each produced music in unique styles and genres but how and why have these disparate musical streams come to fall under the single category of Latin American music Reconstructing how this category came to be author Pablo Palomino tells the dynamic history of the modernization of musical practices in Latin America He focuses on the intellectual commercial musicological and diplomatic actors that spurred these changes in the region between the 1920s and the 1960s offering a transnational story based on primary sources from countries in and outside of Latin America The Invention of Latin American Music portrays music as the field where for the first time the cultural idea of Latin America disseminated through and beyond the region connecting the culture and music of the region to the wider global culture promoting the now established notion of Latin America as a single musical market Palomino explores multiple interconnected narratives throughout pairing popular and specialist traveling musicians commercial investments and repertoires unionization and musicology and music pedagogy and Pan American diplomacy Uncovering remarkable transnational networks far from a Western cultural center The Invention of Latin American Music firmly asserts that the democratic legitimacy and massive reach of Latin American identity and modernization explain the spread and success of Latin American music

A History of American Music Education Michael Mark, Charles L. Gary, 2007-04-16 A History of American Music Education covers the history of American music education from its roots in Biblical times through recent historical events and trends It describes the educational philosophical and sociological aspects of the subject always putting it in the context of the history of the United States It offers complete information on professional organizations materials techniques and personalities in music education

Our American music John Tasker Howard, 1966 *Music in a New Found Land* Manfred Holthus, Wilfrid Mellers, 2017-09-14 The subject of this book is accurately defined by its subtitle Music in a New Found Land does not pretend to be a comprehensive history of American music Nor does Mellers strive to catalog what he considers to be authentic American music Instead he deals in some detail with comparatively few composers most of whom have well established reputations It has always been difficult to separate American music from its immediate relevance to the twentieth century Mellers theme involves the relationship between art music jazz and pop music he sees the segregation of these genres as both illogical and artificial If the pop music of Tin Pan Alley may be anti art it has also produced Gershwin Ellington and composing improvisers such as Louis Armstrong Charlie Parker and Miles Davis The study of American music is as relevant into any inquiry into a national culture as the study of American literature and painting This book contains a large number of quotations from American writers because Mellers thought American sensibility should parallel reinforce and comment on American music In sum this is the closest available one volume history of American music and a window into American culture
