The First Descent Of The Matterhorn:

The First Descent of the Matterhorn Alan Lyall, 1997-01-01 *The Matterhorn* Guido Rey, 1908 *The First Descent of the Matterhorn* Alan Lyall, 1998-02-01 *The Laboratory of Progress* Joseph Jung, 2022-07-29

The Laboratory of Progress Switzerland in the 19th Century tells the improbable story of how a small backward mountainous agricultural country with almost no raw materials became an industrial powerhouse a hub of innovation a touristic mecca and a pioneer in transportation all in the course of a single century That a tiny landlocked country should become a dominant steamship builder for the rest of the world that a country that had never seen a cotton plant should become the world s second largest textile producer that a country with hardly any level terrain should come to boast the world s most highly developed railway network and that a country whose main export was impoverished emigrants should be transformed into one of the world s major financial centres these astonishing developments among many others are explored and explained both through the specific stories of individual innovators and through a prescient analysis of the political economic societal and cultural structures that formed the context in which Switzerland s astonishing transformation took place The book is a compelling read both for professional historians and for general readers with an interest in Switzerland it highlights the roles of transport networks and individual pioneers in industrial and political development

Performing Mountains Jonathan Pitches, 2020-04-02 Launching the landmark Performing Landscapes series Performing Mountains brings together for the first time Mountain Studies and Performance Studies in order to examine an international selection of dramatic responses to mountain landscapes Moving between different registers of writing the book offers a critical assessment of how the cultural turn in landscape studies interacts with the practices of environmental theatre and performance Conceived in three main parts it begins by unpicking the layers of disciplinary complexity in both fields before surveying the rich history and practice of rituals playtexts and site specific works inspired by mountains The last section moves to a unique analysis of mountains themselves using key concepts from performance training scenography acting and spectatorship Threaded throughout is a very personal tale of mountain research offering a handrail or alternative guide through the book
