## **The Human Organism:**

**Spirit as Sculptor of the Human Organism** Rudolf Steiner, 2014-12-15 Rudolf Steiner tackles an eclectic series of subjects united by the common theme of rediscovering how spirit pervades life. Among these he discusses experiences during sleep, the human spirit and soul between death and a new birth, how spirit sculpts the human organism, karma, and the transition to a new life on earth, and the human being's faculties of hearing, speaking, singing, walking, and thinking. Together, these lectures offer a cornucopia of spiritual insights and wisdom for the present day. *The Effects of Oxygen Deprivation (high Altitude)*

Renfro, 1980-01-01 **The Human Organism as a Person** Samuel Howard Bartley, 1967 **A Materialist Metaphysics**

**of the Human Person** Hud Hudson, 2018-10-18 Hud Hudson presents an innovative view of the metaphysics of human persons according to which human persons are material objects but not human organisms. In developing his account, he formulates and defends a unique collection of positions on parthood, persistence, vagueness, composition, identity, and various puzzles of material constitution. The author also applies his materialist metaphysics to issues in ethics and in the philosophy of religion. He examines the implications for ethics of his metaphysical views, for standard arguments addressing the moral permissibility of our treatment of human persons and their parts, fetuses and infants, the irreversibly comatose, and corpses. He argues that his metaphysics provides the best foundation in the philosophy of religion for the Christian doctrine of the resurrection of the body. Hudson addresses a broad range of metaphysical issues, but among his most strikingly original contributions are his defense of the Partist view according to which a material object can exactly occupy multiple overlapping regions of spacetime and his argument for the compatibility of Christianity with a materialistic theory of human persons.

**Decoding the Human Body-Field** Peter H. Fraser,Harry Massey,2008-03-20 A revolutionary system that reestablishes the proper flow of information to the body s energetic fields to promote health Presents a new integrative model of the energetic physiology of the human body the human body field and its influence on health Shows that a root cause of disease is due to information blockages in the body field Introduces Infoceuticals liquid remedies that help the human body field process vital information to engage the physical body s self healing abilities After decades of research Peter Fraser has

formulated a system that unites the meridian system of traditional Chinese medicine with quantum wave theory to provide the first comprehensive link between the human body's biochemistry and bioenergetics. He explains that we each have a body field based on twelve meridian-like channels that process and coordinate information throughout the body and that our health depends on the proper flow and communication of information through these channels. In *Decoding the Human Body Field*, Fraser and Massey describe in detail their revolutionary Nutri Energetics System, which uses Infoceuticals—liquids infused with organic colloidal minerals that are imprinted with corrective quantum electrodynamic information—to remedy distortions and blockages in the information flow of the body field. The imprinted information acts as a magnetic signpost to engage the body's self-healing ability.
