British Consciousness and Identity Brendan Bradshaw, Peter Roberts, 2003-12-18 The historical resonances of the concept of Britain for the communities of the Atlantic Archipelago in the early modern period are explored here in terms of the ideological demands made upon it Various and competing concepts of Britishness are examined from the Henrician legislation which united Wales with England and which created the kingdom of Ireland to the Act of Union of the realms of England and Scotland The chequered history of the consciousness of Britain as a polity which embraced the united kingdoms is discussed in relation to the distinctive national identities of the constituent countries and the question of the impact of Britain on English policy making under the Tudor Stuart and the first Hanoverian monarchs is addressed The puzzling resistance of the Irish to assimilation in contrast to the docility of the Welsh and eventually of the Scots is also explored

Echoes of Success: Identity and the Highland Regiments Ian Stuart Kelly, 2015-03-31 In *Echoes of Success* Ian Stuart Kelly uses new information about late Victorian Scottish Highland battalions to provide new insights into how groups identify themselves and pass that sense on to successive generations of soldiers Kelly applies concepts from organisational theory the study of how organisations function to demonstrate how soldiers experiences create a blueprint of expected behaviours and thought patterns that contribute to their battalion s continued success This model manages the interplay between public perception and actual life experiences more effectively than current approaches to understanding identity Also Kelly s primary research offers a more certain description of soldiers life faith education and discipline than has previously been available
