Rules for Radical Christians Nelson R Foster, 2019-10-04 This book is a brutal expose of religion's failure to keep and preserve our Godly American culture and the unconventional answer to restore the cultural soul that is rightfully ours to maintain. It exposes the history and spiritual influences behind the decline and the process Christians can follow to reverse that decline. Liberals may claim that they are godless Atheists but the truth is they are following the doctrines of Lucifer and following a game plan taught by followers of Lucifer. We are losing a spiritual battle by fighting with the tools of the flesh: logic, reason, emotion, science, and the law. We are bound to lose. We need to learn the rules and methods that have been proven to work spiritually against a ruthless spiritual opponent. Liberals know full well that they are fighting for the soul of our nation. We need to realize that the soul they are fighting for is the complete corruption and loss of the Godly soul our founding fathers tried to establish for our nation. It not only presents the problem but also provides the solution to our problem and the promise that the problem of ungodliness in our culture can be reversed. Godliness can be restored. We are also fighting for the soul of our nation. It is NOT the same soul that the Liberals are trying to preserve. They have corrupted our nation by deception. We can restore the national soul they corrupted with the truth. Integral Green Zimbabwe

Elizabeth Mamukwa, Ronnie Lessem, Alexander Schieffer, 2016-05-23 *Integral Green Zimbabwe: An African Phoenix Rising* by Ronnie Lessem, Alexander Schieffer, and Liz Mamukwa is the first book in the Integral Green Society and Economy series, a series which has three overarching aims. The first aim is to link together two major movements of our time: one philosophical, the other practical. The philosophical movement is towards what many today are calling an integral age, while the practical is the green movement, duly aligned with that of sustainable development. The second is to blend together elements of nature and community, culture and spirituality, science and technology, politics and economics, thus serving to bring about an integral green vision, albeit with a focus on business and economics. As such, the authors transcend the limitations to sustainable development and environmental economics, which are overly ecological if not also technological in orientation and exclude social and cultural elements. Thirdly, this particular volume focuses specifically on Zimbabwe as well as Southern Africa, drawing on the particular issues and capacities that this country and region represents. The emphasis on Zimbabwe and Southern Africa transpired not only because two of the editors, Lessem and Mamukwa, are Zimbabwean in origin but because Zimbabwe is today like a phoenix rising from the ashes and has the opportunity to recreate itself anew. **Meaning Over Purpose**

Pitfalls of Corporate Leadership Francis J. Clauss, 2023-03-30. Our nation is still reeling from the 346 fatalities suffered on two flights of the Boeing 737 MAX 8 planes, the first in May 2017 and the second in March 2019. These are just one of the series of costly and deadly consequences of defective products described in this book. Besides the Boeing 737 planes, the examples of bad products include automobiles, electrical energy networks, pipelines, bridges, and other large structures, banks, drinkable water, and financial services. While the immediate or proximate causes of the disasters have been bad design or bad production, the root or underlying causes have been bad corporate management and business cultures caused by corporate leaders. The final five chapters provide short essays on product design, production, quality control, management, and culture, and what the leaders of our private companies and government agencies might do to reduce the pitfalls that have led to so many defective products and their dire consequences.
