Cave Archaeology of the Eastern Woodlands David H. Dye, 2008

Patty Jo Watson's prolific career began in the early 1950s as an energetic graduate student at the University of Chicago and culminated with her induction into the National Academy of Sciences and subsequent retirement from Washington University in 2003 During that time her groundbreaking research impacted multiple fields within the discipline of archaeology but her astonishing research into the underground caves of the eastern United States recognizes her as one of the world's leading experts on cave archaeology In honor of Dr Watson and her monumental achievements in the field twenty-two established scholars present in this volume new and insightful research into prehistoric and historic use of southeastern dark zones Cave Archaeology of the Eastern Woodlands edited by David H Dye explores how prehistoric and historic peoples utilized caves as a means to further their economic growth and represent cultural values within their societies The essays range in topics from early gypsum mining to rare American Indian cave art from historic saltpeter extraction to current archaeobotanical and paleofecal research Dye and the contributors contend that studies of deep zone caves reveal multiple insights into the values beliefs and cultural lifeways of ancient and historic peoples In addition to presenting new research in the field contributors also place particular emphasis on Dr Watson's influential cave research and how it has molded their own work The essays convey a sense of wonder at the unique and sometimes harrowing world of caves and readers will get a sense of why Native Americans regarded the Underworld or Beneathworld as a supernatural realm to be tread upon with great respect and caution This volume of uniformly excellent essays will no doubt be a lantern that sheds light onto the importance of studying and understanding the all too secret world of underground caves David H Dye is professor of archaeology in the Department of Earth Sciences at the University of Memphis and a former student of Patty Jo Watson's He is author of *Cycles of Violence: An Archaeology of Peace and War in Native Eastern North America* coeditor with Richard J Chacon of *The Taking and Displaying of Human Body Parts as Trophies by Amerindians* and with Cheryl Anne Cox of *Towns and Temples Along the Mississippi*

Sacred Darkness Holley Moyes, 2012-04-15

Caves have been used in various ways across human society but despite the persistence within popular culture of the iconic caveman deep caves were never used primarily as habitation sites for early humans Rather in both ancient and contemporary contexts caves have served primarily as ritual spaces In *Sacred Darkness* contributors use archaeological evidence as well as ethnographic studies of modern ritual practices to envision the cave as place of spiritual and ideological power that emerges as a potent venue for ritual practice Covering the ritual use of caves in Europe Asia Australia Africa Mesoamerica and the US Southwest and Eastern woodlands this book brings together case studies by prominent scholars whose research spans from the Paleolithic period to

the present day These contributions demonstrate that cave sites are as fruitful as surface contexts in promoting the understanding of both ancient and modern religious beliefs and practices This state of the art survey of ritual cave use will be one of the most valuable resources for understanding the role of caves in studies of religion sacred landscape or cosmology and a must read for any archaeologist interested in caves *Appletons' Annual Cyclopedia and Register of Important Events*

,1897 **Appletons' Annual Cyclopædia and Register of Important Events of the Year ...** ,1897 The American Annual Cyclopedia and Register of Important Events of the Year ... ,1897 **Appletons' annual Cyclopædia and Register of Important Events ...** ,1897 Outside the Hacienda Walls Allan Meyers,2012-03-01 The Mexican Revolution was a

tumultuous struggle for social and political reform that ousted an autocrat and paved the way for a new national constitution The conflict however came late to Yucatán where a network of elite families with largely European roots held the reins of government This privileged group reaped spectacular wealth from haciendas cash crop plantations tended by debt ridden servants of Maya descent When a revolutionary army from central Mexico finally gained a foothold in Yucatán in 1915 the local custom of agrarian servitude met its demise Drawing on a dozen years of archaeological and historical investigation Allan Meyers breaks new ground in the study of Yucatán haciendas He explores a plantation village called San Juan Bautista Tabi which once stood at the heart of a vast sugar estate Occupied for only a few generations the village was abandoned during the revolutionary upheaval Its ruins now lie within a state owned ecological reserve Through oral histories archival records and physical remains Meyers examines various facets of the plantation landscape He presents original data and fresh interpretations on settlement organization social stratification and spatial relationships His systematic approach to things underfoot small everyday objects that are now buried in the tropical forest offers views of the hacienda experience that are often missing in official written sources In this way he raises the voices of rural mostly illiterate Maya speakers who toiled as laborers What emerges is a portrait of hacienda social life that transcends depictions gleaned from historical methods alone Students researchers and travelers to Mexico will all find something of interest in Meyers's lively presentation Readers will see the old haciendas once forsaken but now experiencing a rebirth as tourist destinations in a new light These heritage sites not only testify to social conditions that prevailed before the Mexican Revolution but also remind us that the human

geography of modern Yucatán is as much a product of plantation times as it is of more ancient periods **Caves and Karst of the Upper Midwest, USA** Greg A. Brick,E. Calvin Alexander Jr.,2020-12-01 This book discusses the karst and pseudokarst of the Upper Midwest USA consisting of the states of Minnesota Wisconsin Iowa and Illinois the first regional synthesis in 40 years Starting with an overview of the regional geology of what is largely glaciated fluviokarst and paleokarst developed on Paleozoic carbonates but including other lithologies such as the St Peter Sandstone and the Ft Dodge Gypsum the caves springs sinkholes and karst hydrogeology of each state are described Special attention is devoted to the region's longest caves Coldwater Cave Mystery Cave and the Minnesota Cave Preserve caves Application of tools such as data loggers

and LiDAR with new conceptual models such as hypogenic speleogenesis has been transformative here Special topics include lead and zinc mining in the Driftless Area vertebrate and invertebrate cave fauna near the Laurentide ice limit the impact and policies of nutrient and herbicide intensive modern agriculture on karst and paleoclimate studies The discovery exploration institutional history of caving organizations and show caves of the Upper Midwest from the year 1700 onwards are brought up to date The top 10 historical paradigms of cave and karst science in the Midwest are reviewed Perspectives on paleontology archeology and Native American rock art are included *The Bioarchaeology of Space and Place* Gabriel D. Wrobel, 2014-04-16 The Bioarchaeology of Space and Place investigates variations in social identity among the ancient Maya by focusing on individuals and small groups identified archaeologically by their inclusion in specific discrete mortuary contexts or by unusual mortuary treatments Utilizing archaeological biological and taphonomic data from these contexts the studies employ a variety of methodological approaches to reconstruct aspects of individuals life course and mortuary pathways Following this specific mortuary behaviors are discussed in relation to their local or regional cultural setting using relevant archaeological ethnohistoric and or ethnographic data in an effort to interpret their meaning within the broader social political and economic contexts in which they were carried out This volume covers a number of topics that are currently being debated in Maya archaeology including identification and discussion of the role and extent of human sacrifice in Maya culture the use of ancestors for maintaining political power the mortuary use of caves by both elites and non elites ethnic distinctions within urban areas and the extent of movement of people between communities Importantly the papers in this volume attempt to test and move beyond static dichotic categories that are often employed in mortuary studies in an effort to better understand the complex ways in which the Maya conceptualized and manipulated social identity This type of nuanced case study approach that incorporates historical archaeological and theoretical contextualization is becoming increasingly important in the field of bioarchaeology providing valuable sources of data where small diverse samples impede populational approaches **The Prehistoric Native American Art of Mud Glyph Cave** Charles H.
