The Dialectical Imagination Martin Jay, 1996-03-05 Publisher Description

The Frankfurt School and the Challenge of Fascism Claudio Corradetti, 2025-10-14 Fascism is a well defined historical phenomenon but its political ideological offshoots have extended into today's democracies How should we understand the mimetic and dissimulating capacity of fascism Starting from the analyses of the exponents of the first Frankfurt School in their rethinking of the Marxian relationship of structure and superstructure this study considers how fascism may be defined as a specific organization of power together with a form

of economic planning accompanied by a masochistic propensity to power Drawing on archival research at the Horkheimer and Marcuse Archive in Frankfurt the author guides us through unpublished documents of the Institute of Social Research in the years 1938 1939 concerning the plan to formulate a theory on fascism This was never produced as a single work allowing space instead to the flourishing of different contributions The objective of this book is to provide an internal systemic reading of fascism finding points of mutual integration among critical theorists whenever possible while revealing irreconcilable divergencies when necessary This topical book will be of interest to academics and researchers working in the areas of philosophy the history of ideas legal philosophy critical theory economics and political science Catalogue of Publications Issued by the Government of the United States United States. Superintendent of Documents, 1943-07 February issue includes Appendix entitled Directory of United States Government periodicals and subscription publications September issue includes List of depository libraries June and December issues include semiannual index **The Betrayal** Kim Christian Priemel, 2018-05-17 At the end of World War II the Allies faced a threefold challenge how to punish perpetrators of appalling crimes for which the categories of genocide and crimes against humanity had to be coined how to explain that these had been committed by Germany of all nations and how to reform Germans The Allied answer to this conundrum was the application of historical reasoning to legal procedure In the thirteen Nuremberg trials held between 1945 and 1949 and in corresponding cases elsewhere a concerted effort was made to punish key perpetrators while at the same time providing a complex analysis of the Nazi state and German history Building on a long debate about Germany's divergence from a presumed Western path of development Allied prosecutors sketched a historical trajectory which had led Germany to betray the Western model Historical reasoning both accounted for the moral breakdown of a civilised nation and rendered plausible arguments that this had indeed been a collective failure rather than one of a small criminal clique The prosecutors therefore carefully laid out how institutions such as private enterprise academic science the military or bureaucracy which looked ostensibly similar to their opposite numbers in the Allied nations had been corrupted in Germany even before Hitler's rise to power While the argument depending on individual protagonists subject matters and contexts met with uneven success in court it offered a final twist which was of obvious appeal in the Cold War to come if Germany had lost its way it could still be brought back into the Western fold The first comprehensive study of the Nuremberg trials The Betrayal thus also explores how history underpins transitional trials as we encounter them in today's courtrooms from Arusha to The Hague
