Promethean Ambitions William R. Newman, 2005-10-01 In an age when the nature of reality is complicated daily by advances in bioengineering cloning and artificial intelligence it is easy to forget that the ever evolving boundary between nature and technology has long been a source of ethical and scientific concern modern anxieties about the possibility of artificial life and the dangers of tinkering with nature more generally were shared by opponents of alchemy long before genetic science delivered us a cloned sheep named Dolly In *Promethean Ambitions* William R Newman ambitiously uses alchemy to investigate the thinning boundary between the natural and the artificial Focusing primarily on the period between 1200 and 1700 Newman examines the labors of pioneering alchemists and the impassioned and often negative responses to their efforts By the thirteenth century Newman argues alchemy had become a benchmark for determining the abilities of both men and demons representing the epitome of creative power in the natural world Newman frames the art nature debate by contrasting the supposed transmutational power of alchemy with the merely representational abilities of the pictorial and plastic arts a dispute which found artists such as Leonardo da Vinci and Bernard Palissy attacking alchemy as an irreligious fraud The later assertion by the Paracelsian school that one could make an artificial human being the homunculus led to further disparagement of alchemy but as Newman shows the immense power over nature promised by the field contributed directly to the technological apologetics of Francis Bacon and his followers By the mid seventeenth century the famous father of modern chemistry Robert Boyle was employing the arguments of medieval alchemists to support the identity of naturally occurring substances with those manufactured by chymical means In using history to highlight the art nature debate Newman here shows that alchemy was not an unformed and capricious precursor to chemistry it was an art founded on coherent philosophical and empirical principles with vocal supporters and even louder critics that attracted individuals of first rate intellect The historical relationship that Newman charts between human creation and nature has innumerable implications today and he ably links contemporary issues to alchemical debates on the natural versus the artificial

The Heredity Hoax Richard M. Lerner, Gary Greenberg, 2025-01-30 This innovative and thought provoking book integrates both new authored material and reprints of existing literature that together provide a compelling narrative that reveals the fatally flawed science associated with genetic reductionist accounts of human behavior and development Through an interdisciplinary lens it illuminates the dynamic nature of human development empowering readers to question established notions and embrace the complexity of our potential Across the book the work of top tier scientists from developmental comparative educational and biological science illuminates theory and research converging on

the conclusion that the multiple egregiously flawed work of genetic reductionists should be expunged from research pertinent to human development The book challenges the prevailing reductionist narratives and their application to social policies programs and uses in media Theoretically based and empirically rigorous this multidisciplinary approach to human development will shine a light on the inequities in individuals or groups that suggest that specific genes do not enable them to succeed in life The Heredity Hoax invites graduate programs and advanced undergraduate courses on human development human potential epigenetics and more to delve into the intricate interplay between genes environment and personal growth This will also serve as an unimpeachable source of evidence for researchers educators and social policymakers *The Body Within* Renée van de Vall, Robert Zwijnenberg, 2009 The central question of this interdisciplinary volume is whether present day medical visualisation techniques like ultrasound endoscopy CT MRI and PET scans mark a significant shift in the historical and cultural construction and experience of bodily interiority *Eta Carinae and the Supernova Impostors* Kris Davidson, Roberta M. Humphreys, 2012-03-15 In 1965 Fritz Zwicky proposed a class of supernovae that he called Type V described as excessively faint at maximum There were only two members SN1961v and Eta Carinae We now know that Eta Carinae was not a true supernova but if it were observed today in a distant galaxy we would call it a supernova impostor 170 years ago it experienced a great eruption lasting 20 years expelling 10 solar masses or more and survived Eta Carinae is now acknowledged as the most massive most luminous star in our region of the Galaxy and it may be our only example of a very massive star in a pre supernova state In this book the editors and contributing authors review its remarkable history physical state of the star and its ejecta and its continuing instability Chapters also include its relation to other massive unstable stars the massive star progenitors of supernovae and the first stars in the Universe *Anna Zieglerin and the Lion's Blood* Tara Nummedal, 2019-04-19 In 1573 the alchemist Anna Zieglerin gave her patron the Duke of Braunschweig Wolfenbittel the recipe for an extraordinary substance she called the lion's blood She claimed that this golden oil could stimulate the growth of plants create gemstones transform lead into the coveted philosophers stone and would serve a critical role in preparing for the Last Days Boldly envisioning herself as a Protestant Virgin Mary Anna proposed that the lion's blood paired with her own body could even generate life repopulating and redeeming the corrupt world in its final moments In *Anna Zieglerin and the Lion's Blood* Tara Nummedal reconstructs the extraordinary career and historical afterlife of alchemist courtier and prophet Anna Zieglerin She situates Anna's story within the wider frameworks of Reformation Germany's religious political and military battles the rising influence of alchemy the role of apocalyptic eschatology and the position of women within these contexts Together with her husband the jester Heinrich Schombach and their companion and fellow alchemist Philipp Sommering Anna promised her patrons at the court of Wolfenbittel spiritual salvation and material profit But her compelling vision brought with it another darker possibility rather than granting her patrons wealth or redemption Anna's alchemical gifts might instead lead to war disgrace and destruction By 1575 three years after Anna's arrival at court her enemies had

