**Trevor Barnes, Meric S Gertler**

## **The High Technology Of Silicon Valley:**

*Silicon Valley Fever* Everett M. Rogers, Judith K. Larsen, 1984-04-19 Reviewing the development of California's Silicon Valley from the now legendary meeting of Hewlett and Packard to the development of the Stanford Research Park to the near overnight success of Apple Computers Intel etc the authors present a history of the development of the technology and the amazing individuals who created it as well as a sociological study of that technology in its local national and international contexts They conclude with a thought provoking assessment of the future of Silicon Valley the capability of the Japanese to overtake the Americans and the changes to be seen in an information society ISBN 0 465 07821 4 19 95 *Down and Out in*

*Silicon Valley* Mel Krantzler, Patricia Biondi Krantzler, 2002-02 Like Icarus flying too close to the sun many once promising dot com entrepreneurs have been burned by overweening ambition and come crashing to the ground Besides the economic wreckage left in the wake of their high flying dreams there is also a good deal of psychological turmoil Psychologists Mel Krantzler and his wife Pat both counselors who have helped hundreds of managers and CEOs of high tech companies cope with dreams turned to nightmares expose the shadowy side of Silicon Valley in this revealing book about the personal costs of success In addition to being a psychologist Dr Krantzler is also a trained economist His economic expertise combined with his psychology practice enables him to uniquely illuminate Silicon Valley's culture from both perspectives This is the first book to explode the romanticized myth of Silicon Valley which is still so prevalent in advertising and the media What you never hear about this Mecca of high tech culture is that it has one of the highest divorce rates in the world more children who are psychologically disturbed than in less affluent areas almost no affordable decent housing even for those earning 50 000 a year and widespread alcohol and drug use What the Krantzlers make clear is that aside from the simple geographical designation Silicon Valley is the name for a psychological obsession found any place where people believe that instant fame and fortune can be gained through silicon chips and Web sites This dream nourishes itself on an illusion of power and instant gratification And like heroin and cocaine it is highly addictive promising total happiness but often ending in disarray and despair Based on interviews with many Silicon Valley executives who have decided to change their lives to achieve true well being for themselves and their families this book concludes with a formula for real success a well rounded balanced and fully human life **The Rise, Decline, and Renewal of Silicon Valley's High Technology Industry** Dan M. Khanna, 1997

First Published in 1997 Routledge is an imprint of Taylor Francis an informa company *Silicon Valley and Beyond*, 1981

*The High Technology of Silicon Valley* Everett M. Rogers, 1985 *Handbook of Research on High-Technology Entrepreneurs* The late Ayala Malach-Pines, Mustafa F. Özbilgin, 2010-01-01 Presents an overview of empirical and conceptual developments in the study of high tech entrepreneurs from an interdisciplinary and multinational perspective This book explores various conceptual frameworks and definitions of high tech entrepreneurs and of the entrepreneurial process based on studies in different settings and contexts **The Silicon Dragon** Terence Tsai, Borshuan Cheng, 2006-01-01 The

Silicon Dragon is a systematic study of the growth of high tech giants in the Greater China Region depicting the success story of the microelectronics industry in Taiwan Literature and studies on Taiwan's success are surprisingly limited and this book aims to fill this gap addressing questions such as How has Taiwan achieved such an outstanding performance in the information industry How did Taiwan obtain and maintain its competitive advantage What was the secret of success What role did the government and manufacturers play during the development process What insights can newcomers gain from these achievements The book examines the government policies that acted as catalysts to the growth of high tech industries in Taiwan along with the roles of high tech incubators and government administered science parks The authors provide case studies of high profile companies including Acer Philips Semiconductors and Macronix International and interviews with key decision makers to highlight the corporate strategies adopted in response to government policies and global commercial demand Finally insightful narratives on the birth and growth of a government fostered strategic industry are provided as is a synopsis of the Asian contribution to the evolution of the global microelectronics development This book will strongly appeal to academics researchers and students with an interest in engineering technology and business management Business managers and government officials will also find much to interest them in this book

