most important mining entity in the Northern Rhodesian mining industry Rhokana was both an investment firm on the Copperbelt and a mining company through Nkana mine Thus the Corporation was central to the development and profitability of the copper industry in Zambia Its corporate and labour policies influenced the Copperbelt as a whole Employing the largest labour force in the mining sector Rhokana spearheaded the labour movement on the Copperbelt Its Nkana mine was also the largest producer of copper in the Northern Rhodesian mining industry between 1940 and 1953 and contributed hugely to the war economies of Britain and the USA Throughout its history Nkana was also a major source of cobalt After nationalisation of the mining sector in 1970 Rhokana surrendered its investments in the wider copper industry but remained central to the Copperbelt's smelting and refining operations owning the biggest metallurgical facilities in the industry

Control and Game-Theoretic Models of the Environment Jerzy Filar, Carlo Carraro, 2012-12-06 This book collects some recent works on the application of dynamic game and control theory to the analysis of environmental problems This collection of papers is not the outcome of a conference or of a workshop It is rather the result of a careful screening from among a number of contributions that we have solicited across the world In particular we have been able to attract the work of some of the most prominent scholars in the field of dynamic analyses of the environment Engineers mathematicians and economists provide their views and analytical tools to better interpret the interactions between economic and environmental phenomena thus achieving through this interdisciplinary effort new and interesting results The goal of the book is more normative than descriptive All papers include careful modelling of the dynamics of the main variables involved in the game between nature and economic agents and among economic agents themselves as well described in Vrieze's introductory chapter Furthermore all papers use this careful modelling framework to provide policy prescriptions to the public agencies authorized to regulate emission dynamics Several diverse problems are addressed from global issues such as the greenhouse effect or deforestation to international ones such as the management of fisheries to local ones for example the control of effluent discharges Moreover pollution problems are not the only concern of this book

The Nag Hammadi Library After Fifty Years John Douglas Turner, Anne Marie McGuire, 1997 This volume contains 22 papers from the Society of Biblical Literature's 1995 commemoration of the 50th anniversary of the discovery of the Nag Hammadi Library with special focus on the Apocryphon of John the Gospel of Thomas and the Gospel of Philip

NASA Tech Briefs, 2008 *Engineering, Development and Philosophy* Steen Hyldgaard Christensen, Carl Mitcham, Bocong Li, Yanming An, 2012-10-30 This inclusive cross cultural study rethinks the nexus between engineering development and culture It offers diverse commentary from a range of disciplinary perspectives on how the philosophies of today's cultural triumvirate American European and Chinese are shaped and given nuance by the cross fertilization of engineering and development Scholars from the humanities and social sciences as well as engineers themselves reflect on key questions that arise in this relational context such as how international development work affects the professional views identities practice and ethics of engineers The first volume to

offer a systematic and collaborative study that cuts across continental boundaries the book delineates the kinds of skills and competences that tomorrow's engineering success stories will require and analyzes fascinating aspects of the interplay between engineering and philosophy such as how traditionally Chinese ways of thinking can influence modern engineering practice in the world's most populous country China's problematic mix of engineering woes and wonders from the high profile crash on its high profile rail network to its bird's nest Olympic stadium adds to the urgency for reform while Europe's Enlightenment informed legal frameworks are contrasted with Chinese mechanisms in their governance of the field of nanotechnology a crucial element of future technical evolution Fascinating and compelling in equal measure this volume addresses one of the topics at the leading edge of humanity's quest to survive and to thrive
