Bibliography for 2007 How Maritime Trade and the Indian Subcontinent Shaped the World Nick Collins, 2022-01-28
World wide maritime trade has been the essential driver of wealth creation economic progress and global human contact
Trade and exchange of ideas have been at the heart of economic social political cultural and religious life and maritime
international law These claims are borne out by the history of maritime trade beginning in the Indian Ocean and connecting
to Southeast Asia Japan the Americas East Africa the Middle East especially the Persian Gulf the Mediterranean and Europe
This development predates the end of the Ice Age with worldwide flooding and stimulated the establishment of land based
civilizations in the above regions with particular effect on the Greek and Roman empires and even China s Celestial empire
The Indian subcontinent was the original major player in maritime trade linking oceans and regions Global maritime trade
declined with the fall of Mediterranean empires and the dark age in Europe but revived with Indian Ocean and Asian
maritime networks Shipping and trade studies are hugely practical but can be technical legalistic and even dull for non
specialists But this history is a broadly based and exciting account of human interaction at multiple levels for general readers
specialists and practitioners It is based on huge reading and rare sources and with an attractive writing style and full of
fascinating sidelights illuminating the historical narrative and from an author with lifelong experience in international

Booklist Antiquity and Enlightenment Culture , 2020-03-31 This volume represents the first move towards a
comprehensive overview of the place of antiquity in Enlightenment Europe Eschewing a narrow focus on any one theme it
seeks to understand eighteenth century engagements with antiquity on their own terms focusing on the contexts questions

and agendas that led people to turn to the ancient past The contributors show that a profound interest in antiquity permeated all spheres of intellectual and creative endeavour from antiquarianism to political discourse travel writing to portraiture theology to education They offer new perspectives on familiar figures such as Rousseau and Hume as well as insights into hitherto obscure antiquarians and scholars What emerges is a richer more textured understanding of the substantial eighteenth century engagement with antiquity

Writing the History of Crime Paul Knepper, 2015-12-17 *Writing the History of Crime* investigates the development of historical writing on the subject of crime and its wider place in social and cultural history It examines long standing and emerging traditions in history writing with separate chapters on legal and scientific approaches as well as on urban Marxist gender and empire history Each chapter then explores these historical approaches in relation to crime paying particular attention to the relationship between theory and the interpretation of evidence Rather than a timeline for the historical appearance of ideas about crime or a catalogue of the range of topics that comprise the subject matter *Writing the History of Crime* reveals the ideas behind crime as a subject of historical investigation it looks at how these ideas generate questions that may be asked about the past and the way in which these questions are answered This is a crucial analysis for anyone interested in the history of crime the historiography of social history or the art of history writing more broadly

The History of Migration in Europe Francesca Fauri, 2014-10-03 *The History of Migration in Europe* belies several myths by arguing for example that immobility has not been the normal condition of people before the modern era Migration far from being an income maximizing choice taken by lone individuals is often a household strategy and local wages benefit from migration This book shows how successes arise when governments liberalize and accompany the international movements of people with appropriate legislation while failures take place when the legislation enacted is insufficient belated or ill shaped Part I of this book addresses mainly methodological issues Past and present migration is basically defined as a cross cultural movement cultural boundaries need prolonged residence and active integrationist policies to allow cross fertilization of cultures among migrants and non migrants Part II collects chapters that examine the role of public bodies with reference to migratory movements depicting a series of successes and failures in the migration policies through examples drawn from the European Union or single countries Part III deals with challenges immigrants face once they have settled in their new countries Do immigrants seek integration in their host culture Through which channels is such integration achieved and what roles are played by citizenship and political participation What is the identity of migrants and their children born in the host countries This text's originality stems from the fact that it explains the complex nature of migratory movements by incorporating a variety of perspectives and using a multi disciplinary approach including economic political and sociological contributions
