## **The Firing Squad:**

**Great Canadian War Stories** Muriel Whitaker, 2001-10 Canada is renowned today for its role as a world peacekeeper. However, the country also played an important role in the wars of the twentieth century. *Great Canadian War Stories* shows how Canada at war captured the imagination of fiction writers across the country. The stories in this collection chronicle the scope of the Canadian war efforts in the twentieth century from Vimy Ridge to the plains of the Spanish Civil War to the skies over North Africa during World War II. This collection includes selections from Timothy Findley, Henry Kreisel, Colin McDougall, Thomas Raddell, Joy Kogawa, Earle Birney, and 16 others. At once terrible and uplifting, memorable and harrowing, the stories in this collection describe a seminal period in Canadian history. *Great Canadian War Stories* show us how Canada became a nation in the twentieth century.

**Oxford Studies in Philosophy of Law Volume 3** John Gardner, Leslie Green, Brian Leiter, 2018-09-19 *Oxford Studies in Philosophy of Law* is a forum for some of the best new philosophical work on law by both senior and junior scholars from around the world. The essays range widely over issues in general jurisprudence, the nature of law adjudication and legal reasoning, the philosophical foundations of specific areas of law from criminal law to evidence to international law, the history of legal philosophy and related philosophical topics that illuminate the problems of legal theory. OSPL will be essential reading for philosophers, academic lawyers, political scientists, and historians of law who wish to keep up with the latest developments in this flourishing field.

*Encyclopedia of Capital Punishment in the United States, 2d ed.* Louis J. Palmer, Jr., 2008-07-23 This updated encyclopedia provides ready information on all aspects of capital punishment in America. It details virtually every capital punishment decision rendered by the United States Supreme Court through 2006, including more than 40 cases decided since publication of the first edition. Entries are also provided for each Supreme Court Justice who has ever rendered a capital punishment opinion. Entries on jurisdictions cite present-day death penalty laws and judicial structure state by state, with synopses of common and unique features. Also included are entries on significant U.S. capital prosecutions, legal principles and procedures in capital cases, organizations that support and oppose capital punishment, capital punishment's impact on persons of African, Asian, Hispanic, and Native American descent, on women, and on foreign nationals, and the methods of execution. Essential facts are also provided on capital punishment in more than 200 other nations. A wealth of statistical data is found throughout.

**Cellular Automata and Discrete Complex Systems** Tejiro Isokawa, Katsunobu Imai, Nobuyuki Matsui, Ferdinand Peper, Hiroshi Umeo, 2015-05-14 This book constitutes revised selected papers from the 20th International Workshop on Cellular Automata and Discrete Complex Systems, AUTOMATA 2014, held in Himeji, Japan, in July 2014. The 10 regular papers included in this volume were carefully reviewed and selected from a total of 25 submissions. It also contains one invited talk in full paper length.

**Contemporary Debates in Philosophy of Religion** Michael L. Peterson, Raymond J.

VanArragon, 2020-01-15 Lively debates on controversial and compelling questions in the philosophy of religion, an updated

edition of the bestselling title Building upon the reputation of the first edition the extensively revised second edition of Contemporary Debates in Philosophy of Religion features fifteen essays which present arguments on some of the most central and controversial topics in philosophy of religion from the discipline's most influential thinkers Considering questions of both emerging and perennial interest from atheistic theistic and agnostic viewpoints the book adopts the series structure which pairs essays espousing opposing perspectives on a particular question or theme in an engaging pro and con format Following accessible introductions to each debate the volume's new and newly revised contributions set the stage for thoughtful and lively discourse between philosophers in philosophy of religion and analytic theology Debates range from vigorous disagreements between theists and their critics to arguments between theists of different philosophical and theological persuasions highlighting points of contrast for readers while showcasing the field's leading minds in dialogue The head to head chapters offer forceful advocacy for some of the most compelling ideas beliefs and objections in the philosophy of religion opening the conversation up to students to weigh the arguments and engage in comparative analysis of the concepts for themselves Written to appeal to the non specialist as well as the professional philosopher Contemporary Debates in Philosophy of Religion is ideal as both a provocative primary text for coursework in analytical theology and philosophy of religion and as a broad survey of the field for scholars and general readers with an interest in the questions which underpin contemporary philosophy of religion and theology

#### **Cellular Automata** Bastien Chopard, Marco

Tomassini, 2003-06-30 This volume contains the proceedings of the Fifth International Conference on Cellular Automata for Research and Industry ACRI 2002 that was held in neva on October 9 11 2002 After more modest beginnings in 1994 as a largely Italian conference over the years ACRI has gradually become rmly established as one of the premier conferences in the eld of cellular automata in Europe and beyond Although the eld of cellular automata is a relatively old and established one these simple but powerful systems and their newer variations continue to attract the interest of researchers after more than half a century since the seminal work of Ulam and Von Neumann The ACRI series of conferences has the ambition of being an internationally renowned forum for all those interested in the theory and applications of cellular systems The contributions collected in this volume concern cellular automata in rious elds such as theory implementations and applications In addition several elds of research e g the multi agents approach adopt methodologies that show strict analogies to cellular automata but without the label Cellular Automata Therefore one of our intentions was to enlarge the cellular automata community to include new related techniques