succeeded in turning her from holy alchemist into poisoner and sorceress culminating in Anna's arrest torture and public execution In her own life Anna was a master of self fashioning in the centuries since her death her story has been continually refashioned making her a fitting emblem for each new age Interweaving the history of science gender religion and politics Nummedal recounts how one resourceful woman's alchemical schemes touched some of the most consequential matters in Reformation Germany

The Chosen Ricardo Pinto,2010-09-30 Carnelian is of the Masters cruel beings who rule their kingdom from an earthly paradise hidden in a crater that is the navel of the world Soon after he is born Carnelian s father takes him across the sea to an island in the colourless north Far from the Crater s rituals and pomp their household is allowed to become a family to the boy and the world of the Masters fades to alluring fairy tale In deepest winter years later a ship comes riding before the gales three Masters her only cargo As these giants remove their masks of gold Carnelian is awed by the light that seems to radiate from their skin In formal conclave they ask Carnelian s father to end his exile and return with them to oversee the election of a new God Emporer His father s agreement feeds Carnelian s longing for the world beyond the sea but as the days pass Carnelian watches with growing horror as the ship s needs devour his home The Masters are indifferent imperious concerned only with their blood politics their majesty As his father becomes strangely powerless Carnelian strives to save his people but when the ship turns her pro towards the stormy sea he knows that he is abandoning them to famine among the ruins of his former home This is the beginning of Carnelian s journey The terror of the tempest yields to the weary grind along the road the climb up the forbidding cliff wall to the Guarded Land and then the frantic rush into the deep south Carnelian s education which began with the starving of his people proceeds with bitter lessons in bloodshed intrigue and betrayal When they finally reach the Canyon of the Three Gates which leads into the Crater Carnelian finds both love and treachery but it is here within the Heaven Wall that he will set in motion the concluding events in a story already ten thousand years old

The Legacy of Heroes: A Fantasy Role-Playing Game; Game Master's Guide Vincent Venturella, Phantom Pain Richard A. Sherman, 1996-11-30 Phantom pain is an intriguing mystery that has captured the imagination of health care providers and the public alike How is it possible to feel pain in a limb or some other body part that has been surgically removed Phantom pain develops among people who have lost a limb or a breast or have had internal organs removed It also occurs in people with totally transected spinal cords Unfortunately phantom pain is a medical night mare Many of the people reporting phantom pain make disproportionately heavy use of the medical system because their severe pains are usually not treated successfully The effect on quality of life can be devastating Phantom pain has been reported at least since 1545 Weir Mitchell as related by Nathanson 1988 and or experienced by such diverse people as Admiral Lord Nelson and Ambroise Pare Melzack Davis 1993 The folklore surrounding phantom pain is fascinating and mirrors the concepts about how our bodies work that are in vogue at any particular time Most of the stories relate to phantom limbs and date from the mid 1800s The typical story goes like this A man who had his leg amputated complained about terrible crawling twitching feelings in his leg His friends found out where the leg was buried dug it up and found maggots eating it They burned it and the pain stopped Another man complained of a swollen feeling with frequent stinging or biting pains *The Search for Certainty* W.W. Spradlin, P.B. Porterfield, 2012-12-06 Who are we What are we How do we fit into the world Or into the universe These and other questions pertaining to ourselves and our environment are as compelling to us today as they were to our primitive ancestors Throughout our history we have developed paradigms of thought that have attempted to answer these questions each conceptual framework being particularly relevant to its age We are in the twentieth century witnessing a complete reorganization of our thinking We are now with the aid of technology able to bring together both ancient and new patterns

of thought and to observe the emergence of a kaleidoscopic world view that is uniting the once dissonant theories of philosophy religion and science This book sketches an historical picture of three world views that have shaped our ideas about ourselves These conceptual formats that have so influenced us are not mutually exclusive and are present in all of us simultaneously although to varying degrees depending upon our individual biases
