

DICHOTOMY

A dichotomy occurs when we construct two mutually exclusive categories that are opposites, lacking in overlap, and do not fit along a sliding scale.

EXPLANATION

Dichotomies allow us to categorize and compare different things.

However, dichotomies can often be overly simplistic and reductionist. They cannot capture the complexities of social reality and can sometimes be misleading. So, while they serve as a significant tool of knowledge, it is necessary to understand their limitations.

EXAMPLES

1. Individual / Society
2. Objective / Subjective
3. Tradition / Modernity
4. Formal / Informal
5. Male / Female
6. Public / Private
7. Nature / Nurture
8. Global / Local

Vistas of Modernity Rolando Vázquez, 2024-11-07 We are living in a time of polarization Cultural and educational institutions are confronted with the responsibility to provide tools and spaces for critical reflection for engagement and more fundamentally for meeting and recognizing each other in our differences In this decolonial essay Rolando Vázquez introduces his critique which offers an option for thinking and doing beyond the dominant paradigms It provides a critical analysis of modernity understood broadly as the western project of civilization while it seeks to overcome the dominion of western epistemology and aesthetics and their embedded eurocentrism and anthropocentrism Importantly for decolonial thought we are all located in relation to the colonial difference that structures our modern colonial order It is only from an awareness of our positioned realities that we can enter in relation with each other that we can listen to each other and learn each other Vistas of Modernity is a new title in a series of essays commissioned by the Mondriaan Fund concerning actual topics about visual arts and cultural heritage Rolando Vázquez is co organizer of the Decolonial Summer School in Middelburg He is associate professor of Sociology at University College Roosevelt of Utrecht University in The Netherlands

The Human-Animal Relationship as a Subject of Citizenship Education Jennifer Bloise, 2025-09-26 The aim of this book is to explore the human-animal relationship as a new subject of political education and to make it accessible for critical reflection A guiding thesis is that society's relationship with animals is both political and problematic as it is shaped by power structures and rarely recognized as an issue due to its status as an unexamined norm To explore this topic the model of didactic reconstruction is employed A problem centered interview study is used to reconstruct students

everyday conceptions of animals humans and their political relationship These conceptions are then compared with academic perspectives particularly from Human Animal Studies in order to uncover contradictions and taken for granted assumptions and to identify exemplary didactically fruitful approaches to the subject The author concludes that future engagement with the human animal relationship in the context of political education should be critically oriented toward power structures This would enable reflective and multi perspective political judgment on the human animal relationship making the invisible visible *Superstructuralism* Richard Harland,2013-10-08 First Published in 2002 It is easy to see that we are living in a
