Sir Joseph Banks 1743-1820 A Guide To Biographical And Bibliographical Sources:

The Letters of Sir Joseph Banks Joseph Banks, Neil Chambers, 2000 Sir Joseph Banks was a great Georgian figure. He circumnavigated the world with Captain James Cook on the H M S Endeavor 1768-1771. He took with him a team of naturalists, illustrators and assistants at a personal cost of pounds 10 000. They made unprecedented collections of flora and fauna in most of the places the H M S Endeavor visited. Banks also led the first British scientific expedition to Iceland in 1772. Later he settled in London and assembled an enormous herbarium cum library. This was remarkable for its size and for the unique material gathered from the Pacific. Banks was elected President of the Royal Society in 1778, a position he held for 41 years, the longest anyone has served in that capacity. He was also the Director of the Royal Botanical Gardens at Kew, which flourished under his control and became greater than any other. He was also an influential privy councilor and advisor to George III and the government. Banks was therefore at the scientific and social centre of Georgian life for more than five decades of rapid change. Once established in this position, he developed an enormous global network of correspondence using letters to shape events, to further knowledge and to build an empire. There was almost no aspect too insignificant for his attention and on matters of importance his opinion was frequently sought. He has been called the Father of Australia for his role in establishing and then actively supporting colonies on the continent he visited with Cook. On matters of trade or agriculture, botany or horticulture, exploration or navigation, coinage, drainage and science, his views could hardly be avoided. Yet he was a warm, authoritative writer with a roiling prose style. His letters make interesting reading for their variety as well as their insight into both his public and private life. This selection is from the over 5 000 letters which he wrote and will in

Reader's Guide to the History of Science Arne Hessenbruch, 2013-12-16 The Reader's Guide to the History of Science looks at the literature of science in some 550 entries on individuals, Einstein, institutions and disciplines. Mathematics, general themes, Romantic Science and central concepts, Paradigm and Fact. The history of science is construed widely to include the history of medicine and technology as is reflected in the range of disciplines from which the international team of 200 contributors are drawn.

Sir Joseph Banks, Iceland and the North Atlantic 1772-1820 / Journals, Letters and Documents Anna Agnarsdóttir, 2017-01-06 Sir Joseph Banks was one of the great figures of Georgian England, best known for participating as naturalist in Cook's Endeavour voyage 1768-71, as a patron of science and as the longest serving President of the Royal Society 1778-1820. This volume brings together all Banks's papers concerning Iceland and the North Atlantic, scattered in repositories in Britain, the United States, Australia and Denmark and most published here for the first time. A detailed introduction places them in historical context.

Joseph Banks and the English Enlightenment John Gascoigne, 2003-12-18 A biography of scientific thinker Joseph Banks, placing his work in the context of eighteenth century Britain.

The History and Poetics of Scientific Biography Thomas Söderqvist, 2016-03-03 Biographies of scientists carry an increasingly prominent role in today's publishing climate. Traditional historical and sociological accounts of science

are complemented by narratives that emphasize the importance of the scientific subject in the production of science. Not least is the realization that the role of science in culture is much more accessible when presented through the lives of its practitioners. Taken as a genre, such biographies play an important role in the public understanding of science. In recent years there has been an increasing number of monographs and collections about biography in general and literary biography in particular. However, biographies of scientists, engineers and medical doctors have rarely been the topic of scholarly inquiry. As such, this volume of essays will be welcomed by those interested in the genre of science biography and who wish to re-examine its history, foundational problems and theoretical implications. Borrowing approaches and methods from cultural studies and the history, philosophy and sociology of science, the contributions cover a broad range of subjects, periods and locations. By presenting such a rich diversity of essays, the volume is able to chart the reoccurring conceptual problems and devices that have influenced scientific biographies from classical antiquity to the present day. In so doing, it provides a compelling overview of the history of the genre, suggesting that the different valuations given scientific biography over time have been largely fuelled by vested professional interests.

The Indian and Pacific Correspondence of Sir Joseph Banks, 1768-1820, Volume 4 Neil Chambers, 2021-11-18. Following his participation in James Cook's circumnavigation in HMS Endeavour 1768-71, Joseph Banks developed an extensive global network of scientists and explorers. His correspondence shows how he developed effective working links with the British Admiralty and with the generation of naval officers who sailed after Cook.

Joseph Banks and the British Museum Neil Chambers, 2015-09-30. Concentrating on the explorer and naturalist Joseph Banks 1743-1820, this book explores the early history of collections at the British Museum. Taking Banks' extraordinary career as its basis, it examines the changes that took place during a period of transition that led to collecting on an increasingly global scale.

Sir Joseph Banks (1743-1820) Harold Burnell Carter, 1987. [CRC World Dictionary of Palms](#) Umberto Quattrocchi, 2017-08-03. From the Foreword: Umberto Quattrocchi has brought us some amazing and useful works through the various dictionaries that he has compiled. This time it is for two very important plant families, the palms and the cycads, that are synthesized here in these two volumes. Each entry is fascinating, not just for the botany and full nomenclature of the plant species, but for all the associated uses, folklore and interactions with other organisms. These entries are fascinating glimpses of natural history. Botanists, conservationists, ethnobotanists, anthropologists, geographers, bird watchers, naturalists, historians and those of many other disciplines will find these volumes a most valuable and useful resource. It is the sort of book that will be in frequent use in my library.

Professor Sir Ghilleen Prance FRS VMH, Former Director Royal Botanic Gardens Kew. Following the same format as Umberto Quattrocchi's highly praised and well-used previous works, *The CRC World Dictionary of Palms*, Common Names, Scientific Names, Eponyms, Synonyms and Etymology brings together the vast and scattered literature on palms and cycads to provide better access to information on these economically important plants. Each genus and species has a detailed morphological description and includes a list of

synonyms and vernacular names in many languages Bibliographies accompany each entry which are comprehensive up to date and multi lingual The detailed information for every entry on habitats economic uses historical and biographical data botanical exploration and linguistics will be useful for any library involved with botany herbal medicine pharmacognosy medicinal and natural product chemistry ecology ethnobotany systematics general plant science agriculture or horticulture Umberto Quattrocchi is the author of the bestselling CRC World Dictionary of Plant Names winner of the prestigious Hanbury Botanical Garden Award His most recent multi volume work CRC World Dictionary of Medicinal and Poisonous Plants received strong praise as being an unparalleled starting place a tool of first resort for any thoughtful researcher Quattrocchi and CRC have delivered a dictionary like no other a learned finger pointing in the right direction John de la Parra Northeastern University Boston Massachusetts USA from Economic Botany Vol 68 2014 **Telling Lives in Science** Michael Shortland, Richard R.
