posits its centrality to women's engagement with national and gender politics. This study examines four travel narratives written by women between 1774 and 1795 convincingly arguing that they effectively deploy the discourse of sensibility to engage with debates around Britain's national identity during the French and American Revolutions. Van Netten Blimke contends that Laurence Sterne's *A Sentimental Journey* 1768 which first introduced sentimental discourse to the travelogue facilitated women's gradual inclusion into this previously male dominated genre effectively paving the way for women to influence the country's sociopolitical transformation. These four previously understudied works successfully combine eyewitness authority with the language of sensibility to mount impassioned interventions in their nation's perception and practice of revolutionary politics at a time when its national identity was most in flux.
