**Politics and Policies for Water Resources Management in India** M. Dinesh

Kumar, 2020-06-29 This comprehensive volume explores the interface between politics and policy making in the water

management sector of India The authors discuss the nature of the political discourse on water management in India and what

characterizes this discourse They also explore how this discourse has influenced the process of framing water related policies

in India particularly through the academics bureaucrat politician nexus and the growing influence of the civil society groups

on policy makers which are the defining feature of this process and which have produced certain policy outcomes that are

not supported by sufficient scientific evidence The book reveals that the social and management sciences despite being

increasingly relevant in contemporary water management are unable to impress upon traditional engineer dominated water

administration to seek solutions to complex water problems owing to a lack of interdisciplinary perspective in their research

The authors also examine the current deadlock in undertaking sectoral reforms due to existing water policies not being

honoured This collection includes several research studies which suggest legal institutional policy alternatives for addressing the problems in areas such as irrigation rural and urban water supply flood control and adaptation to climate variability and change It was originally published as a special issue of the International Journal of Water Resources Development
