The History Of Postmodern Architecture:

The History of Postmodern Architecture Heinrich Klotz, 1990-09-01 provides a fascinating clear and provocative definition of the phenomena of postmodernism particularly in relation to the major ideas of modernism The History of Postmodern Architecture Heinrich Klotz, 1988 provides a fascinating clear and provocative definition of the phenomena of postmodernism particularly in relation to the major ideas of modernism Postmodern Urbanism Nan Ellin, 1999 A comprehensive guide to the scope of contemporary urban design theory in Europe and the USA Postmodernism Terry Farrell, Adam Nathaniel Furman, 2024-10-01 First published in 2017 as *Revisiting Postmodernism* this refreshed edition of a seminal text reflects on a design movement that changed our world Postmodernism invites readers to explore the style in a new light as the cultural phenomenon that it is one which thrives on complexity and pluralism Exploring its expression not only in architecture but in design urban planning and placemaking Postmodernism reflects on the history of the movement and its continuing influence on design practice today Sir Terry Farrell and Adam Nathaniel Furman present two separate but complementary perspectives of this rich period of architectural history one account as lived experience from a protagonist and pioneer in the field of postmodern architecture and the other analysing the movement afresh through the lens of the 21st century Shedding new light onto the forces and influences of the time and offering insight into how these were transforming approaches to architecture both in the UK and internationally this important book presents a new appreciation of this period of architectural history Sumptuously illustrated with examples from across the globe Postmodernism offers a fresh perspective on buildings of this period sharing their richness diversity and brilliance with an emphasis on what was interesting beautiful and unique about the architecture which emerged from this unusually fertile moment in history The Postmodern Turn Steven Best, Douglas Kellner, 1997-01-01 This book presents a groundbreaking analysis of the emergence of a postmodern paradigm in theory the arts science and politics From the authors of *Postmodern Theory* the much acclaimed introduction to key postmodern thinkers and themes The Postmodern Turn ranges over diverse intellectual and artistic terrain from architecture painting literature music and politics to the physical and biological sciences Critically engaging postmodern theory and culture Steven Best and Douglas Kellner illuminate our momentous transition between a modernist past and a future struggling to define itself **Postmodern Architecture in Socialist Poland** Florian Urban, 2020-12-13 Garish churches gabled panel blocks neo historical tenements this book is about these and other architectural oddities that emerged in Poland between 1975 and 1989 a period characterised by the decline of the authoritarian socialist regime and waves of political protest During that period committed architects defied repressive politics and persistent shortages and designed houses and churches which adapted eclectic historical forms and geometric volumes and were based on traditional typologies These buildings show a very different background of postmodernism far removed from the debates over Robert Venturi Philip Johnson or Prince Charles in Western Europe and North America a context in which postmodern architecture stood not for

world weary irony in an economically saturated society but for individualised counter propositions to a collectivist ideology for a yearning for truth and spiritual values and for a discourse on distinctiveness and national identity Postmodern Architecture in Socialist Poland argues that this new architecture marked the beginning of socio political transformation and at the same time showed postmodernism's reconciliatory potential In light of massive historical ruptures and wartime destruction these buildings successfully responded to the contradictory desires for historical continuity and acknowledgment of rupture and loss Next to international ideas the architects took up domestic traditions such as the ideas of the Polish school of historic conservation and long standing national patriotic narratives They thus contributed to the creation of a built environment and intellectual climate that have been influential to date This book will be of great interest to students and scholars interested in postmodern architecture and urban design as well as in the socio cultural background and transformative potential of architecture under socialism *The Post-Modern and the Post-Industrial* Margaret A. Rose,1991-06-28 The first book to provide a critical survey of the many different uses made of the term post modern across a number of different disciplines *Post-Modern Buildings in Britain* Geraint Franklin,Elain Harwood,2023-07-20 An illuminating look at a controversial architectural style and its finest examples Post modernism was the 1980s counter to Brutalism but fell out of fashion until its best buildings began to disappear Now is the time to reassess its values Historians Geraint Franklin and Elain Harwood discuss its background and key architects before celebrating Britain's finest examples Individual entries are beautifully illustrated many with new photography including the SIS Building made famous by James Bond John Outram's awe inspiring pumping station in London's Docklands and Judge Institute in Cambridge and the late works of James Stirling and Michael Wilford including No 1 Poultry an extraordinary corner of the City that in 2016 became England's youngest listed building **Behind the Postmodern Facade** Magali Sarfatti Larson,2024-06-04 Magali Larson's comprehensive study explores how architecture happens and what has become of the profession in the postmodern era Drawing from extensive interviews with pivotal architects from Philip Johnson who was among the first to introduce European modernism to America to Peter Eisenman identified with a new deconstructionist style she analyzes the complex tensions that exist between economic interest professional status and architectural product She investigates the symbolic awards and recognition accorded by prestigious journals and panels exposing the inner workings of a profession in a precarious social position Larson captures the struggles around status place and power as architects seek to redefine their very purpose in contemporary America The author's novel approach in synthesizing sociological research and theory proposes nothing less than a new cultural history of architecture This is a ground breaking contribution to the study of culture and the sociology of knowledge as well as to architectural and urban history This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed

Hays,2000-02-28 An anthology of the pivotal theoretical texts that have defined architecture culture in the late twentieth century In the discussion of architecture there is a prevailing sentiment that since 1968 cultural production in its traditional sense can no longer be understood to rise spontaneously as a matter of social course but must now be constructed through ever more self conscious theoretical procedures The development of interpretive modes of various stripes post structuralist Marxian phenomenological psychoanalytic as well as others dissenting or eccentric has given scholars a range of tools for rethinking architecture in relation to other fields and for reasserting architectures general importance in intellectual discourse This anthology presents forty seven of the primary texts of architecture theory introducing each with an explication of the concepts and categories necessary for its understanding and evaluation It also presents twelve documents of projects or events that had major theoretical repercussions for the period Several of the essays appear here in English for the first time Contributors Diana Agrest Stanford Anderson Archizoom George Baird Jennifer Bloomer Massimo Cacciari Jean Louis Cohen Beatriz Colomina Alan Colquhoun Maurice Culot Jacques Derrida Ignasi de Sol Morales Peter Eisenman Robin Evans Michel Foucault Kenneth Frampton Mario Gandelsonas Frank Gehry J rgen Habermas John Hejduk Denis Hollier Bernard Huet Catherine Ingraham Fredric Jameson Charles A Jencks Jeffrey Kipnis Fred Koetter Rem Koolhaas Leon Krier Sanford Kwinter Henri Lefebvre Daniel Libeskind Mary McLeod Alberto Prez G mez Jos Quetglas Aldo Rossi Colin Rowe Massimo Scolari Denise Scott Brown Robert Segrest Jorge Silvetti Robert Somol Martin Steinmann Robert A M Stern James Stirling Manfredo Tafuri Georges Teyssot Bernard Tschumi Anthony Vidler Paul Virilio Mark Wigley The Language of

Post-modern Architecture Charles Jencks,1991 A classic account which when written in 1977 was the first to define post modernism in architecture an event which led to subsequent adoption of the term in many other fields It is the story of the failure of modern architecture to communicate with its users and the attempt of post modernists to overcome this failure with a richer more widely shared language post modern classicism This edition 5th in 1987 brings the account and the great illustrations up to date 101 4x121 2 Annotation copyrighted by Book News Inc Portland OR *Architecture's Historical Turn* Jorge Otero-Pailos,2013-11-30 Architecture s Historical Turn traces the hidden history of architectural phenomenology a

movement that reflected a key turning point in the early phases of postmodernism and a legitimating source for those architects who first dared to confront history as an intellectual problem and not merely as a stylistic question Jorge Otero Pailos shows how architectural phenomenology radically transformed how architects engaged theorized and produced history In the first critical intellectual account of the movement Otero Pailos discusses the contributions of leading members including Jean Labatut Charles Moore Christian Norberg Schulz and Kenneth Frampton For architects maturing after World War II Otero Pailos contends architectural history was a problem rather than a given Paradoxically their awareness of modernism s historicity led some of them to search for an ahistorical experiential constant that might underpin all architectural expression They drew from phenomenology exploring the work of Bachelard Merleau Ponty Heidegger and Ricoeur which they translated for architectural audiences Initially the concept that experience could be a timeless architectural language provided a unifying intellectual basis for the stylistic pluralism that characterized postmodernism It helped give theory especially the theory of architectural history a new importance over practice However as Otero Pailos makes clear architectural phenomenologists could not accept the idea of theory as an end in itself In the mid 1980s they were caught in the contradictory and untenable position of having to formulate their own demotion of theory Otero Pailos reveals how ultimately the rise of architectural phenomenology played a crucial double role in the rise of postmodernism creating the antimodern specter of a historical consciousness and offering the modern notion of essential experience as the means to defeat it