**Pathways to High-Tech Valleys and Research Triangles** Willem Hulsink, J. J. M. Dons, 2008-05-23 About the book The contents of most of the chapters included in this volume were originally presented and discussed during the academic workshop High tech Valleys and Research Triangles in the East of the Netherlands and elsewhere held on 30 November and 1 December 2005 at the Wageningen International Congress Centre WICC in the Netherlands At that time we had an informal agreement with Rob Bogers series editor of the Wageningen UR Frontis book series that if the quality and quantity of the talks and papers at the seminar would be sufficient and if there was willingness among the potential authors an edited book volume based upon the results of the workshop would be a possibility After the workshop when we had a critical mass of ten chapters and a dedicated group of committed authors the book project was given the green light As editors we realized that there were still a couple of topics and themes missing and when we had found colleagues for these four additional chapters that needed to be written our Frontis book was on the roll Although most of the time it was great fun the whole process of writing reviewing rewriting editing and proofreading took a lot of time much more time than we originally had foreseen We would like to thank all authors of the fourteen chapters of this book for their excellent contributions

**Towards a New High Technology Development in the Silicon Valley** Jonathan Kam Pang, 1988 Santa Clara Valley perhaps better known as the Silicon Valley is currently facing many problems and uncertainties The explosion of the high technology industry has changed the regional scene faster than anyone could predict The once agriculturally based community has become urbanized overnight It fostered major growth with many new opportunities but at the same time brought many unforeseen physical and social problems to the region New employment opportunities led to dramatic increase in population over the past twenty years and

consequently a greater demand in housing An imbalanced land use distribution has caused limitations in residential land emphasized the problem of chronic housing shortage and rapidly inflated housing prices Housing prices in the valley are rising much faster than average household income in the region and is inevitably forcing most of the workers to live outside of the region Intensive commuting patterns have caused traffic chaos pollution and a deteriorating living and working environment Despite the imbalanced land use distribution for tax base reasons alone there is still the need to continue planning for more industrial land to accommodate the growing industries In the heart of Silicon Valley region San Jose will be the center of future high tech industrial expansion This is not only because it contains most of the industrial land available for this kind of development but also because these sites are located in close proximity to the newly redeveloped CBD and are linked together by a new 20 mile light rail mass transit system and other major planned road networks Since the manufacturing functions of the hi tech industry are gradually moving out of the region it is slowly changing its composition towards a heavier concentration of research development marketing and corporate headquarter functions This thesis explores for potential forms of future high technology industrial development and an examines their implications in relationship to future urban form The objective of this thesis is to envision the future through a hypothesized design in the context of San Jose By resolving specific issues the new prototypical design should represent an idealized physical model toward a better living and working environment

#### **Growth Policy in the Age of High Technology** Jurgen

Schmandt, Robert Wilson, 2018-03-29 Originally published in 1990 this book provides an authoritative and detailed account of the initiatives of US state governments with science and technology programs designed to foster economic growth Two key questions are posed Do state governments have policy instruments that are sufficiently powerful to affect the levels and growth rates of their regional economies and Are national and global economic forces so powerful that they render state action ineffective Several subsidiary themes are discussed in this context namely the most commonly used policy instruments the impacts on federalism and on governance and how well the universities and other educational institutions serve the economic activities imposed on them

#### **China's High Technology Development, April 21 and 22, 2005, 109-1**

**Hearing, \***, 2005 **The Advanced Technology Program** National Research Council, Policy and Global Affairs, Board on Science, Technology, and Economic Policy, 2001-07-06 This report examines the operations of the ATP reviews its extensive assessment program and provides NRC Committee findings concerning the ATP's operations and recommendations for potential improvements to the program The report includes a summary of a major conference held in April 2000 as well as seven papers including surveys of the industry participants or users of the ATP program a summary of the results of fifty awards detailed assessments of major joint ventures and a description of the current selection process It is the most comprehensive study to date of the program's origins operations achievements and assessment Its conclusion the program works

