence was damaged by the inability or unwillingness of the US to meet previous challenges      **The Germans And Their Neighbors** Dirk Verheyen, Christian Soe, 2019-07-09 For Germany s neighbors perhaps more acutely than for observers elsewhere the 1990 reunification of divided Germany has raised old memories and new concerns in public and scholarly discourse The shape and influence of these issues are the subject of this unique ambitious book Organized into country specific chapters the book offers original expert analyses of Germany s relations with seventeen European neighbors as well as with the United States The contributors explore the essential concerns these nations have faced in their bilateral relations with Germany past present and future In their introduction the editors trace both commonality and diversity in various national conceptions of the German Question and the ways in which these perceptions in turn generate shared as well as divergent national policy agendas vis a vis united Germany      **Finland's Relations with the Soviet Union, 1944-84** R. Allison, 1985-02-18      **Finland's Search for Security through Defence, 1944-89** Risto E.J. Penttila, 1991-06-18 Based on the author s doctoral dissertation at Oxford this study examines with a historical perspective the national defence strategy of Finland 1944 1989 The author explores Finland s dilemma with respect to its geographic position and the Cold War politics between the US and the USSR      **Securing Europe's Future** Stephen J. Flanagan, Fen Osler Hampson, 2021-01-26 This book first published in 1986 analyses a number of emerging enduring and neglected issues that affected European security and the stability of the Atlantic Alliance at the end of the Cold War It provides a comprehensive review of the major political social and economic issues that shaped the course of European

security It offers a thorough assessment of such critical questions as European views of the US Strategic Defense Initiative the contribution of new technologies and tactics to NATO s conventional defence capabilities and domestic factors that influenced security policy It also provides original analysis of a number of issues such as economic dimensions of security the quest for a European defence identity and protection of Western interests outside the NATO area It provides a review of the nuclear question and of the German security debate in the aftermath of the initial US INF missile deployments

Hwang,1980-01-01 **Human Rights Treaties** Mark Sachleben,2005-12-13 The book examines patterns of participation in human rights treaties International relations theory is divided on what motivates states to participate in treaties specifically human rights treaties Instead of examining the specific motivations this dissertation examines patterns of participation In doing so it attempts to match theoretical expectations of state behavior with participation This book provides significant evidence that there are multiple motivations that lead states to participate in human rights treaties **Military R&D after**

**the Cold War** Philip Gummert,Mikhail Boutoussov,Janos Farkas,Arie Rip,2012-12-06 Countries establish defence industries for various reasons Chief among these are usually a concern with national security and a desire to be as independent as possible in the supply of the armaments which they believe they need But defence industries are different from most other industries Their customer is governments Their product is intended to safeguard the most vital interests of the state The effectiveness of these products in the real rather than the experimental sense is not normally tested at the time of purchase If or when it is tested many other factors such as the quality of political and military leadership enter into the equation so complicating judgments about the quality of the armaments and about the reliability of the promises made by the manufacturers All of these features make the defence sector an unusually political industrial sector This has been true in both the command economies of the former Soviet Union and its satellites and in the market or mixed economies of the west In both cases to speak only a little over generally the defence sector has been particularly privileged and particularly protected from the usual economic vicissitudes In both cases too its centrality to the perceived vital interests of the state has given it an unusual degree of political access and support **An Introduction to European Intergovernmental**

**Organizations** Marc Cogen,2016-04-15 An Introduction to European Intergovernmental Organizations provides an up to date and accessible reference to European intergovernmental organizations other than the European Union The EU is so dominant that people often overlook the multitude of older and newer smaller and larger intergovernmental organizations

rooted in the history of contemporary Europe which continue to help shape its future. The specialized character of these organizations adds value to cooperation in Europe as a whole, creates permanent channels of communication regardless of EU membership and allows the possibility for non-European involvement through organizations such as the European Bank for Reconstruction and Development and NATO. It also allows sub-regional groups of states such as the Nordic countries or the Benelux countries to exist and express their own identity via their own organizations. This book looks at the history of Non-EU organizations, their decision-making characteristics, membership policies, legal powers, actions and interactions with each other and the European Union. A uniform scheme of analysis is used to make European intergovernmental organizations comparable and by studying them we gain a deeper understanding and insight into European affairs. *Defending Democracy in Cold War Finland* Marek Fields, 2019-12-02. In *Defending Democracy in Cold War Finland*, Marek Fields offers a thorough account on the various informational and cultural strategies Britain and the United States used during the early Cold War decades in order to increase their influence and contain communism in Finland. The book shows that by using propaganda and cultural diplomacy in an exceptionally challenging environment, the two Western powers were able to achieve their main objectives in the region, i.e. to defend democracy and strengthen Finland's attachment to the West surprisingly well. Making use of a large variety of British, American and Finnish archives, Fields proves that the Western countries' interest in Finland during the Cold War was stronger than it has previously been realised. *The Baltic World 1772-1993* David Kirby, 2014-07-15. This eagerly awaited sequel shares the characteristics of its distinguished predecessor: wide geographical and chronological span, expert mingling of political, social and economic history, and Dr Kirby's ability to keep the separate national threads of his account from tangling as he weaves them into the broad regional picture that is his main concern. Here he tackles the contrasting experiences of Europe's northern periphery: affluence and democracy in the north, stagnation and authoritarianism in the south, from the French Revolution to the collapse of the USSR and beyond. This is a masterly study of a region that is far from peripheral, politically to the post-Soviet world. **Yearbook of Finnish Foreign Policy**, 1982.