#### **Theory and Practical Issues on Cellular Automata** S. Bandini, T. Worsch, 2012-12-06

This book contains all full papers presented at ACRI 2000 the Fourth International Conference on Cellular Automata for Research and Industry held at the University of Karlsruhe Germany 4 6 October 2000 The continuation of and growing interest in research on Cellular Automata models for real world phenomena indicates the feasibility of this approach A quick glance at the table contents of this book shows that results came from such different areas as biology economics physics

traffic flow and urban development This work is complemented by contributions on the implementation and evaluation of software for Cellular Automata simulation which is a necessary but of course in no way sufficient ingredient for the successful application of Cellular Automata Applying Cellular Automata without trying to understand their behavior in depth would be an unfortunate development But as properties and power in earlier years it was again one of the strong points of ACRI to bring together researchers not only from different application areas but also from theory Of course this is reflected by the list of accepted contributions which also comprise theoretical papers and even papers which certainly belong to the intersection of several fields Examples are the generation and recognition of geometrical patterns and the influence of possible failures on the power of CA which obviously are of relevance also to applications Simulating Complex Systems by Cellular Automata Alfons G. Hoekstra, Jiri Kroc, Peter M.A. Sloot, 2010-06-03 Deeply rooted in fundamental research in Mathematics and Computer Science Cellular Automata CA are recognized as an intuitive modeling paradigm for Complex Systems Already very basic CA with extremely simple micro dynamics such as the Game of Life show an almost endless display of complex emergent behavior Conversely CA can also be designed to produce a desired emergent behavior using either theoretical methodologies or evolutionary techniques Meanwhile beyond the original realm of applications Physics Computer Science and Mathematics CA have also become work horses in very different disciplines such as epidemiology immunology sociology and finance In this context of fast and impressive progress spurred further by the enormous attraction these topics have on students this book emerges as a welcome overview of the field for its practitioners as well as a good starting point for detailed study on the graduate and post graduate level The book contains three parts two major parts on theory and applications and a smaller part on software The theory part contains fundamental chapters on how to design and or apply CA for many different areas In the applications part a number of representative examples of really using CA in a broad range of disciplines is provided this part will give the reader a good idea of the real strength of this kind of modeling as well as the incentive to apply CA in their own field of study Finally we included a smaller section on software to highlight the important work that has been done to create high quality problem solving environments that allow to quickly and relatively easily implement a CA model and run simulations both on the desktop and if needed on High Performance Computing infrastructures **Parallel Computing Technologies** Victor Malyshev, 2017-08-17 This book constitutes the proceedings of the 14th International Conference on Parallel Computing Technologies PaCT 2017 held in Nizhny Novgorod Russia in September 2017 The 25 full papers and 24 short papers presented were carefully reviewed and selected from 93 submissions The papers are organized in topical sections on mainstream parallel computing parallel models and algorithms in numerical computation cellular automata and discrete event systems organization of parallel computation parallel computing applications *Write Like a Chemist* Marin Robinson, Fredricka Stoller, Molly Costanza-Robinson, James K. Jones, 2008-08-18 *Write Like a Chemist* is a unique guide to chemistry specific writing Written with National Science Foundation support and

extensively piloted in chemistry courses nationwide it offers a structured approach to writing that targets four important chemistry genres the journal article conference abstract scientific poster and research proposal Chemistry students post docs faculty and other professionals interested in perfecting their disciplinary writing will find it an indispensable reference Users of the book will learn to write through a host of exercises ranging in difficulty from correcting single words and sentences to writing professional quality papers abstracts posters and proposals The book's read analyze write approach teaches students to analyze what they read and then write paying attention to audience organization writing conventions grammar and science content thereby turning the complex process of writing into graduated achievable tasks Concise writing and organizational skills are stressed throughout and move structures teach students conventional ways to present their stories of scientific discovery This resource includes over 350 excerpts from ACS journal articles ACS conference abstracts and successful NSF CAREER proposals excerpts that will serve as useful models of chemistry writing for years to come Other special features Usable in chemistry lab lecture and writing dedicated courses Useful as a writing resource for practicing chemists Augmented by Language Tips that address troublesome areas of language and grammar in a self study format Accompanied by a Web site <http://www.oup.com/us/writelikeachemist> Supplemented with an answer key for faculty adopting the book
