The Human Body Ascesis And Exercise:

A Different Christianity Robin Amis, 2003-06-13 This book presents the esoteric original core of Christianity with its concern for illuminating and healing the inner life of the individual It is a bridge to the often difficult doctrines of the early church fathers explains their spiritual psychology and provides new insights for studying and following the spiritual path outside a monastery

Soul and Body Diseases, Remedies and Healing in Middle Eastern Religious Cultures and Traditions, 2023-07-31 Aiming to develop a less studied literary genre this book provides a well rounded picture of spiritual and physical diseases and their remedies as they were ingrained in the imagination and practices of Middle Eastern Abrahamic cultures with a special emphasis of Christian communities Greeks Byzantines Syrians Armenians Georgians Ethiopians The volume traces traditions dealing with the onset of a disease in the body and soul the search for remedy the maintenance of healing and the engagement of these processes with faith either through their affirmation in the public sphere or remaining within the personal framework as in monastic traditions A recurring presence in religious literature and the history of the intellectual world the confrontation between disease and healing may well still be current for our modern understanding of the paths to seeking and maintaining the health of one s body and soul without excluding the factor of faith as a core principle

Corporeality, Medical Technologies and Contemporary Culture Francisco Ortega, 2013-12-17 Corporeality Medical Technologies and Contemporary Culture engages the confusions and contradictions in current attitudes to and practices of the body

Meditation in Judaism, Christianity and Islam Halvor Eifring, 2013-10-24 Meditative practices have flourished in widely different parts of Eurasia yet historical research on such practices is limited Research to date has focused on contexts rather than actual practices and within individual traditions For the first time in one volume the meditative practices of the three traditions of Judaism Christianity and Islam are examined They are viewed in a global perspective considering both generic and historical connections to practices in other traditions particularly in India and East Asia Their cultural and historical peculiarities are examined comparing them both to each other and to Asian forms of meditation The book builds on a notion of meditation as self administered techniques for inner transformation a definition which focuses on transformative practice rather than notions of meditative states and mystical experiences It proposes ways of studying meditative practice historically and concludes with an essay on the modern scientific interest in meditation

The Cyclopaedia; Or, an Universal Dictionary of Arts, Sciences, and Literature Abraham Rees, 1819

Reforming the Art of Living Rico Vitz, 2014-10-20 Descartes s concern with the proper method of belief formation is evident in the titles of his works e g *The Search after Truth* *The Rules for the Direction of the Mind* and *The Discourse on Method* of rightly conducting one s reason and seeking the truth in the sciences It is most apparent however in his famous discussions both in the *Meditations* and in the *Principles* of one particularly noteworthy source of our doxastic errors namely the misuse of one s will What is not widely recognized let alone appreciated

and understood is the relationship between his concern with belief formation and his concern with virtue In fact few seem to realize that Descartes regards doxastic errors as moral errors and as sins both because such errors are intrinsically vicious and because they entail notably deleterious social consequences Reforming the Art of Living seeks to rectify this rather common oversight in two ways First it aims to elucidate the nature of Descartes s account of virtuous belief formation Second it aims both i to illuminate the social significance of Descartes s philosophical program as it relates to the understanding and practice not of science but of religion and ii to develop a kind of Leibnizian critique of this aspect of his program More specifically it aims to show that Descartes s project is dangerous insofar as it is subversive not only of traditional Christianity but also of other traditional forms of religion both in theory and in practice

Organizational Studies: Selves and subjects ,2001 **Back to the Future of the Body** Dominic Janes,2013-02-14 What can the past tell us about the future s of the body The origins of this collection of papers lie in the work of the Birkbeck Institute for the Humanities which has been involved in presenting a series of international workshops and conferences on the theme of the cultural life of the body The rationale for these events was that in concepts as diverse as the cyborg the questioning of mind body dualism the contemporary image of the suicide bomber and the patenting of human genes we can identify ways in which the future of the human body is at stake This volume represents an attempt not so much to speculate about what might happen but to develop strategies for bodily empowerment so as to get back to the future of the body The body it is contended is not to be thought of as an object or a sign but as an active participant in the shaping of cultural formations And this is emphatically not an exercise in digging corpses out of the historical archive The question is rather what can past lived and thought experiences of the body tell us about what the body can be come The continuing vitality of debate around the body was proven by the range and depth of the papers presented at the workshop on which this volume is based does the body have a future Our overall theme required contributors to think through embodiment in the past This they did with considerable interdisciplinary vigour rigorousness and imagination Prof Donna Dickenson Director Birkbeck Institute of the Humanities