#### **Comparing High Technology Firms in Developed and Developing Countries: Cluster Growth Initiatives**

Bas, Tomas Gabriel, 2012-05-31 Clusters are geographic concentrations of interconnected companies specialized suppliers service providers and associated institutions in a particular field that are present in a nation or region The development and upgrading of clusters is an important agenda for governments companies and other institutions Cluster growth initiatives are an important new direction in economic policy building on earlier efforts in macroeconomic stabilization privatization market opening and cost reduction related to doing business Comparing High Technology Firms in Developed and Developing Countries Cluster Growth Initiatives is the leading source of information for readers interested in this field of study as it promotes scientific discussion on policies and practice of cluster growth as well as covers the emerging research topics which are going to define the future of the management of technology Furthermore this book demonstrates the effectiveness and efficiency of technology policy based on observations of differential growth rate of high technology firms in clusters and explores the factors that explain superior performance of high technology firms to contribute the improvement of technology policy in both developed and developing countries *China's High Technology Development* U.S.-China Economic and Security Review Commission, 2005 **The High-tech Worker Shortage and U.S. Immigration Policy** United States. Congress. Senate. Committee on the Judiciary, 1998 **Monthly Labor Review**, 1996 Publishes in depth articles on labor subjects current labor statistics information about current labor contracts and book reviews The New Industrial Geography Trevor Barnes, Meric S Gertler, 2002-01-04 Drawing on the theoretical resources of institutional economics The New Industrial Geography opens new perspectives in economic geography In its focus on historical and geographical context institutional embeddedness and tacit rules and formal regulations institutional economics is shown to be the perfect basis for understanding the profound economic and geographical changes of the last two decades and on which also to build a new kind of industrial geography Issues covered include the retheorization of the geography of industrial districts the analysis of institutional thickness and the economic geographical effects of institutional rigidity and sclerosis the economic geographical consequences of new regulatory bodies and policies and the geographically situated character of institutions and regulatory frameworks and the effects of separating them from their originating context the development of new strategies for achieving more equitable forms of regional development Pathways to the Present Mansel G. Blackford, 2018-03-31 Ranging from the Hawaiian Archipelago to the Aleutian Islands from Silicon Valley to Guam Pathways to the Present is a thoroughly researched and concisely argued account of economic and environmental change in the postwar American Pacific Following a brief survey of the history of the Pacific the author takes the Hawaiian Islands as the center of American activities in the region and looks at interactions among native Hawaiian developmental military and environmental issues in the archipelago after World War II He then turns to land and water use problems that have intersected with more nebulous quality of life concerns to generate policy controversies in the Seattle region and the San Francisco Bay area especially Silicon Valley Economic expansion and environmentalism in Alaska are examined through the lens of changes occurring along the Aleutians

From there the study considers Hiroshima after its destruction by the atomic bomb in 1945 looking at residents desire to combine urban planning concepts The author investigates the effort to remake Hiroshima as a high tech city in the 1990s an attempt inspired by the perceived success of Silicon Valley and postwar planning on Okinawa where American influences were particularly strong The final chapter takes into account issues raised on Guam regarding the growth of tourism and the use of the island for military purposes and links these to developments in the Philippines to the west and American Samoa to the south

**National Summit on High Technology** United States. Congress. Joint Economic Committee,1999

Knowledge, Space, Economy John Bryson,Peter Daniels,Nick Henry,Jane Pollard,2002-01-04 We are now living through a period of knowledge capitalism in which as Castells put it the action of knowledge upon knowledge is the main source of productivity In the face of such transformation the economic social and institutional contours of contemporary capitalism are being reshaped At the heart of this world are an emergent set of economies regions institutions and peoples central of the flows and translations of knowledge This book provides an interdisciplinary review of the triad of knowledge space economy on entering the twenty first century Drawing on a variety of disciplinary backgrounds the first part of the book comprises a set of statements by leading authors on the role of knowledge in capitalism Thereafter the remaining two parts of the book explore the landscape of knowledge capitalism through a series of analyses of knowledge in action within a range of economic political and cultural contexts Bringing together a set of authors from across the social sciences this book provides both a major theoretical statement on understanding the economic world and an empirical exemplification of the power of knowledge in shaping the spaces and places of today s society
