Prominent transition scholars have paid attention to the contribution of both Protestant and Catholic churches to the democratic transition. Samuel P. Huntington noted in his *The Third Wave* that “by the early 1980s the churches had become ‘the principal forum for opposition to the regime’... and the Christian churches, their leaders and communicants, were a major force bringing about the transition to democracy in 1987 and 1988.”¹ With specific reference to Korea, Bruce Cumings pointed out that “the circumstance in which the Park and Chun regimes fell, or entered into crisis, bear remarkable comparison to the Latin American cases ... O’Donnell and Schmitter’s recent, eloquent description of the explosion of a highly repoliticized and angry society’ fits the Korean case perfectly ... churches have been critical sanctuaries for dissidents ... often being the only institution relatively immune from regime intrusion.”² Korean political scientist Jang Jip Choi shared similar views with Huntington and Cumings that “churches played a

Christian Churches Donald W. Norwood, How has Christianity engaged with democracy In this authoritative new treatment of a sometimes troubled relationship Donald Norwood reflects on the way that democracy has become especially under the auspices of the United Nations and the World Council of Churches not just an ideal but a universally applicable moral principle Yet as the author demonstrates faith and democracy have not always sat comfortably together For example the Vatican has dealt harshly with radical theologians such as Leonardo Boff and Hans Kung while churches with a dictatorial style have all too often shown a willingness to accommodate authoritarian regimes and even dictators Norwood argues that if democracy is a universal norm a basic right it is not possible for the Church to be indifferent to its claims Offering a sustained exposition from Marsilius of Padua to Christian Democracy and Christian Socialism of the often uneasy interaction between Christianity and democratic politics as both idea and ideal this is a major contribution to church history and to wider topical debates in politics and religious studies

Religious Organizations and Democratization Deborah A. Brown, 2006 Since the terrorist attacks on 9 11 the political roles of religious institutions and groups have captured international attention This book examines how religious institutions and organizations in various Asian countries are influencing democratic development and the shaping of government policies Religious Organizations and Democratization covers Taiwan Hong Kong Mainland China Korea Thailand the Philippines Malaysia Indonesia and Japan The chapters specifically address the engagement of Christian Buddhist Muslim and other religious organizations in the advancement and or hindrance of democratization in the region The contributors consider such questions as Why have some religious organizations played a decisive role in democratic transitions while others remained politically dormant and other still acted in conservative alliances to block democratic development Why did some religious organizations that once were active and instrumental to democratic change lose their political vitality as soon as civil liberties were successfully introduced And why did other religious organizations irrespective of their roles in the process of democratic transition emerge as key political forces in the civil society

The Catholic Church and the Nation-State Paul Christopher Manuel, Lawrence C. Reardon, Clyde Wilcox, 2006-08-16 Presenting case studies from sixteen countries on five continents The Catholic Church and the Nation State paints a rich portrait of a complex and paradoxical institution whose political role has varied historically and geographically In this integrated and synthetic collection of essays outstanding scholars from the United States and abroad examine religious diplomatic and political actions both admirable and regrettable that shape our world Kenneth R Himes sets the context of the book by brilliantly describing the political influence of the church in the post Vatican II era There are many recent instances the contributors assert where the Church

has acted as both a moral authority and a self interested institution in the United States it maintained unpopular moral positions on issues such as contraception and sexuality yet at the same time it sought to cover up its own abuses it was complicit in genocide in Rwanda but played an important role in ending the horrific civil war in Angola and it has alternately embraced and suppressed nationalism by acting as the voice of resistance against communism in Poland whereas in Chile it once supported opposition to Pinochet but now aligns with rightist parties With an in depth exploration of the five primary challenges facing the Church theology and politics secularization the transition from serving as a nationalist voice of opposition questions of justice and accommodation to sometimes hostile civil authorities this book will be of interest to scholars and students in religion and politics as well as Catholic Church clergy and laity By demonstrating how national churches vary considerably in the emphasis of their teachings and in the scope and nature of their political involvement the analyses presented in this volume engender a deeper understanding of the role of the Roman Catholic Church in the world
