This study explains how Westland dominated British helicopter production and why government funding and support failed to generate competitive all British alternatives In doing so the book evaluates broader historiographic assumptions about the purported failure of british aircraft procurement during the early post war period and considers the scope and limitations of licensed production as a government mandated procurement strategy **The Development of British Naval Aviation, 1914-1918** Alexander Howlett,2021-06-08

The Royal Naval Air Service RNAS revolutionized warfare at sea on land and in the air This little known naval aviation organization introduced and operationalized aircraft carrier strike aerial anti submarine warfare strategic bombing and the air defence of the British Isles more than 20 years before the outbreak of the Second World War Traditionally marginalized in a literature dominated by the Royal Flying Corps and the Royal Air Force the RNAS and its innovative practitioners nevertheless shaped the fundamentals of air power and contributed significantly to the Allied victory in the First World War The Development of British Naval Aviation utilizes archival documents and newly published research to resurrect the legacy of the RNAS and demonstrate its central role in Britain s war effort **A Bibliography of British History, 1914-1989** Keith Robbins,American Historical Association,Royal Historical Society (Great Britain),1996

This first volume in the seminal series on World War II aerial combat pilots and tactics that reads like an encyclopedia on the subject Portland Book Review In the early days of World War II both Allied and Axis powers extended the theater of war to North Africa where hard fought battles were conducted in the harsh desert But before anyone could claim victory on the ground they had to hold dominion in the air Here historian Christopher Shores has combined his books *Fighters over the Desert* and *Fighters over Tunisia* into one volume as well as adding updated information about the deadly fighter aircraft reconnaissance aircraft and maritime units active in the Mediterranean Full of in depth research and featuring essential maps this is an intimate introspection by these men of their experiences and the respect that they shared not only for each other but also their adversaries The Military Reviewer *A History of the Mediterranean Air War, 1940-1945. Skua! Peter C. Smith,2007-03-28 The Blackburn Skua was the first monoplane to be designed and built for the Royal Navy in the 1930s As a result of continued debate it became a compromise between the Navy's desire for a carrier based dive bomber and RAF's preference for a fighter Despite being the first to shoot down a Luftwaffe aircraft in World War II early operations in Norway found the type woefully inadequate as a fighter As a dive bomber the Royal Navy put the design to good use from the outset of WWII It was involved with the hunt for the Graff Spee sunk the major warship Koln suffered with great loss in an attack on the Scharnhorst helped to keep the German advance at bay during the Dunkirk evacuation and attacked the French rogue battleship Richelieu in the Mediterranean This book relates how the final design was created how the dive bombing technique was developed and perfected by naval pilots and traces the wartime operational career of the type with many first hand accounts

Aeronautics Jean M. Kolbeck,United States. Air Force. Pacific Air Forces,1966

[Reader's Guide to Military History](#) Charles Messenger,2013-10-31 This book contains some 600 entries on a range of topics from ancient Chinese warfare to late 20th century intervention operations

Designed for a wide variety of users it encompasses general reviews of aspects of military organization and science as well as specific wars and conflicts The book examines naval and air warfare as well as significant individuals including commanders theorists and war leaders Each entry includes a listing of additional publications on the topic accompanied by an article discussing these publications with reference to their particular emphases strengths and limitations **Torpedo Bombers**

Peter C. Smith,2008-03-27 This is a highly illustrated history one of the most deadly types of attack aircraft The torpedo bomber first appeared during the later years of World War One but served their most useful role in the Second World War The most famous attacks include Taranto where Fairey Swordfish destroyed the Italian Battle fleet and the infamous surprise attack on Pearl Harbor by the Japanese In both these cases the attacks were against ships laying in harbor and therefore stationary Heavy defensive anti aircraft fire was the greatest danger to the torpedo bombers in those circumstances but ships under way in the open sea had far more room to take evasive action The lengthy time it took a torpedo to reach its target allowed many ships to escape destruction However notable exceptions were the sinking HMS Prince of Wales and HMS Repulse by the Japanese during the early stages of the war in the Far East During the hunt for the Bismar it was an air launched torpedo from a Swordfish that severely damaged the ships steering gear and enabled the Royal Navy to close in for the final kill Some of the types included are the Fairey Swordfish Bristol Beaufort Fairey Albacore Bristol Beaufighter Heinkel He 115 Marchetti SM 79 Fokker T VIII Grumman Avenger and the Nakajima B5N **The Royal Navy and**

Nuclear Weapons Richard Moore,2018-12-07 This work examines British thinking about nuclear weapons in the period up to about 1970 looking at the subject through the eyes of the Royal Navy in the belief that this can offer new insights in this field The author argues that the Navy was always sceptical about nuclear weapons both on practical grounds and because of wartime and pre war experiences He suggests that this scepticism can teach us a good deal about military technological innovation in general Catapult Aircraft Leo Marriott,2020-01-24 A concise history of this specialty aircraft used during

World Wars I and II During World War I the navies of the opposing forces discovered the value of aerial reconnaissance and many experiments were made to allow larger warships to carry one or sometimes two aircraft aboard In the early days these were float planes that were lowered by crane into the sea and then lifted back aboard upon their return This was a lengthy affair and when a speedy departure was necessary time was of the essence A new system was devised so that a powerful catapult system and a short ramp could with the added speed of the ship get an aircraft airborne in a fraction of the time previously required Thus was born a highly specialised type of aircraft This book includes all the major designs that went to war in the First and Second World Wars and includes aircraft used by all the combatants It looks at how the aircraft evolved and how the warships were modified to accommodate the aircraft and the catapult system The use of these fixed wing aircraft was abandoned when the invention of the helicopter was made in the early post WWII years **Index of Model**

Periodicals, 1971-75 Paul Cardwell,1977 **A History of the Royal Navy: World War I** Mike

Farquharson-Roberts, 2014-07-08 For many years the naval warfare of World War I has been largely overlooked yet at the outbreak of that war the British Government had expected and intended its military contribution to the conflict to be largely naval Britain was not simply defending an island it was defending a far flung empire Without the navy such an undertaking would have been impossible Following the naval arms race in the early 20th century both Britain and Germany were equipped with the latest naval technology including revolutionary new vessels such as dreadnoughts and diesel powered submarines Although the Royal Navy's operations in World War I were global most of the fleet's strength was concentrated in the Grand Fleet which confronted the German High Seas Fleet across the North Sea At the Battle of Jutland in 1916 the Royal Navy under the command of Admiral Jellicoe fought an iconic if inconclusive battle for control of shipping routes 43 244 Royal Navy personnel lost their lives fighting on the seas in World War I This book tells their story and places the navy back at the heart of the British war effort
